GRUND

How we think…

Inspired by Life Decarbonization, we works to accelerate the Energy Transition

"Leading,

Motivating,

Guiding and

Provoking"

…society Stakeholders…

to redesign ways in which humanity can exist with less impact on carbon balance.

GRUND

Our goals are guided by ESG policies

Environmental

- *Decarbonization*
- *Circular economy*
- *Eficience of resources use*
- *Technology inovation*

Governance

- *Sustainability of results*
- *Fiscal responsibility*
- *Ethics and integrity*

Social

- *Safety and health*
- *Customer respect*
- *Human rights*

What we do…

GRUND apply own business expertise to

- Measure the value of problems
- Technical solutions choose
- Build scenarios
- Design profitable projects
- Capital application plans
- Risk management
- Investment protection
- Mitigate impacts

How we do it…

4 circular approaches

We Access developers for open permission to apply their technologies like Solution Path Projects.

GRUND RENEWABLES SUITE

We Research social problems for human groups over Safety, Health and Dignity.

FORUM

FORUM

We Dialogue with governments, institutions and agencies to follow the legal and ethic ways to allow the Solution Path Projects.

SCIENCE REPORT

We Connect investors with complete solutions under treated risk map to turn promised overspread for any capital applied.

How we organize our technology brand

GRUND

Renewables Suite

- Eolic
- Hydro
- Nuclear
- Geothermal
- Biomass
- Waste
- Solar
- Tidal

GRUND

How we proceed…

Grund

leads local EPC Contractors
(Engineering, Procurement and Construction)
applying our own

Master Project Protocol

including 3 main phases :

A) **Conception :** Licensing, Risk Management and Executive Project

B) **Execution :** Material Purchase, Civil and Piping Building and Start-up Validations

C) **Production :** Rump-Up , Management Routines and stabilization

Licensed Technologies to Application

We have developed partners for all Renewables Suite options, allowing choose technologies optimized under customer purpose and capital disponibility.

Carbon Credits

Awarding the

Green Tech Initiative

The proposed Business Plan also accounts for the carbon credits resulting from this fantastic waste-to-energy conversion.

Expanding the foundations

To the South American presence Grund has decided introduce own small plants under the Energy Free Market and Distributed Generations Brazilian Laws.

*We want to change our position from **“technology transferors”** to **“energy market operators”** by installing our own plant to produce clean energy for the public grid at low costs under a scalable business model for all parts of the world.*

GRUND

Tears about the **Business Plan** with Fundraising

Repeating…

*We want to change our position from **“technology transferors”** to **“energy market operators”** by installing our own plant to produce clean energy for the public grid at low costs under a scalable business model for all parts of the world.*
