

Tender Brief for IDB-funded technology procurement opportunities 2025

Outsource2LAC

Outsource2LAC offers an invaluable opportunity for attendees to connect with potential partners in order to form **strategic alliances and partnerships**. These collaborations will enable companies to jointly participate in **procurement opportunities related to technology**, funded by the Inter-American Development Bank (IDB), that will **open in 2025**.

During the matchmaking sessions, participants will be able to identify and connect with companies that complement their services and capabilities, fostering innovative solutions that meet the requirements of each public procurement process detailed in this document. This initiative aims to promote the development of collaborative projects and the integration of technology companies from Latin America and the Caribbean into the value chains of international firms.

This is a unique opportunity to network with industry leaders and other companies interested in promoting technological solutions across various sectors.

By facilitating business meetings with potential allies or strategic partners, companies will be better positioned to seize upcoming opportunities, increasing their visibility and influence within the procurement landscape and their chances of winning those contracts

Index

- Argentina | Op # AR-L1332 | Computer Equipment | Amount: \$150K

Title of the bid: Development of a web portal on the NAABOL website and development of a mobile application for PcD in Bolivian airports

OPERATION # 5601/OC-BO

PROJECT # [BO-L1209](#)

Country

Bolivia

Country's Region

National

Sector

Transportation

Subsector

Airport Infrastructure

Project Name

Airport Infrastructure Program, Stage II.

Executing Agency

Vice-Ministry of Transportation

Proposal Description

It is proposed to develop an airport web page that provides information on accessibility, allowing Persons with Disabilities (PwD) to request assistance during their trip, complying with universal accessibility standards (WCAG 2.1 AA) to ensure that the information is perceptible, operable, understandable and robust. As a reference, the accessibility page of Heathrow Airport (UK) is mentioned. In addition, a mobile application will be created to help PWDs locate services such as counters and toilets, promoting their self-sufficiency in the terminal.

Title of the bid: Implement a Works and Procurement Monitoring System with Open Data

OPERATION # 5601/OC-BO

PROJECT # [BO-L1209](#)

Country

Bolivia

Country's Region

National

Sector

Transportation

Subsector

Airport Infrastructure

Project Name

Airport Infrastructure Program, Stage II.

Executing Agency

Vice-Ministry of Transportation

Proposal Description

The tender proposes to develop a monitoring system that allows the supervision of works and acquisitions, using open data principles to ensure transparency and accessibility of information. This system will facilitate the collection, management and dissemination of data on the progress of projects, budgets and contracting processes. By implementing an approach based on open data, it seeks to encourage citizen participation, improve accountability and optimize decision making in public management. The initiative aims to strengthen the community's trust in public administration and ensure efficient use of resources.

Amount

US\$20,000

Method

Price Comparison

OPERATION # 4650/OC-PR

PROJECT # [PR-L1153](#)

Country

Paraguay

Country's Region

Asuncion

Sector

State Reform/Modernization

Subsector

E-government

Project Name

Digital Agenda Support Program

Executing Agency

MITIC

Proposal Description

The objective of this consultancy is to find security flaws in the systems of the Paraguayan State. This allows identifying vulnerabilities in the system to be analyzed, understanding vulnerability as any flaw or weakness that can be exploited by an attacker to cause damage to an application or its components, including its data, users, the server that hosts it or any component that depends on the application.

For the Analysis of Vulnerability Reports, the Supplier shall perform the analysis of the vulnerability reports received from the OEEs, at MITIC's request.
