SERIES OF NON-ADDITIVE

LESS IS MORE

Does daily masking really improve bare skin? Can masks be applied daily?

Many professionals do not recommend daily masking, as the skin requires some time to completely absorb the active ingredients. If the skin is constantly working, skin damage may occur instead. Too many additives in masks results in over nutrition, which makes oily and combination skin prone to closed comedones, or causes hypersensitive reactions. In particular, for skin that is especially dry and delicate after laser treatment, allergenic products must be avoided.

***A truly additive-free product
is a definite winner!!***

**TO BRING YOU THE SAFEST PRODUCTS,
WE ENFORCE THE STRICTEST QUALITY CONTROL**

The sensitive skin population is most likely to remain loyal to a particular product for a long time, and also has the highest demands with regard to product quality. When changes occur in an external environment, corresponding changes will occur in delicate skin, such as dehydration, peeling, redness, swelling, and pruritus. If proper care is not administered, these changes may result in accelerated aging. TCI's cosmetics facility is the only facility that has received OECD Good Laboratory Practice (GLP) accreditation for the execution of cell and skin irritation tests to confirm non-toxicity. Hence, our products are 100% safe and non-irritating. Our product range is guaranteed to be free from 7 major types of additives: artificial fragrances, artificial colors, alcohol, parabens, petroleum-based surfactants, mineral oil and biological hormones. Therefore, your additive-free masks are just like another layer of skin, and can be applied at any time!

Nº1

O'YOUNG® BROCCOLI SOOTHING BIO-CELLULOSE MASK

Is your skin particularly sensitive after a facial treatment?

According to dermatologists, laser cosmetology, freckle removal and AHA peeling treatments will result in uneven wounds on the face, which make the skin dry and fragile! Meet the O'YOUNG® Broccoli Sprout Extract Non-Additive Mask! This mask is rich in sulforaphane, which suppresses the inflammatory response, thereby calming the skin and strengthening the skin barrier.

Main Ingredients

AQUA, O'YOUNG® BRASSICA OLERACEA ITALICA (BROCCOLI) SPROUT EXTRACT, LACTOBACILLUS/SOYMILK FERMENT FILTRATE, HAMAMELIS VIRGINIANA (WITCH HAZEL) BARK/LEAF EXTRACT

Main Function

Restores skin health, suppresses inflammation

Recommended Audience

Individuals who have undergone laser skin resurfacing
Individuals with sensitive skin

N°2

FORMOSA RUBY™ ANTI-AGING BIO-CELLULOSE MASK

Red quinoa (Djulis) is a traditional crop farmed by Taiwanese aborigines for over a century. It has antiglycation properties and is able to promote autologous collagen synthesis. Experiments have proven that prolonged use of the Formosa Ruby™ Djulis extract provides long-lasting moisturization for skin surface tissues, maintains the skin's hydration abilities, and promotes collagen synthesis, thus delaying the aging phenomenon in sensitive and fragile skin.

Main Ingredients

AQUA, FORMOSA RUBY™ CHENOPODIUM QUINOA SEED EXTRACT, PALMITOYL TRIPEPTIDE-1, PALMITOYL TETRAPEPTIDE-7, DIOSCOREA VILLOSA (WILD YAM) ROOT EXTRACT

Main Function

Collagen synthesis, antiglycation

Recommended Audience

Seekers of age defiance

N°3

GREEN CAVIAR® SEA GRAPE MOISTURIZING BIO-CELLULOSE MASK

Skin dryness is a major culprit in the aging process, and is also the main reason for skin sensitivity. The stratum corneum of the skin contains "natural moisturizing factors", and the quantity of these factors in the skin determines the skin's moisture content. The Green-Caviar® Sea grape extract is rich in fucoidan, which strengthens the skin barrier and enhances skin elasticity, thus contributing to healthy and elastic skin.

Main Ingredients

AQUA, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, SODIUM HYALURONATE, SODIUM PCA, TREHALOSE

Main Function

Deep moisturization

Recommended Audience

Individuals with desert-dry skin

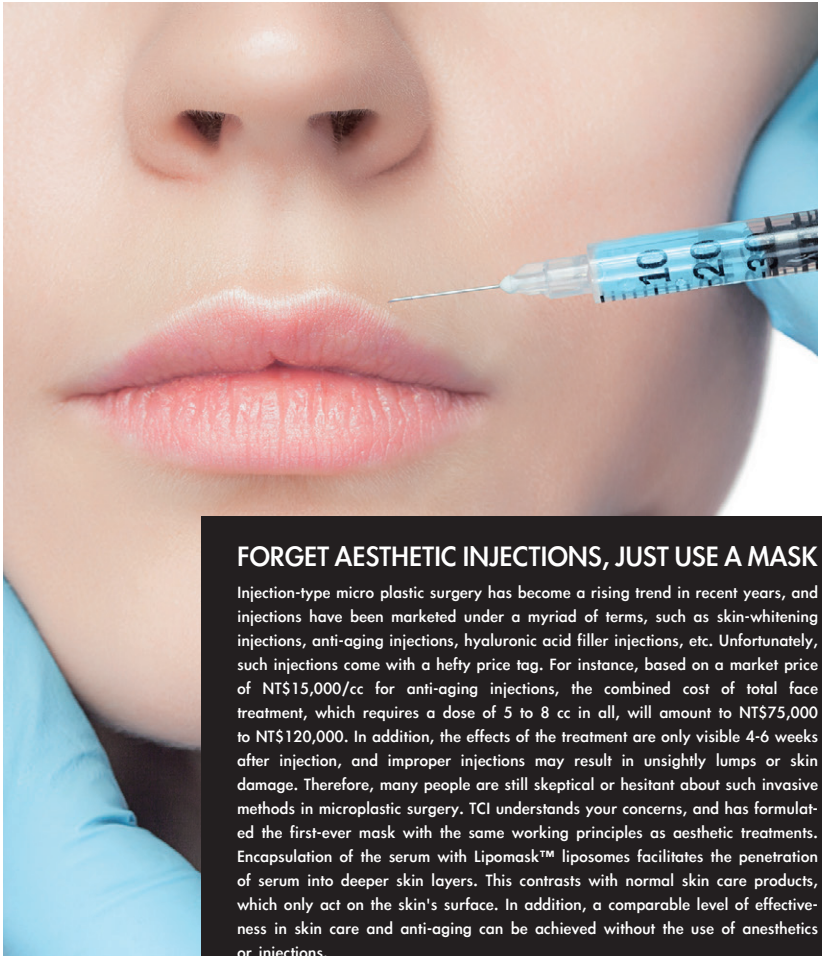

SERIES OF LIPOMASK™

THE POWER OF ACTIVE TRANSPORT

Occlusive dressing treatment (ODT), widely used in the dermatology field, is the secret behind achieving beautiful skin through facial masks. This is a percutaneous absorption process which involves the creation of a semi-enclosed space between the mask and the skin. When this space is gradually heated by the skin's own warmth (approximately 1°C increase in temperature), pores on the skin will open, and penetration theory allows the mask's liquid to enter the skin, thus enhancing the efficiency of absorption. What is active transport? LipoMask™, a liposome mask pioneered by TCI, employs a pharmaceutical vector technology involving the active transport of nanoliposomes. A phospholipid bilayer structure similar to a cell membrane is used for the encapsulation of the serum, and micronization by means of homogenization is concurrently used to further reduce the size of liposome spheres with the encapsulated serum (350nm). This enables faster penetration of the liposomes through the stratum corneum into the deeper skin layers, where the active ingredients within the liposomes are released, thus enhancing the skin's absorption of the active ingredients. Within a mere 15 minutes of mask application, the skin is permeated with the best-performing serum and the most thorough care. Experiments have proven that the Lipomask™ liposome technology enhances serum effects by approximately 18%.

Beauty can only be achieved through injections? We think not!

FORGET AESTHETIC INJECTIONS, JUST USE A MASK

Injection-type micro plastic surgery has become a rising trend in recent years, and injections have been marketed under a myriad of terms, such as skin-whitening injections, anti-aging injections, hyaluronic acid filler injections, etc. Unfortunately, such injections come with a hefty price tag. For instance, based on a market price of NT\$15,000/cc for anti-aging injections, the combined cost of total face treatment, which requires a dose of 5 to 8 cc in all, will amount to NT\$75,000 to NT\$120,000. In addition, the effects of the treatment are only visible 4-6 weeks after injection, and improper injections may result in unsightly lumps or skin damage. Therefore, many people are still skeptical or hesitant about such invasive methods in microplastic surgery. TCI understands your concerns, and has formulated the first-ever mask with the same working principles as aesthetic treatments. Encapsulation of the serum with Lipomask™ liposomes facilitates the penetration of serum into deeper skin layers. This contrasts with normal skin care products, which only act on the skin's surface. In addition, a comparable level of effectiveness in skin care and anti-aging can be achieved without the use of anesthetics or injections.

Nº4

MED-FIRMING ZHI MU ROOT COLLAGEN TENCEL LIPOMASK

Lipomask™ nanoliposome technology combined with elastin, plant-derived Anemarrhena asphodeloides extract and VITALITY™ Mimosa extract allow this mask to provide penetration into the deeper skin layers and promote the proliferation of autologous collagen, thus achieving a plumping effect similar to that typically provided by anti-aging injections. Beauty emerges in a mere 15 minutes.

Main Ingredients

AQUA, ANEMARRHENA ASPHODELOIDES ROOT EXTRACT, VITALITY™ MIMOSA TENUIFLORA LEAF EXTRACT

Main Function

Skin tightening and lifting, anti-aging

Recommended Audience

Needle phobics / Individuals concerned about the "stiff face" side effect associated with injections

N°5

MED-WHITENING GLUTATHIONE COLLAGEN TENCEL LIPOMASK

The effects of skin-whitening injections are fully circulated within the body, so how much of the skin-whitening drug actually reaches your face to help whiten the skin? The injections may even be totally ineffective in the desired areas, with the active ingredients ending up being metabolized by the liver and kidneys. To address this issue, TCI has designed a mask that can achieve whitening effects comparable to skin-whitening injections while targeting facial area. This high performance skin-whitening product contains a combination of glutathione, a common whitening agent in the market, and plant-derived Vitality™ Eclipta prostrata extract, which provides whitening and brightening effects without injections.

Main Ingredients

AQUA, GLUTATHIONE, SODIUM ASCORBYL PHOSPHATE, VITALITY™ ECLIPTA PROSTRATA EXTRACT

Main Function

Skin brightening and whitening

Recommended Audience

Over-hours office workers / Extended skin brightening / Dullness remedying

N°6

MED-HYDRATION SODIUM HYALURONATE COLLAGEN TENCEL LIPOMASK

Derma Shine injections are direct injections of a hyaluronic acid-based solution into the dermis through the application of a negative pressure technique. Nutrients can be evenly distributed across the entire skin surface by making high density perforations on the face. However, the presence of a large number of minimally invasive wounds overstimulates the skin, which results in long-term skin sensitivity with symptoms such as dryness, peeling, and red spots. Improper wound care and skin protection may even result in severe reactions such as dullness and ulceration. Therefore, TCI has applied the Lipomask™ nanoliposome technology to achieve direct delivery of a triple hydration formula filled with hyaluronic acid, GreenCaviar® and rice bran ceramide to the dermis. Multiple layers of hydration from the inside out soften the entire skin surface, thus creating a natural, supple and hydrated appearance. Baby-soft skin can be easily achieved through long-term use.

Main Ingredients

AQUA, SODIUM HYALURONATE, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, HYDROLYZED RICE BRAN EXTRACT

Main Function

Deep moisturization

Recommended Audience

Individuals with desert-dry skin / Residents in dry regions / Office workers

Bringing the miracle of reverse growth to you!!

BEGIN THE PROLOGUE OF ETERNITY

When cuts or wounds occur in plants, automatic proliferation of protective tissues and regeneration of cells will take place, which promotes healing and boosts all of the processes related to plant development and growth. These tissues and cells are collectively known as callus and stem cells. Such cells have enhanced healing capacities and cell vitality compared with the rest of the plant. Experiments have shown that callus and stem cells can enhance skin cell activity, promote cell genesis and repair damaged cells. In addition, stem cell extracts from different plants have different antioxidant abilities and provide different effects for the human body.

WHILE OTHERS GO WITH THE TIDE OF TIME, YOU REMAIN IN THE REALM OF YOUTH

Stem cells exist in a complex microenvironment. In such an environment, cells provide many specialized nutrients to maintain and control the regeneration and differentiation of stem cells, which enables the proliferation of protective callus (stem cells in plants) on the surface of cuts in plants. Through the use of advanced plant extraction, cell culture and essence extraction techniques, TCI is able to preserve the totipotency of plant stem cells, thus enabling these cells, which possess everlasting vitality, to demonstrate their astounding regenerative capabilities. The use of such cells in healthcare products is the first step to delaying aging and extending the human lifespan.

N°7

CELL YOUNG® ICE PLANT ANTI-PHOTOAGING SILK LIPOMASK

The ice plant comes from the coastal areas of South Africa, where it grows in a dry, hot and highly saline environment all year round. Its abilities to resist high temperatures and UV radiation for prolonged periods of time stem from its abundance of active ingredients such as polyphenols, flavonoids, inositol and minerals. Experiments have proven that the CellYoung® Ice plant stem cell extract effectively reduces cell damage under UV radiation and enhances the results of DNA repair. In addition, it possesses remarkable anti-photoaging capabilities, and is able to suppress the growth of melanoma cells.

Main Ingredients

AQUA, CELL YOUNG® MESEMBRYANTHEMUM CRYSTALLINUM CALLUS EXTRACT, SOLIDAGO VIRGAUREA (GOLDENROD) EXTRACT, DIOSCOREA VILLOSA (WILD YAM) ROOT EXTRACT

Main Function

Anti-photoaging, enhances the skin's anti-UV mechanisms

Recommended Audience

Travel enthusiasts / Outdoor workers / Individuals frequently exposed to the sun

N°8

CELL YOUNG® ORCHID RECOVERY SILK LIPOMASK

The rare wild orchid species of Taiwan's East Coast are delicate yet tenacious. Experiments have proven that the Young® Orchid stem cell extract can increase the expression of genes related to hyaluronic acid synthesis in the human body, and possesses excellent antioxidant properties. These features facilitate skin protection, preserve the skin's moisture content, and enhance skin defense. In addition, it provides long-lasting hydration and regulates the water content of the skin surface.

Main Ingredients

AQUA, CELL YOUNG® PHALAENOPSIS APHRODITE CALLUS EXTRACT, PANAX GINSENG ROOT EXTRACT, TOCOPHERYL ACETATE

Main Function

Promotes hyaluronic acid synthesis in the skin, enhances skin luster and hydration capabilities

Recommended Audience

Seekers of age defiance / Delicate beauties

Nº9

CELL YOUNG® PEACH BLOSSOM BRIGHTENING SILK LIPOMASK

The ample amounts of vitamins A, B, E and various polyphenols in peach blossoms allow it to provide skin soothing, skin tightening, wrinkle reduction, and skin whitening effects. Experiments have proven that the CellYoung® Peach blossom whitening stem cell extract can reduce inflammation caused by sun exposure, alleviate redness and swelling, and effectively soothe the skin, thus providing skin lightening and brightening effects.

Main Ingredients

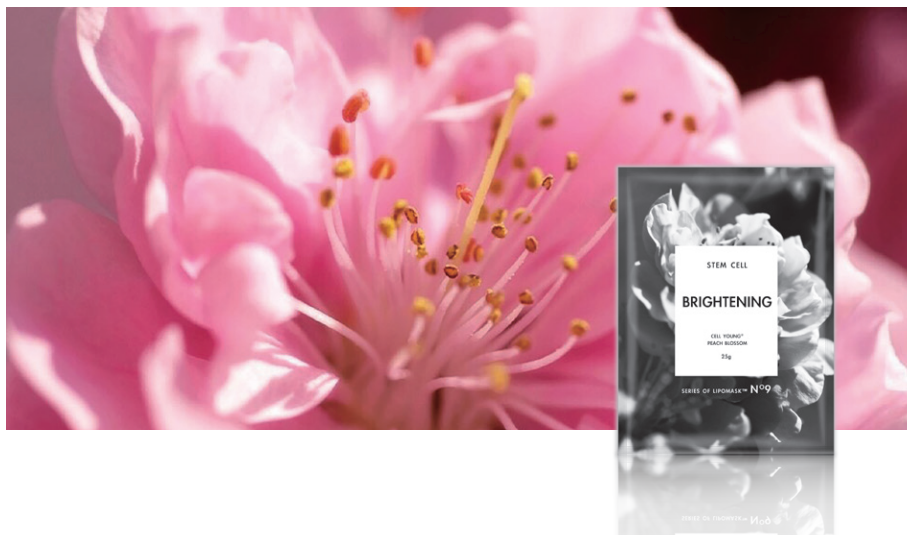

AQUA, CELL YOUNG® PRUNUS PERSICA CALLUS CULTURE EXTRACT, ORYZA SATIVA (RICE) LEES EXTRACT, NIACINAMIDE

Main Function

Skin brightening, skin firming

Recommended Audience

Women who want to dazzle with their bright pale skin / Commuters

SERIES OF AROMA THERAPY PHYSIOLOGY (ATP)

THE POWER OF SCENT

People are engulfed by the pressures of rapid social development; receiving continuous stimuli from all visual, olfactory, taste sensors and the accumulation of these overwhelming exposures reflects in the form of stress. Stress is the single most influential factor for the production of free-radicals in our body that leads to the acceleration of aging in cells and in the skin.

However, the sense of smell is the only sensory system without the necessity to make any intermediate stops before reaching the central Amygdala. Amygdala is the integrative center in our brain responsible for emotions, emotional behavior, emotion-linked memories and motivation; it is also closely linked to the formation of long-term-memory. International research studies have shown the effect of aromatic plants affecting the human mind as well as the whole body in as short as 3 minutes post-treatment.

Which brings us to the explanation of why we feel positive emotions when encounter an attractive smell, this is our central nervous system releasing relaxation hormones in response to the pleasant aromatic stimulation. Serotonin is one example of the neurotransmitters that is released involved in the continual modulation of the parasympathetic nervous system; allowing us to perceive a sense of security, peacefulness and contentment. It also greatly enhances the sleeping quality and full-bodily relief.

*No Time To Step Out For Nature?
Bringing Nature To You!*

N°10

FOREST MULTILAYERS MASK

In the dream of long-forgotten tales, can you still recall the crisp scent of a germinating green in the mellow moist air of the faerie lair.

During maturation of trees in the forest, their leaves emit carbohydrate particles which stabilizes mood when received in humans. The natural aroma of wood, the mosaic moss growth atop dampened rocks, the dew droplets residing gliding across leaves, the sing-song of forest birds are elements that enhances the mind through the state of serenity.

Main Ingredients

AQUA, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, HYDROLYZED RICE BRAN EXTRACT, TREHALOSE, SODIUM PCA

Main Function

Soothes fluctuating moods, repairs wear and tear of daily skin.

Recommended Audience

Soul-seeker / Yoga-lover / Vegetarian

N°11

SUNBATH MULTILAYERS MASK

Find your heart on the beach. With the warm scent of gentle sunray, reignite the heat in your heart and recover what has been lost.

Supplied with an abundance of sunlight, our body's secretion of thyroid hormones, sex hormones and adrenaline intensifies; this effectively improves the overall mental state and provides some degree of comfort for negative emotions such as depression or low mood swings.

Main Ingredients

AQUA, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, HYDROLYZED RICE BRAN EXTRACT, TREHALOSE, β -CAROTENE

Main Function

Bodily relaxation, brightening of the skin.

Recommended Audience

Outdoor-lover / Concerned about over tanning / Sports enthusiast

N°12

BEACH MULTILAYERS MASK

Abandon all inhibitions in the accepting caress of the coastal wonders; discover your enthusiasm for life with the scent of the infinite ocean!

The tranquility of a smooth sandy beach can change the molecular chemistry of our body. The motion of the ocean waves yields negative ions; negative ions speeds up our body's absorption of oxygen. Negative ions also balance serotonin levels, and serotonin is the body's mood and stress display substance. This is why scientists have associated the beach experience with mental wellbeing and overall energy, health and happiness; it may even improve the troubles of irregular sleepers.

Main Ingredients

AQUA, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, HYDROLYZED RICE BRAN EXTRACT, TREHALOSE, COPPER GLUCONATE, MAGNESIUM ASPARTATE, ZINC GLUCONATE

Main Function

Improves sleeping quality, encourages synthesis of skin collagen & self-renewal.

Recommended Audience

Peace-seekers / troubled sleepers

Nº13

GARDEN MULTILAYERS MASK

A scent of nostalgia in the garden of roses & orange blossom.. too subtle an aphrodisiac. Love as pure and untouched~ tender as the atmosphere of home.. eventually you will find yourself coming home.

In the United States the intimate relationship between humans and plants have long assisted in the search for mental illness remedies; it has also been a subject of discussion in the treatment for post- brain injury and other cognition affecting diseases. Patient rehabilitations, aiming to restore general mental health, have long explored the application of plant aromatherapy and regard it as a legitimate functional adjunctive treatment. Society's praise of the significance of the flower has also gone far beyond the scope of predefined imagination; flowers not only bring people a sense of self-worth, the symbol of beauty, a currency for love and be-loved, all has pushed our understanding what the flower represent to a full-blown psychological influencer.

Main Ingredients

AQUA, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, HYDROLYZED RICE BRAN EXTRACT, TREHALOSE, PRUNUS YEDOENSIS LEAF EXTRACT

Main Function

Minimizes signs of fatigue, boosts skins natural defense mechanisms, anti-oxidation.

Recommended Audience

Highly stressed, over-worked / perfectionists

SERIES OF FANTASTIC

A SURPRISE

Apart from whitening, hydration and firming, what else can the facial masks sold on the market do for our skin?? Apart from basic skincare, how else can we achieve all-rounded care for our skin? In the face of an increasingly harsh environment, our skin has to fight hard against external damage every minute of the day. Studies have indicated that environmental pollution increases the rate of skin damage ten-fold!

Air pollutants cause the skin to generate large amounts of free radicals, which oxidize the skin and cause the skin to become fragile and damaged, thereby resulting in various skin problems. Long work hours not only result in both physical and mental fatigue, but also leads to a variety of skin problems such as dry lines, dullness, sagging and coarseness, or even sensitivity and redness.

Want to save your skin as soon as possible? TCI has a surprise for you!!! Are you prepared for it?

*Skin can be recharged?
Surely you jest!*

N°14

CHARGING RECOVERY MASK

The concentration and distribution of minerals in the epidermis are closely related to the rebuilding of the skin barrier. In particular, divalent cations are capable of increasing barrier resistance. Studies have indicated that a higher concentration of divalent cations results in a healthier skin barrier! The 100% FULL Recharging Mask contains divalent cations, which enhance the skin's defense. A mere 10 to 15 minutes of "recharging" restores brightness and vitality to your face.

Main Ingredients

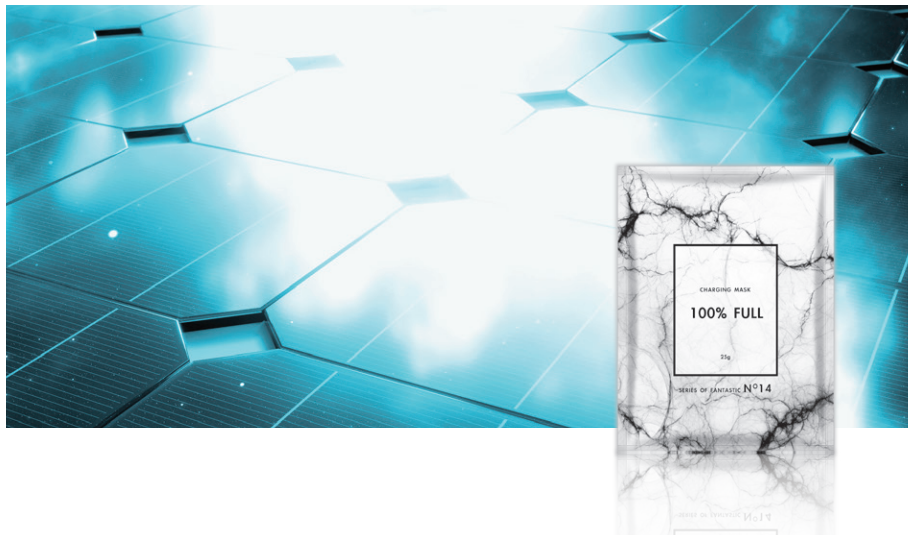

AQUA, COPPER GLUCONATE, MAGNESIUM ASPARTATE, ZINC GLUCONATE, SARGASSUM GLAUCESENS EXTRACT, SODIUM HYALURONATE

Main Function

Enhances the skin's defense, brightens skin

Recommended Audience

Night shift workers / Partygoers

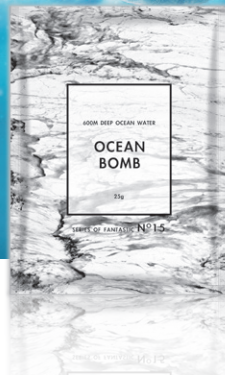

Nº15

600M DEEP OCEAN WATER MOISTURIZING MASK

Deep ocean water from the Pacific Ocean, collected at a depth of 600 m, is rich in minerals and trace elements. As it is uncontaminated by pollutants on the earth's surface and isolated from the atmosphere, it is nearly sterile due to the inability of plankton to reproduce in such an environment. In addition, due to the small molecular size of water, and the mineral content and osmotic pressure of deep ocean water being similar to that of body fluids in humans, deep ocean water can be easily absorbed by the body. The Deep Ocean Water Mask not only replenishes water in your skin, but also provides four key minerals, namely magnesium, calcium, sodium and potassium, which effectively promote skin metabolism and facilitate skin conditioning.

Main Ingredients

AQUA, SEA WATER, ASCOPHYLLUM NODOSUM EXTRACT, SODIUM HYALURONATE

Main Function

Promotes skin metabolism,
Conditions skin

Recommended Audience

Dwellers of extremely cold and dry regions / Individuals with dry skin

N°16

ISOTONIC BALANCE MASK

Osmotic pressure is the force that drives the balance in intracellular and extracellular fluid concentrations. Thus, direct absorption can occur in cells, as the osmotic pressure prevents cell damage due to excessively high or low pressures. Nutrients required by the skin can be replenished instantly, and the skin's normal circulation can be maintained.

Main Ingredients

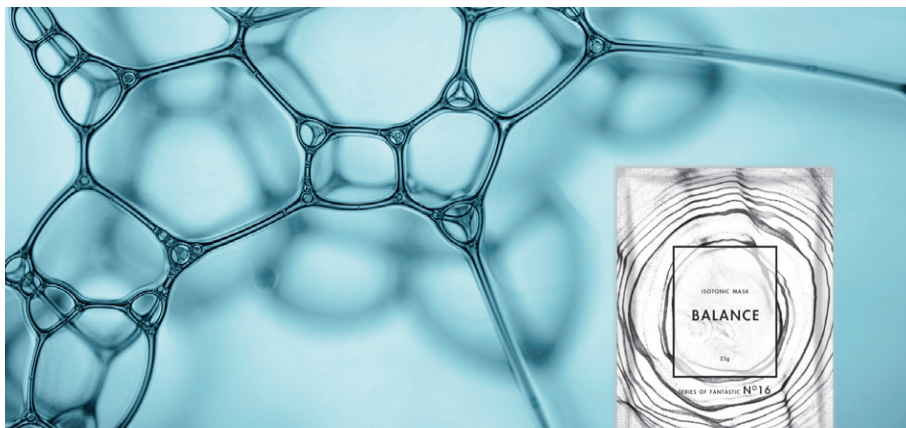

AQUA, JELLYSKIN® JELLYFISH EXTRACT, SOLUBLE COLLAGEN, POLYACRYLATE CROSSPOLYMER-6

Main Function

Maintains circulation in the skin

Recommended Audience

Road running and sports enthusiasts

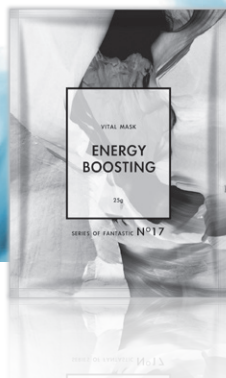

N°17

VITAL ENERGY BOOSTING MASK

Working late into the night often results in enlarged pores, saggy skin, fine lines and dark under-eye circles. Want to save your skin in a flash? The Ginseng Vitality Wood Pulp Mask is the magic wand that you will need.

Manufactured using Super X GOJINSEN and a low-frequency ultrasound extraction technique, it effectively accelerates blood circulation in the skin and fades dark under-eye circles. Active ingredients in the passion fruit extract facilitates lymphatic detoxification, and trace elements effectively enhance cell vitality, thus erasing the effects of late nights from your skin.

Main Ingredients

AQUA, SUPER X® PANAX GINSENG ROOT EXTRACT, PASSIFLORA EDULIS FRUIT EXTRACT, COPPER GLUCONATE, MAGNESIUM ASPARTATE, ZINC GLUCONATE, TREHALOSE

Main Function

Accelerates blood circulation in the skin, facilitates lymphatic detoxification

Recommended Audience

Extreme sports lovers / Avid swimmers

N°18

SKIN-SHIELDING CHARCOAL MASK

The skin is the human body's largest organ and part of the first line of defense in the human body. Pollution, haze and UV radiation in the external environment can cause skin damage, which results in dryness and sensitive skin. Dehydration leads to low barrier function, which results in skin problems.

The All-rounded Anti-pollution Bamboo Charcoal Mask has a new triple-action anti-pollution formula: Sargassum muticum (Japanese wireweed), moringa seeds, aloe vera. Sargassum muticum effectively protects the skin from damage by UV radiation, while moringa seeds produce a lotus effect, which prevents the penetration of pollutants into the skin, and forms a moisture-retaining film which acts as a protective barrier for skin repair. Aloe vera has excellent moisture-retention properties, and is able to alleviate redness, swelling and inflammation in the skin.

Main Ingredients

AQUA, SARGASSUM GLAUDESCENS EXTRACT, MORINGA PTERYGOSPERMA SEED EXTRACT, ALOE BARBADENSIS LEAF JUICE, TREHALOSE

Main Function

Enhances the skin's defense

Recommended Audience

Outdoor enthusiasts / Commuters / Outdoor workers

SERIES OF INSTANT BEAUTY

IMMEDIATE RESCUE

Speed is the key to success when every minute counts! However, skin conditioning often requires time. So how can instant restoration of skin health be achieved for important occasions? In recent years, many masks on the market have promised immediate effects, but their quick effectiveness is achieved through various types of hormones, such as "skin opium". The long-term use of products with added hormones can often result in symptoms such as acne-like rashes, rosacea, striae atrophicae or impetigo folliculitis. These are symptoms of hormone dependent dermatitis, which differs from typical skin sensitivity or allergies, as it results in severe destruction of the normal physiological structures and functions of the skin.

Top speed guarantees victory!

N°19

ASCOPHYLLUM NODOSUM INSTANT WHITE INVISILK MASK

You haven't done your skin whitening properly! And now you have to attend an important meeting on short notice!

The Instant Whiten Bionic Mask is rich in vitamin C and B3 derivatives. In addition to providing a whitening effect in a short period of time, long-term use also helps you achieve true skin whitening from the inside out. The mask also promotes skin metabolism and provides rapid brightening and whitening effects, while being gentle on the skin.

Main Ingredients

AQUA, ASCOPHYLLUM NODOSUM EXTRACT, NIACINAMIDE, SODIUM HYALURONATE, 3-O-ETHYL ASCORBIC ACID

Main Function

Reduces melanin, instant whitening

Recommended Audience

Individuals with dull skin / Event hosts / Runway models

N°20

FORMOSA RUBY™ DJULIS SEED INSTANT FIRMING INVISILK MASK

Defy gravity and say goodbye to sagging skin!

When the skin has insufficient collagen, elastin and hydration, skin cells gradually lose elasticity, thus resulting in wrinkles or even slight sagging. The Instant Firming Mask uses the Formosa Ruby(R) Djulis extract to effectively increase collagen proliferation in the deeper skin layers, so as to achieve skin tightening, moisture retention, and lifting. In addition, vitamin E is added to help the skin resist the effect of free radicals, thus maintaining skin elasticity and preventing the loss of elasticity through chronic or unapparent damage.

Main Ingredients

AQUA, FORMOSA RUBY™ CHENOPODIUM QUINOA SEED EXTRACT, PRUNUS AMYGDALUS DULCIS (SWEET ALMOND) SEED EXTRACT, HELIANTHUS ANNUUS (SUNFLOWER) SEED OIL, LUPINUS ALBUS SEED EXTRACT, TOCOPHEROL

Main Function

Smooths fine wrinkles, lifts and tightens skin

Recommended Audience

Exhausted skin / Individuals prone to edema

N°21

CELL YOUNG® TEA CALLUS CULTURE INSTANT SOOTHING CAMELLIA OIL MASK

Instant relief for dryness and itching due to skin dehydration!

Every day, people are exposed to severe air pollution and omnipresent irritants in the environment. Thus, it is important to care for the skin by soothing the tightness and discomfort caused by irritants. Camellia sinensis extract provides a soothing and calming effect. Glycosyl trehalose forms a special protective membrane on cell surfaces, which protects skin structures from damage and insulates the skin against external irritants. It gives you instant relief through rapid anti-inflammatory and anti-itching effects.

Main Ingredients

AQUA, CELL YOUNG® TEA CALLUS CULTURE EXTRACT, GLYCOSYL TREHALOSE, ZINGIBER OFFICINALE (GINGER) ROOT EXTRACT, SODIUM HYALURONATE, SCLEROTIUM GUM

Main Function

Reduces irritation, soothes and calms skin

Recommended Audience

Urban commuters / Individuals prone to facial flushing and swelling

N°22

GREEN CAVIAR® SEA GRAPE INSTANT HYDRATION CAMELLIA OIL MASK

Quench your skin's thirst after long-haul flights!

Is your skin feeling thirsty from prolonged exposure to air conditioning and low cabin pressure after a long flight? Absorption and moisture retention on the superficial skin layer cannot be achieved by water intake alone. The Instant Hydration Mask contains the GreenCaviar® Sea grape extract which is rich in polysaccharides. Moisturizing ingredients are introduced into the skin, and the moisture is immediately locked in place, which effectively promotes skin elasticity and provides instant hydration and beauty

Main Ingredients

AQUA, GREEN CAVIAR® CAULERPA LENTILLIFERA EXTRACT, SODIUM HYALURONATE, SODIUM POLYGLUTAMATE, TREHALOSE

Main Function

Restores skin hydration, locks moisture

Recommended Audience

Long-distance travelers / Emergency hydration after sun exposure / Cabin crew

SERIES OF PROBIOGENICS

THE SKIN'S MINI UNIVERSE

The skin is a vital organ of the human body. It isolates the body's internal environment from its external surroundings, and is also part of the immune system's first line of defense. The skin's surface area ranges from 1.5m² to 2m² in adults. The human body contains tens of millions of bacteria, and the micro ecological balance in the human body is maintained by varying the numbers of harmful and beneficial bacterial communities.

Microbiota balance has an important effect on the nutritional status, physiological functions, aging process and vitality in humans. An imbalance in the human body may lead to openings for diseases, which in turn leads to the emergence of various skin problems.

A recent study has shown that there are more types of symbiotic bacteria found on normal healthy skin than on diseased skin. Even on a single person, there are less bacteria on skin with dermatitis compared with healthy skin. The provision of appropriate conditioning and protection to the skin, which results in a healthy sebum film and a normal environment for the growth of symbiotic bacterial communities, may facilitate the maintenance of skin health.

BALANCE IS BETTER THAN DESTRUCTION

In the past, most widely accepted skin care concepts stated that the face should be washed absolutely clean, and that clean skin could only be achieved by washing the face with hot water. In actual fact, excessive cleaning and exfoliation do not solve skin problems. Instead, they result in an imbalance in the skin microbiota, and can cause further issues in the skin. The correct method for maintaining good skin is to facilitate a microbiotic balance by providing a normal environment for the growth of symbiotic bacterial communities. Therefore, the key to achieving real beauty is: internal conditioning + external mask application! This makes you beautiful from the inside out.

Probiotic drinks for the skin

N°23

BACILLUS COAGULANS ALIVE WOOD PULP MASK

Lactobacillus has whitening, moisturizing and antioxidant properties, which are beneficial for the skin. The Alive Lactobacillus Mask contains Bacilli, which can boost the amount of beneficial bacteria in the skin. When the amount of beneficial bacteria in the skin increases, skin reactions due to sensitivity are reduced. The wasabi and German chamomile extracts in the mask can also effectively relieve inflammation and skin discomfort. With a healthy skin microbiota, the skin will naturally exude a dewy glow.

Main Ingredients

AQUA, BACILLUS COAGULANS, WBEAUTY™
WASABI LEAF EXTRACT, CHAMOMILLA
RECUTITA (MATRICARIA) EXTRACT, ALOE
BARBADENSIS LEAF JUICE

Main Function

Restores balance of the skin microbiota

Recommended Audience

Individuals with irregular daily routines /
Individuals with long-term skin problems

N°24

TCI 633 BALANCE CHARCOAL MASK

Propionibacterium acnes is a bacterium that mainly causes acne. When an imbalance occurs in the skin microbiota, the exponential growth of *Propionibacterium acnes* often results in acne-prone skin. The TCI633 Hyaluronic Acid-Producing Probiotic Strain is a novel probiotic strain isolated from breast milk. Studies have found that TCI633 is able to effectively suppress the growth of harmful bacteria and keep the skin in optimum condition.

Main Ingredients

AQUA, STREPTOCOCCUS THERMOPHILUS FERMENT, LACTOBACILLUS/SOYMILK FERMENT FILTRATE, HAMAMELIS VIRGINIANA (WITCH HAZEL) BARK/LEAF EXTRACT, GLYCOSYL TREHALOSE, HYDROLYZED RICE BRAN EXTRACT

Main Function

Anti-acne

Recommended Audience

Acne sufferers / Night owls
