

NON-STOP PRODUCTION FOR THE WORLD

A world wide engineering and service to the petroleum-refinery and chemical industry

- FLOATING ROOF SEALS
- INTERNAL FLOATING ROOFS
- FLOATING SUCTION SYSTEMS
- ROOF DRAIN SYSTEMS
- EMISSION CONTROL SOLUTIONS
- SPECIAL CUSTOMER SOLUTIONS

ULTIMATE
TECHNOLOGY
ENGINEERING
PRODUCTION
QUALITY
SERVICES

- Aluminium Floating Roof
- Full Contact Aluminium Floating Roof
- Hybrid Floating Roof
- Stainless Steel Floating Roof
- Cable Suspended Floating Roof
- Floating Roof Seals
- Fiberglass Floating Roof

- Floated Oil Skimmer
- Tri-Float Folding Skimmer
- Floating Roof Skimmer
- Double Arm - Single Arm Skimmer
- Vertical Hose Skimmer
- Special Skimmer Solutions

- Gauge Pole Cover / Sock
- Leg Seal - Leg Sock
- Emergency Roof Drain Valve
- Gauge Pole Sleeve and Float
- Hydrocarbon Sensing Valve
- Pontoon Leaking Bladder
- Gauge Pole Retriever / Basin

- Central Type Heavy Duty Swing Joint
- Off-Central Type Swing Joint
- Triple-Double Arm System
- Floating Suction System For Floating Roof
- Sampling and Indicator System

- Mechanical Primary Scissor Seal
- Mechanical Primary Pantograph Seal
- Secondary Seals
- Double Seals
- Wiper Seals
- Seal Spare Parts
- Special Seal Options

- Flexible Roof Drain Joint
- Roof Drain Swivel Joint
- Flexible Joint Articulated System
- Swivel Joint Articulated System
- Roof Drain Check Valve Options
- Hydrocarbon Sensing Valve

ATECO STORAGE TANK EQUIPMENTS DESIGN - ENGINEERING - PRODUCTION

ALUMINIUM PONTOON & FULL CONTACT INTERNAL FLOATING ROOFS

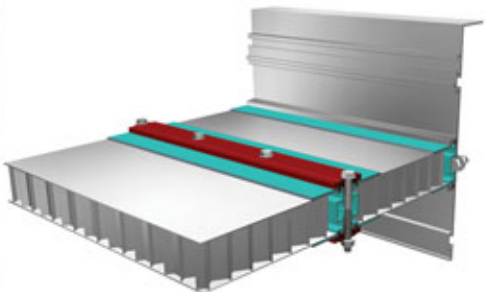

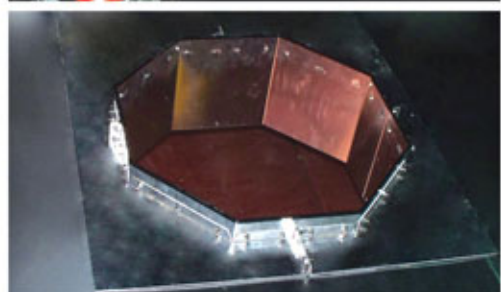

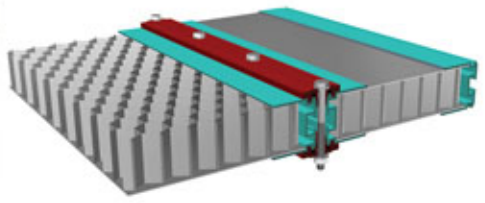

- * ALUMINIUM
- * HYBRID
- * STAINLESS STEEL
- * CABLE SUSPENDED
- * HONEYCOMB FULL CONTACT

ATECO is a privately held manufacturer and erector of internal floating roofs and perimeter seal systems for above-ground storage tanks and covers for API separator basins. Operating since 1999, ATECO is recognized worldwide within the petrochemical industry as the premier leading supplier of these custom roofs and accessories serving major oil companies and terminal operators in many countries all over the world.

At ATECO, we deliver exceptional service and deliberately specialize in a small range of products to serve our customers better. Our engineers design each roof to specific customer needs. ATECO in-house fabricators and certified welders painstakingly make components to exact specifications and our highly trained ATECO field crews perform expert field installations.

Our primary objective is to provide superior products and unsurpassed service to the petrochemical storage industry. We help companies meet or exceed the guidelines and laws set forth by the EPA, API and NFPA for these types of products and do so with everyone's safety and product performance as top priorities.

ULTIMATE SEALS FOR PETROLEUM

PRIMARY SEALS

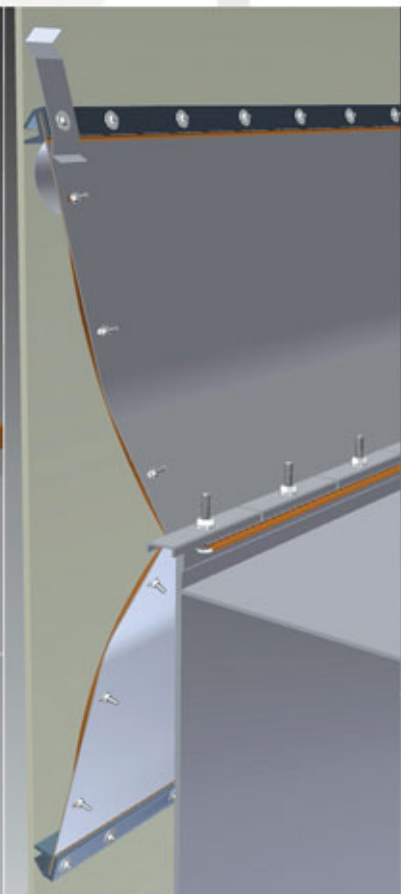

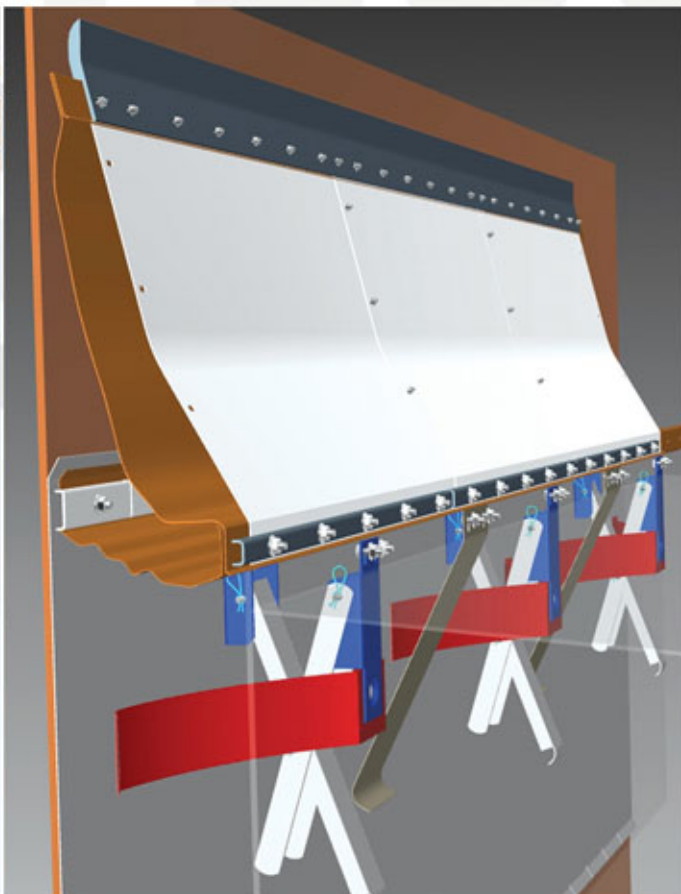

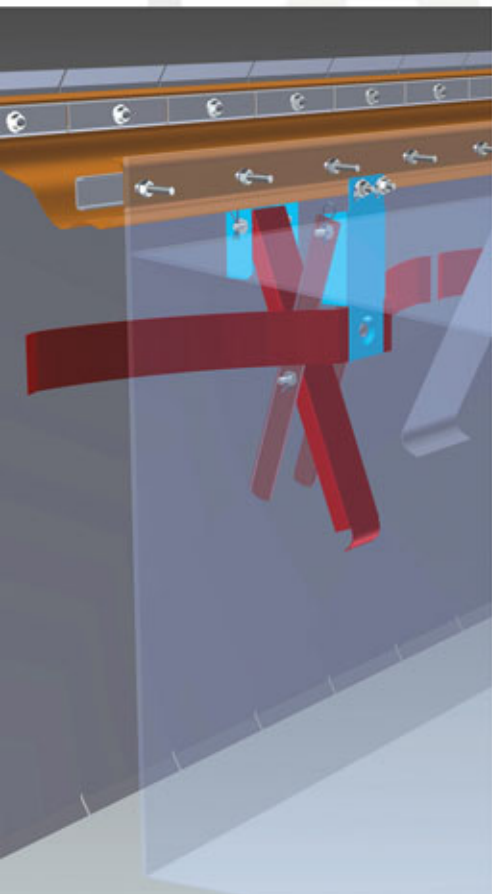

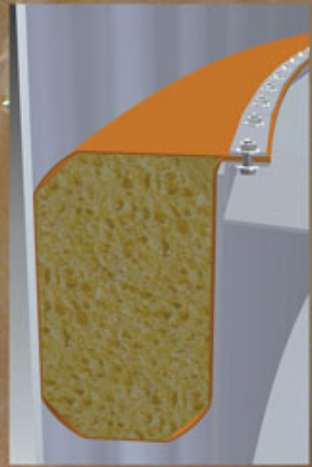

- Mechanical Scissor Seals
- Mechanical Pantograph Seals
- Foam Deltoid Seals
- Foam Ever Seals
- Foam Graver Seals
- Foam Seals
- Tube Seals

SECONDARY SEALS

- ATC-S100 Secondary Seals
- ATC-S200 Secondary Seals
- ATC-S300 Secondary Seals
- ATC-SSPC Special Secondary Seals

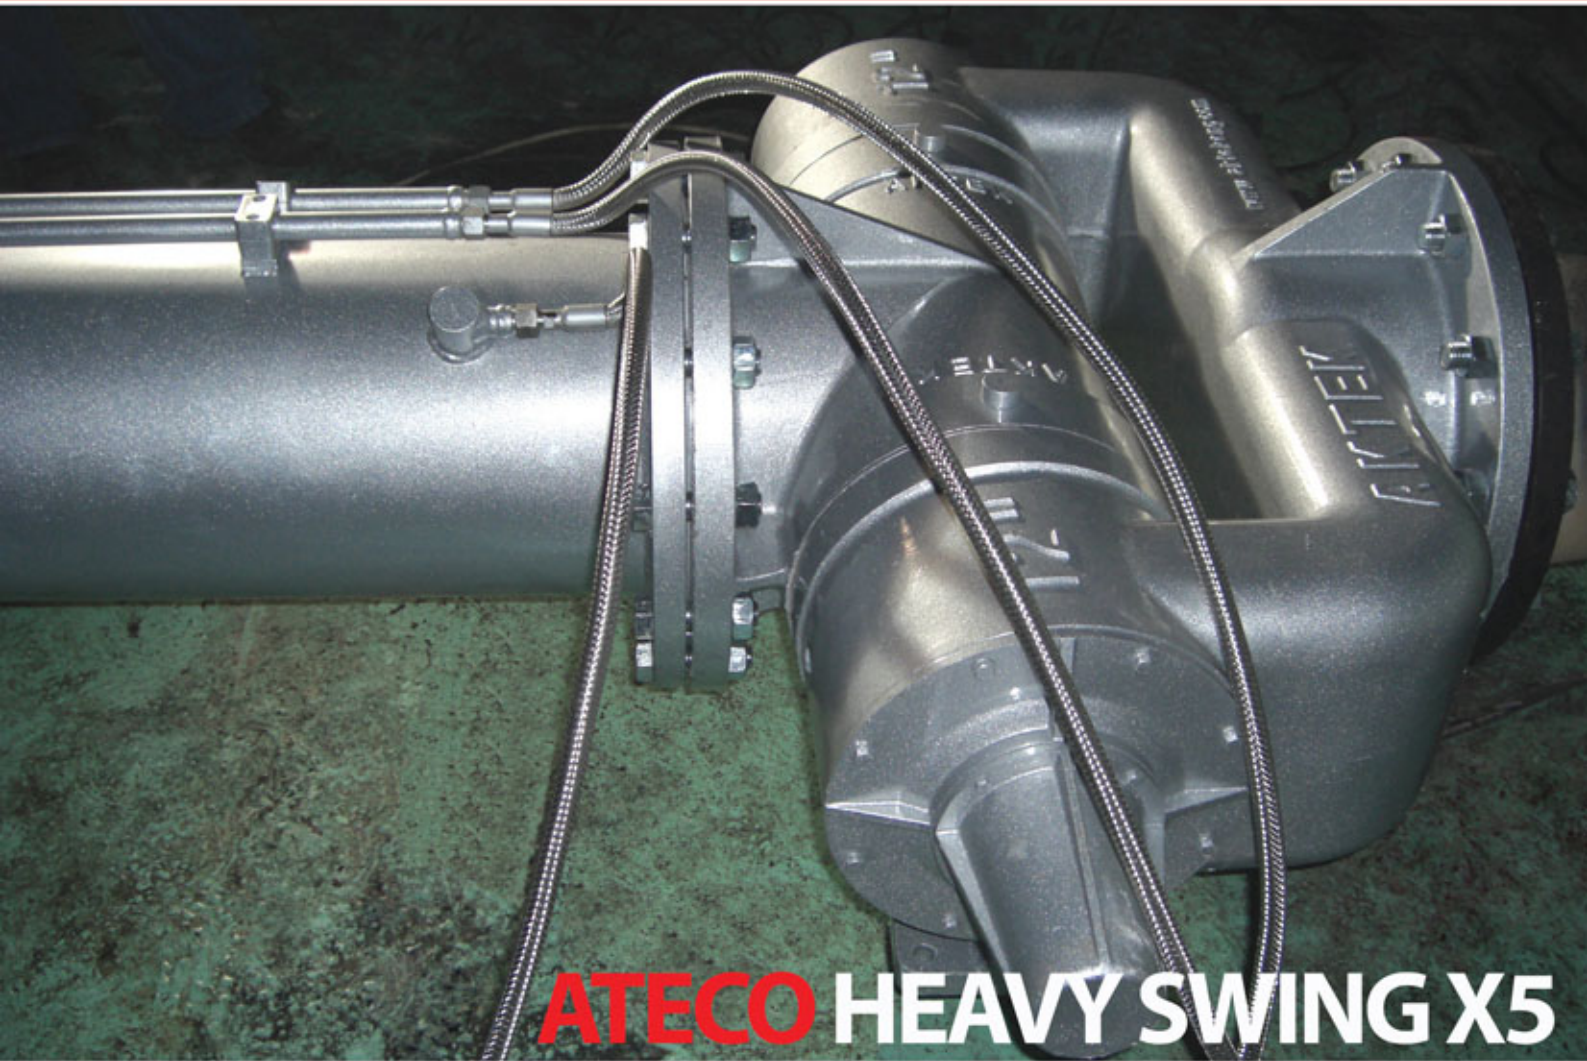

DOUBLE SEALS

- ATC-D100 Double Seals
- ATC-D200 Double Seals
- ATC-D300 Double Seals
- ATC-DSPC Special Double Seals

ATECO STORAGE TANK EQUIPMENTS DESIGN - ENGINEERING - PRODUCTION

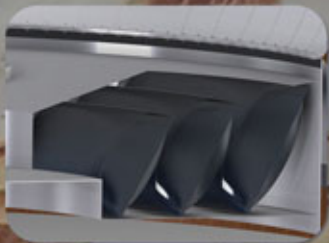

CENTRAL TYPE SWING JOINT FOR FLOATING SUCTION LINES

ATECO HEAVY SWING X5

This unit safeguards the quality of product drawn off from the tank and substantially reduces settling times. Although the ATECO SWING Series Floating Suction Unit was originally designed specifically for use in tanks storing aviation fuel where a water and sediment free product is essential, their application has gradually extended throughout other industries. Jet fuel quality is maintained by regular filtration and checks at all points and stages in its transfer to the airfield. The floating suction unit is one of a large number of safeguards to ensure fuel quality and safety in air transport. Not only is water contaminated fuel a hazard to jet engine operation, but its presence also promotes the growth of bacteria and fungi which in turn can contaminate and block filters, and cause the fuel to be hazy and out of specification.

EMISSION CONTROL SOLUTIONS

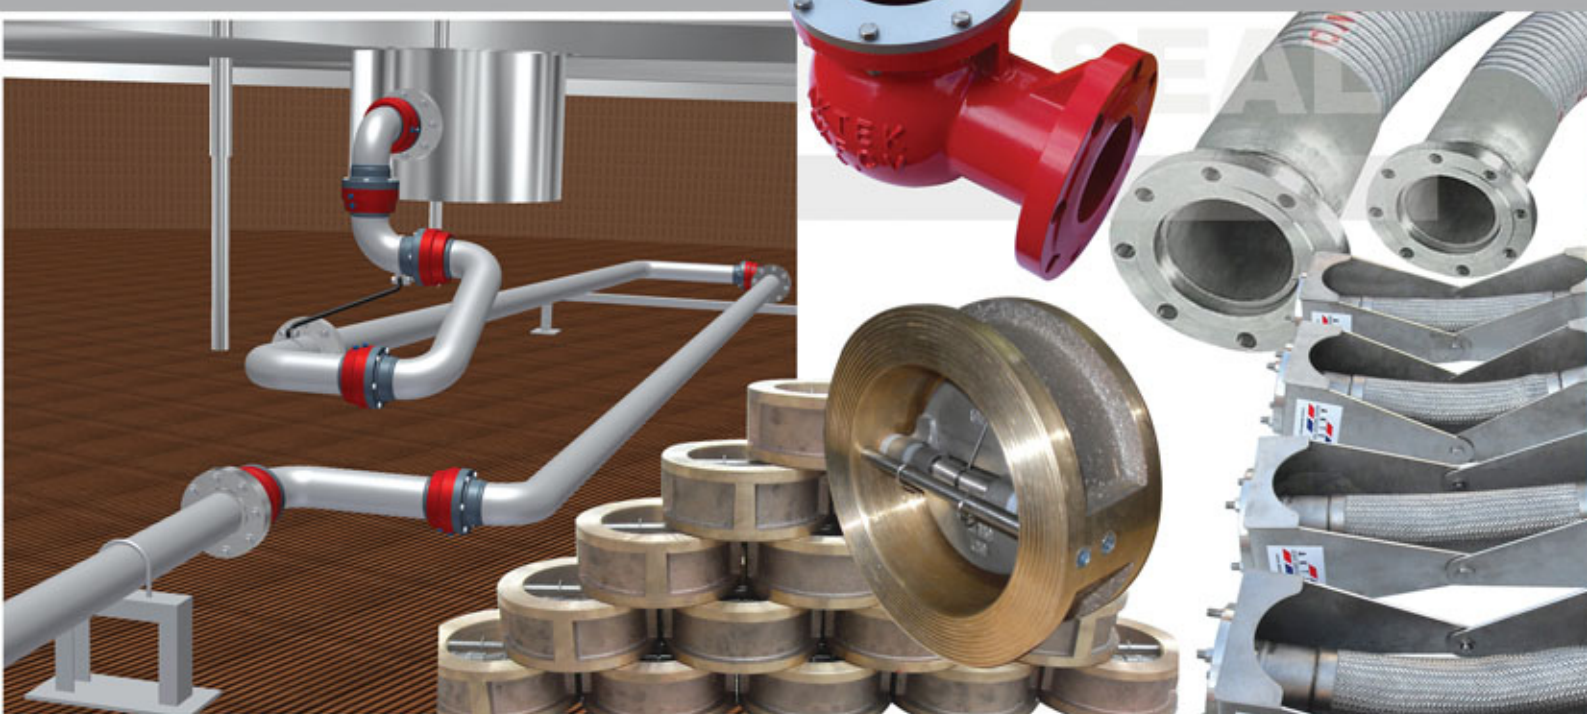

- Gauge Pole Cover
- Leg Sock / Leg Seal
- Gauge Pole Sleeve & Float
- Gauge Pole Retriever Device
- Gauge Pole Float Basin
- Pontoon Leaking Bladder
- Pontoon Temporary Repair Bladder
- Emergency Roof Drain Valve

ATECO STORAGE TANK EQUIPMENTS DESIGN - ENGINEERING - PRODUCTION
THE BEST SOLUTION SUITED TO YOUR EXTERNAL FLOATING ROOF DRAIN SYSTEMS

Bend Master Flexible Roof Drain Joint
Roof Drain Float Check Valve
Roof Drain Swing Wafer Check Valve
Roof Drain Dual Flap Wafer Check Valve
Flexible Roof Drain Hose
Swivel Joint Articulated Roof Drain System
Flexible Joint Articulated Roof Drain System

ROOF DRAIN SYSTEMS

ULTIMATE VAPOUR CONSERVATION

Technology-Engineering-Quality-Production-Services

VAPOUR CONSERVATION

ATECO TANK Ultimate Systems can provide you with a total service in Vapour Conservation

The skills and resources of the ATECO TANK are available for the full range of services from conceptual studies to turnkey contracts for your storage and handling terminal.

Changes in Point of Taxation and environmental protection etc.

Demand improves techniques.

Factor affecting your business...

- Custody Transfer
- High Labour Costs
- Conservation and Cost Save
- Environmental Protection
- Safety

We can help with...

- Internal Floating Roofs
- Geodesic Dome Roofs
- Floating Roof Seals and Secondary Seals, Double Seals
- Roof Drain Systems and Equipments
- Floating Roof Accessories (Vents, Hatches, Foam Dams, Ladders, etc.)
- Emission Control Solutions
- Floating Suction Systems

A world wide engineering and service to the petroleum-refinery and chemical industry
