INTRODUCTION

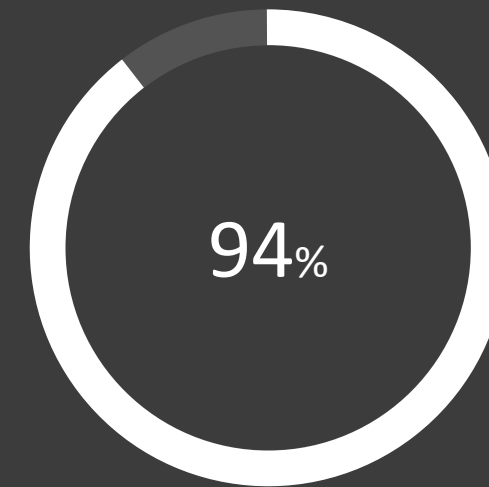

CV. Gulain Indonesia is a privately owned company with a broadly diversified customer base. Our dedicated production and quality control teams have tirelessly worked to deliver the best quality products expected by our customers.

Supported by 50 Skilled employees and more than 4000 farmers. Ultimately, it is our top priority to meet our customer's satisfaction and expectation.

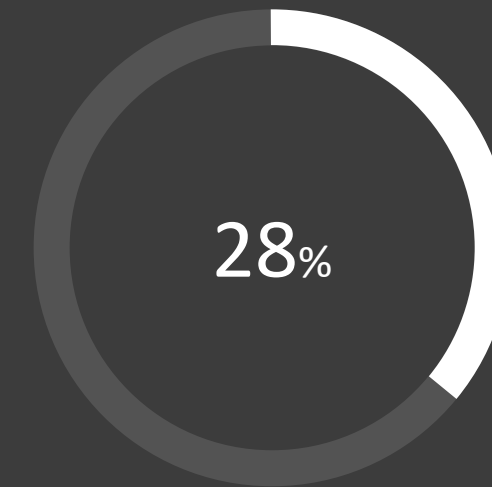

DOING BUSINESS WITH US

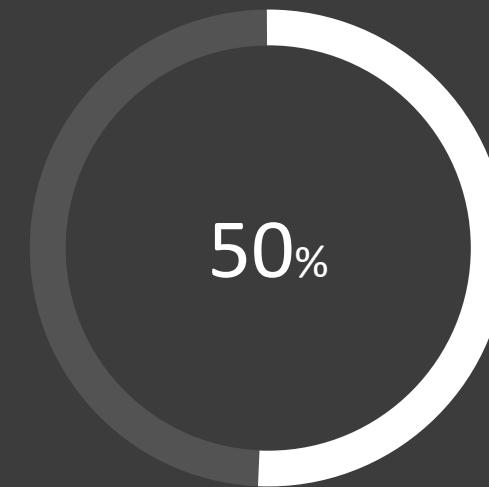

CV. Gulain Indonesia is very selective when choosing our suppliers and dealers. We must both totally support Universal Coco Indonesia core values: integrity, quality, commitment, and innovation. If this is the way you define your business and your work ethics, then you may benefit from a relationship with *Gulain Indonesia*.

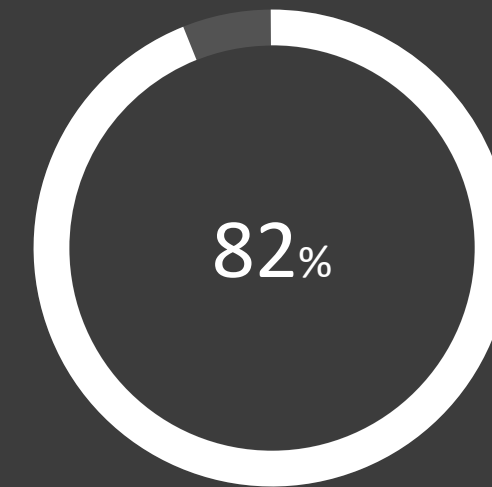

GLOBAL GOALS

INVESTMENT

CORPORATE

MARKETING

CORE VALUES

Our values and our commitments allow us to envision a lasting relationship with our customers. We like to share with you about your projects and your ambitions. Because each client is unique, we adapt to you and remain at your disposal throughout our collaboration.

INNOVATION

Innovation means inventing, designing, developing products and services that have high appeal in the marketplace and strengthen customer preference for the CV. Gulain Indonesia project.

INTEGRITY

Integrity means telling the truth, keeping our word and treating others with fairness and respect. Integrity is one of our most cherished assets. It must not be compromised.

QUALITY

Quality is exhibited in many ways by selling and supporting products and services that delight customers, establishing a work environment , delivering financial results that meet investor expectations..

COMMITMENT

Commitment is important where we will continue to provide the best to our customers and investors all the time

OUR 3 BIG BRAINS

Meet our awesome members

Abdurachman Dhiaulhaq

President director

Our faith is the substance of our future. There is no big success without big sacrifice.

Haidar Adila

Chief Operational Officer

People don't buy what you do, they buy why you do it. And what you do simply proves what you believe.

Sunu Purwanto

Chief Marketing Officer

Many of life's failures are people who did not realize how close they were to success when they gave up.

A photograph of two workers in a warehouse. They are wearing blue hairnets, face masks, and green aprons over light-colored shirts. They are handling large, brown, rectangular sacks stacked high. One worker is in the foreground, leaning over a stack of sacks, while the other is in the background, also working with the sacks. The warehouse has a concrete floor and a wall with a window and an insecticide dispenser.

OUR MISSION

Provide the best solutions, products, and services for our partners / colleagues and opportunities for our team to improve themselves in several aspects of their lives.

Produce added value to Indonesia's best commodities and deliver it to the global market

FROM ORGANIC FARMERS TO YOU.

We directly work with our organic farmers on daily basis to create the highest quality organic coconut sap and cane nectar.

We give our farmers continuous trainings in organic farming practices, from how to organically fertilize the coconut and cane until processing according to international organic standards.

This control of the supply chain means we can consistently maintain our high quality standard while reducing cost and increasing efficiency.

OUR SERVICES

Palm Plantation

We process more than 15.000 hectares of coconut palm and cane plantations, spread across Central to West Java Indonesia

We Provide Training to Farmers

Our company also continues to provide training for Coconut Farmers to get maximum results for their welfare.

Production Plan

We also have a processing plant for coconut palm and cane derivatives with the latest technology and accompanied by workers who are experts in their fields. We continue to produce International quality products.

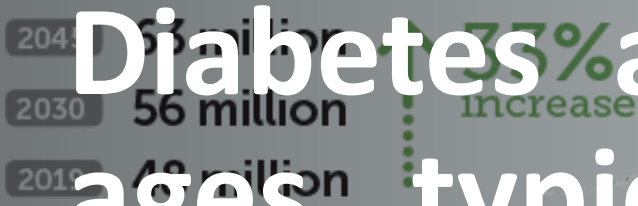

VISIT CV. GULAIN INDONESIA

Indonesia has 17,503 islands and we have several locations that you can visit, from plantations to factories that produce finished products. We own a plantation on the western and central of Java, Indonesia and have a production plant at Bandung and Banyumas. And your visitation to this company will be unforgettable. GULAIN has developed a strategy to grow and sustain its successful global business. We take advantage of opportunities where the resources we work on are huge in Indonesia. We believe GULAIN has a very good position to take advantage of these things Commitment is the value of our company. And we see that the establishment of this company is not just the profit we seek, but we know that there is a reason why this company should stand. Many people have the hope of having a good life, and we are here for them. We want to be a blessing to those in need.

Number of adults (20–79 years) with diabetes worldwide

by 2045 there are an estimated 700 million people affected by diabetes in the world. that means there has been an increase of nearly 51% since 2019 from 463 million. It means 1 in 6 live births are affected by

Coconut Sugar and Diabetes: Is It Safe?

Coconut sugar's average GI rating differs from source to source. Regular table sugar has an average rating of 58, while coconut sugar's GI is reported as low as 35 and as high as 54.

A food's GI rating is a measure of how much that food may raise your body's glucose, or blood sugar. Coconut sugar has a slightly lower GI rating on most scales. On average, anything below 55 is considered low.

Regular table sugar typically falls in the middle range. The middle range generally covers ratings from 56 to 69. Anything with a rating above 70 is usually considered to have a high GI.

OUR PRODUCT PRINCIPLES

Organic Commitment

Fundamental to our values is organic commitment where we pledge to ensure that our products are organic, without any additives or chemicals whatsoever.

Sustainability

CV. Gulain Indonesia works in a way which is always sustainable to the environment, with no trees felled or harm done to the soil. This is critical given that there would be generations depending on the sustenance of our natural resources

Sugar with Low-Glycemic Index

Our Sugar is made from the sap of the Arenga tree or Coconut Tree. The sap collected by cutting the tree and stored in the containers. Then, the sap is boiled to reduce the water content and create sugar paste. Then, the paste is transferred to the mold and allowed it to dry.

Organic Granulated Coconut Sugar

Coconut sugar is also called coconut palm sugar. It is a natural sugar made from coconut palm sap, which is the sugary circulating fluid of the coconut plant. It is often confused with palm sugar, which is similar but made from a different type of palm tree.

Spec :

- Unrefined Process
- Granulated Form Mesh 16
- Moisture Content : 1,52%
- Total Ash : 2,48 %
- Total Sugar : 98,51 %
- Shelf Life 2 Years
- Packaging : Retail, Bulk (or) As per buyers' requirement
- Production Capacity : 200 MT / Month

Organic Coconut Palm Jaggery Sugar Chunks

Palm Jaggery or Palm Sugar is believed to be one of the healthy sugar substitutes that is available in the market today. Unlike sugar, it is Unrefined and unbleached retaining all its nutrients. It has a smoky flavor and a rich aroma.

Healthiest Cane Sugar You Can Get On The Market

We did research to reduce the glycemic index of crystal sugar, which was originally high, to below 55. We also tested the test results of low-glycemic low-index sugar production in the food laboratory at Faculty of Agricultural Engineering and Technology, IPB University and successfully tested our crystal sugar production to represent the low glycemic index

LOW-GI ORGANIC BROWN CANE SUGAR

Organic cane sugar is unrefined sugar minus the cancer-causing and environmentally damaging pesticides present in conventionally-grown sugarcane. Compared to white sugar, organic cane sugar has the full-bodied taste of sugarcane and is much less processed, retaining a lot of the nutrients present in cane juice. Unrefined cane sugar contains 17 amino acids, 11 minerals and 6 vitamins, including antioxidants, that may help reverse oxidative damage. It is made up of sucrose, fructose and glucose.

Spec :

- Crystal Form
- Unrefined
- Moisture content <2%
- Shelf life 2 years
- IU 500
- Certified of LOW-GI 55
- Packing : As per buyers' requirement
- Port Of Loading : Tanjung Emas, Semarang
- Production Capacity : 200 MT / Month

ORGANIC INVERTED LIQUID CANE SUGAR

Organic Liquid Cane Sugar is a premium, pure-cane solution, developed to provide an easy-to-handle alternative to granulated sugars. Every batch is carefully produced with the finest sugar to provide consistent flavor. Upon special request, we have the ability to make organic liquid sucrose at less than 100 ICSUMA.

Spec :

- | | |

| - MOQ | : 24 000 L (FCL 20ft), LCL Possible |
| - Packaging | : Flexitank Only |
| - Production Capacity | : 10.000 MT / Month |

Sugar Cane Molasses

What Is Molasses?

During the sugar-making process, juice extracted from sugarcane is boiled down until the sugars crystallize and precipitate out.

The syrup left over after crystallization is referred to as molasses. Typically, sugar cane juice undergoes cycles of boiling and crystallization to extract as much sugar as possible. With each successive cycle, the leftover molasses contains less sugar.

Molasses can vary in color, sweetness, and nutritional content depending on the variety or how much sugar has been extracted.

- **Spec :**

- Brix : 83%
- Moisture : 20%
- TSI : 59,37%
- pH : 5,21
- Purity : 28,25 %
- Polarization : 23%
- Production Capacity : 10.000 MT / Month
- Packaging : Bulk Vessel, Flexitank
- MOQ : 100 MT

Coconut Fiber / Coir Fiber

- Coir, or coconut fiber, is a natural fiber extracted from the outer husk of coconut and used in products such as floor mats, doormats, brushes and mattresses. Coir is the fibrous material found between the hard, internal shell and the outer coat of a coconut. The coir fiber is relatively water-proof and is one of few natural fibers resistant to damage by salt water.

- **Spec :**

- Color : Light Brown – Golden Brown
- Moisture Content : Max 18%
- Impurity Content : 3%
- Length of coconut fiber : 5-25 cm (5-15 cm Max 20%, 10-25cm Min 60%)
- Packaging : 90-120 kg / Bale
- Dimension : 40 x 70 x 110
- Container : 40ft HC (18,5 MT)
- MOQ : 40ft HC (18,5 MT)
- Production Capacity : 36 MT / Month

OUR STRATEGY FOR SUCCESS

We have a strategy for success, namely by developing a network of farmers throughout the palm plantations that we manage. And we ensure readiness in our processing plants, to be able to produce the best products with international quality. At present our company has partnerships with more than 4000 palm farmers in the western Indonesian region, and the plantation land that we manage is more than 15,000 hectares, and supply of Coconut Palm Sap up to 500 litre per day.

We also help regional economies to develop and provide welfare for existing farmers. Our company also continues to collaborate with several other companies abroad to help distribute goods to be much better. At present our company has cooperated with more than 8 companies in 5 countries.
