Our dedicated production and quality control teams have tirelessly worked to deliver the best quality products expected by our customers . Supported by 50 Skilled employees and more than 4000 farmers . Ultimately, it is our top priority to meet our customer's satisfaction and expectation .

OUR CATEGORIES

Granulated Sugar

Jaggery Chunks

Liquid / Invert Sugar

PRODUCT LIST

Our sugar is made from the sap of the coconut tree and Cane. The sap collected by cutting the tree and stored in the containers. Then, the sap is boiled to reduce the water content and create sugar paste. Then, the paste is transferred to the mold and allowed it to dry.

Granulated Coconut Palm Sugar

Form : Granular mesh 16

Color : Light Brown

Purity : 100% Coconut Sap

Low-GI Organic Brown Cane Sugar

Form : Crystal form

Color : Light Brown (IU 1200)

Purity : 100% Organic Cane

Coconut Palm Jaggery Sugar Chunks

Form : Solid Cylinder Block

Color : Dark Brown

Purity : 100% Coconut palm Sap

Organic Inverted Liquid Cane Sugar

Form : Liquid form

Color : White (IU 80)

Purity : 100% Organic Cane

Organic Liquid Coconut Palm Sugar

Form : Liquid form

Color : Dark brown to light

Purity : 100% Coconut Palm Sap

Granulated Coconut Palm Sugar

Coconut sugar is made in a natural 2-step process: A cut is made on the flower of the coconut palm and the liquid sap is collected into containers. The sap is placed under heat until most of the water has evaporated.

The end product is brown and granulated. Its color is similar to that of raw sugar, but the particle size is typically smaller or more variable.

PRODUCT DESCRIPTION

Form :	Granular form (Mesh 16)
Color :	Organic Brown
Purity :	100 % Coconut Sap
Moisture :	1,52 %
Total Sugar :	98,51 %
Total Ash :	2,48 %
Shelf life :	2 Years
Packaging :	Retail, Bulk (or) As per buyers' requirement
Production :	200 MT / Month

Start from
US\$ 2450 / MT

FOB/CNF/CIF

Shelf Life :	12 Months
Production :	75 MT / Month
MOQ :	20ft (18 MT) (or) LCL Possible
Packaging :	Retail, Bulk (or) As per buyers' requirement
Process :	Unrefined

Start from
US\$ 1800 / MT

FOB/CNF/CIF

Organic Coconut Palm Sugar Liquid

A Wholesome Sweetener which is harvested from Coconut Sap. Coconut Sugar & Coconut Nectar is a healthier and wholesome alternative to refined sugar or artificial sweeteners, masked with a deliciously sweet caramel taste.

PRODUCT DESCRIPTION

Form :	Liquid Form
Color :	Dark Brown
Purity :	100 % Coconut Sap
Brix :	.>70
Shelf Life :	12 Months
Production :	75 MT / Month
MOQ :	10 MT
Packaging :	Drum, Bottle, Jerry can (or) As per buyers' requirement
Weight :	1,4 kg / Ltr

Start from
US\$ 3000 / MT

FOB/CNF/CIF

Organic Brown Sugar Cane

Compared to white sugar, organic cane sugar has the full-bodied taste of sugarcane and is much less processed, retaining a lot of the nutrients present in cane juice.

Unrefined cane sugar contains 17 amino acids, 11 minerals and 6 vitamins, including antioxidants, that may help reverse oxidative damage. It is made up of sucrose, fructose and glucose.

PRODUCT DESCRIPTION

Form :	Crystal Form
Color :	Light brown (IU 500)
Purity :	100 % Organic Cane
Moisture :	Max 2 %
Shelf Life :	2 years
Production :	200 MT / Month
MOQ :	20ft (19,75 MT) (or) LCL Possible
Packaging :	Retail, Bulk (or) As per buyers' requirement
Process :	Unrefined

Start from
US\$ 5600 / MT

FOB/CNF/CIF

Organic Inverted Liquid Cane Sugar

Organic Liquid Cane Sugar is a premium, pure-cane solution, developed to provide an easy-to-handle alternative to granulated sugars. PRODUCT DESCRIPTION

Form :	Liquid Form
Color :	Color (IU 80)
Purity :	100 % Cane Sugar
Ash :	0,03 %
Brix :	67-85
Weight :	1,3 kg / ltr
pH :	6,20
MOQ :	Flexitank 24 000 L (FCL 20ft), LCL Possible
Packaging :	Retail, Bulk (or) As buyer's Requirement

Start from
US\$ 2200 / MT

FOB/CNF/CIF

Sugar Cane Molasses

What Is Molasses? During the sugar-making process, juice extracted from sugarcane is boiled down until the sugars crystallize and precipitate out. The syrup left over after crystallization is referred to as molasses. Typically, sugar cane juice undergoes three cycles of boiling and crystallization to extract as much sugar as possible. With each successive cycle, the leftover molasses contains less sugar. Molasses can vary in color, sweetness, and nutritional content depending on the variety or how much sugar has been extracted

PRODUCT DESCRIPTION

Form :	Liquid Form
Moisture :	20,91%
Purity :	28,25%
Ash :	7,38 %
Brix :	83,54 %
TSAI :	59,37%
pH :	5,2
MOQ :	100 MT
Production Capacity :	10. 000 MT / Month

Start from
US\$ 250 / MT

Coconut Fiber / Coir Fiber

Coir, or coconut fiber, is a natural fiber extracted from the outer husk of coconut and used in products such as floor mats, doormats, brushes and mattresses. Coir is the fibrous material found between the hard, internal shell and the outer coat of a coconut. The coir fiber is relatively water-proof and is one of few natural fibers resistant to damage by salt water.

PRODUCT DESCRIPTION

Color : Light Brown – Golden Brown

Moisture : Max 18%

Impurity : 3%

Lenght : Length of coconut fiber : 5-25 cm (5-15 cm Max 20%, 10-25cm Min 60%)

Packaging : 90 – 120 kg / Bale

Dimension : 40 x 70 x 110

Container : 40ft HC (18,5 MT)

MOQ : 40ft HC (18,5 MT)

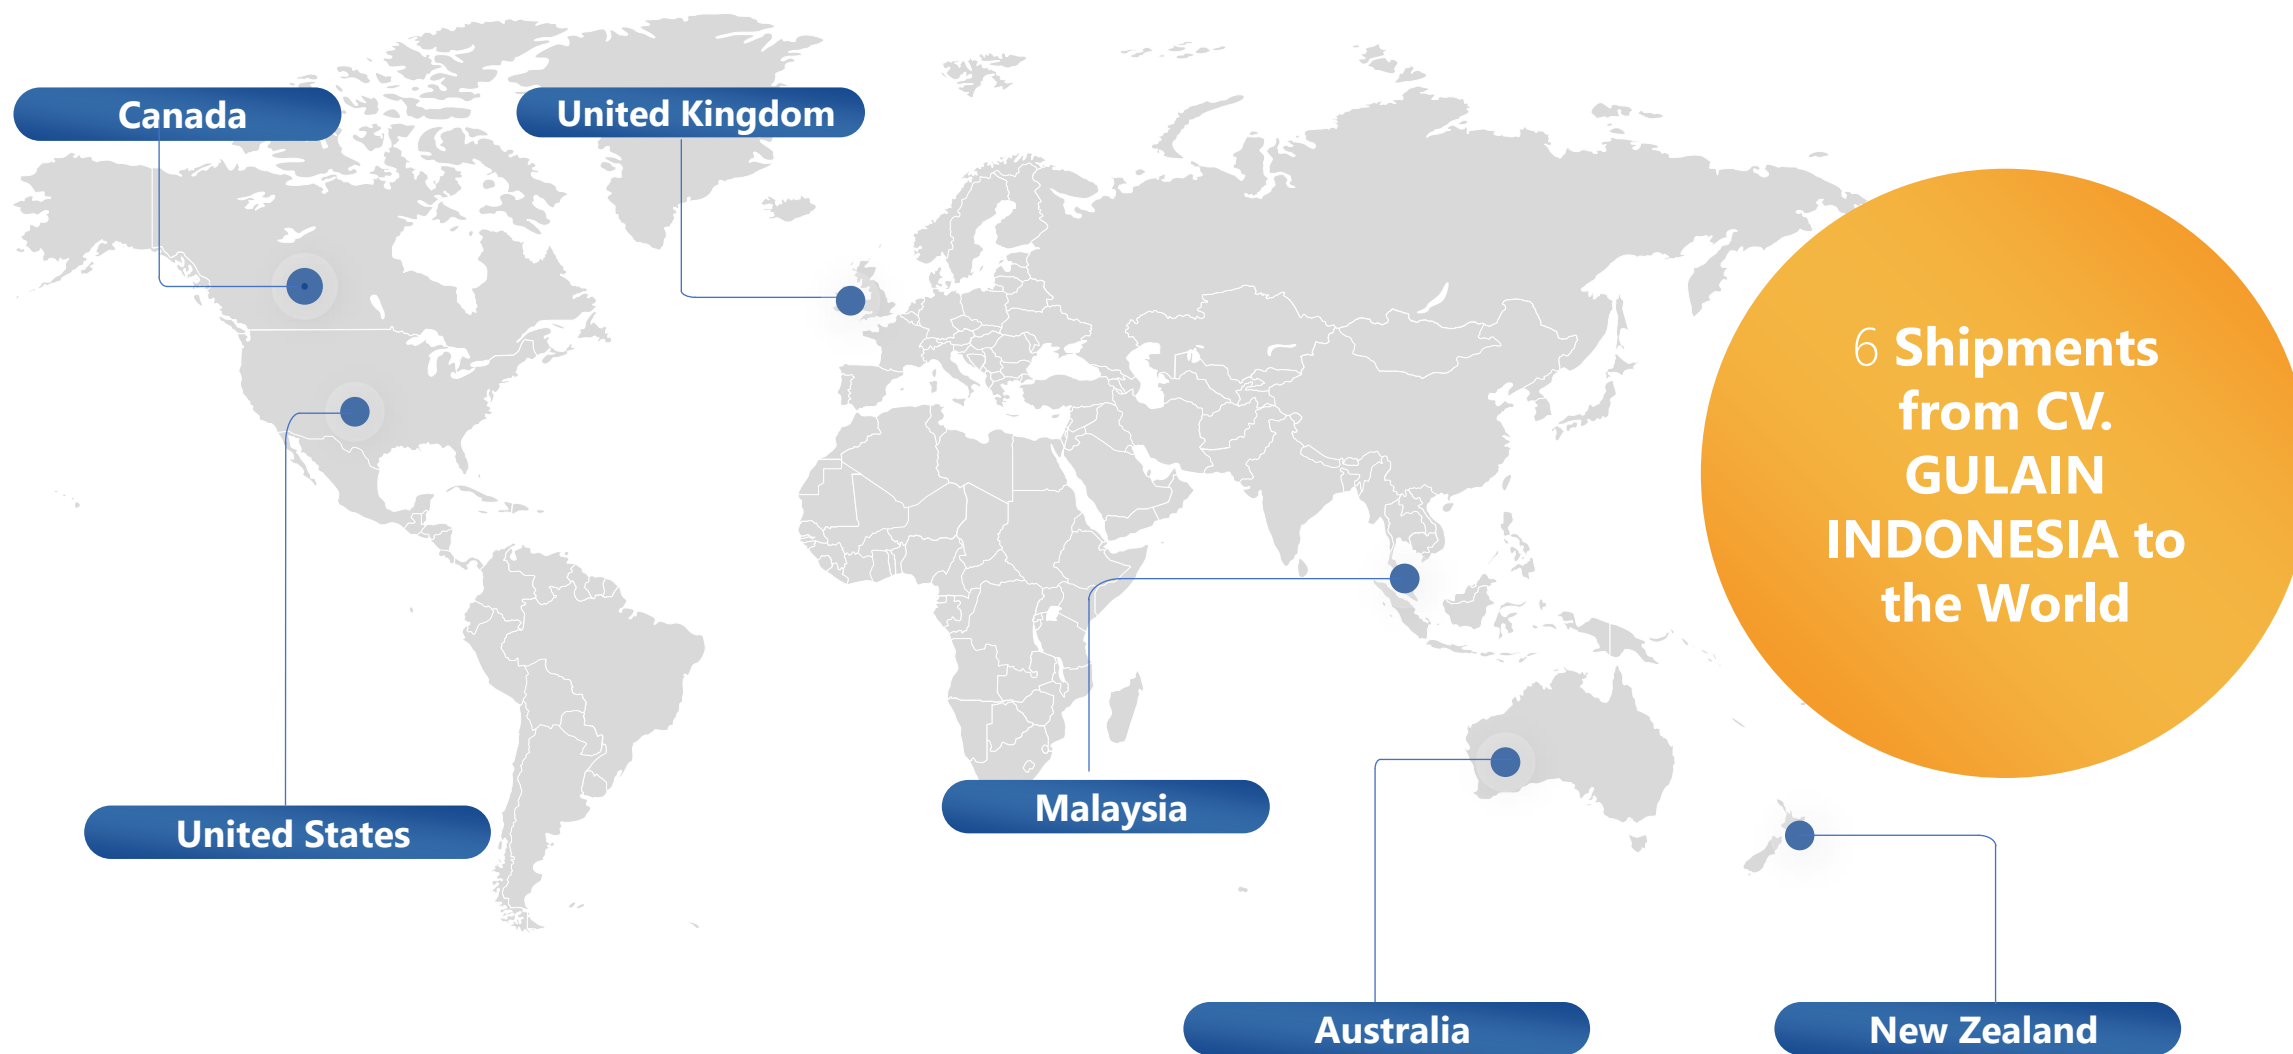

Production Capacity : 36 MT / Month

Start from
US\$ 420 / MT
