

MEXICAN HONEY

Mexico has a diversity of ecosystems with a rich flora where 2 million beehives produce 57,000 tons per year of different types of honey, the eighth largest honey producer in the world.

The Production peaks of honey are in March - April and November - December.

HONEY ORIGIN

We only process **pure 100% natural honey** that we originate throughout **Mexico** from producers and small producer associations. The majority of them are located in the states of Yucatán, Quintana Roo, Campeche, Veracruz, Chiapas, Oaxaca, Puebla, Estado de México, Jalisco y Nayarit.

¡ From **MEXICO** to the world !

MEXICAN HONEY TYPES

BOTTLING HONEY

“ Like the bees, our team works together because we care for your business”

CPdeJ.

Our manufacturing process, strictly innocuous and hygienic, starts with the reception of raw honey which is tempered, **strained** and homogenized to deliver a final product packaged in all variety of containers, from 4 oz. to IBC'S (totes). We can easily adjust our process to our client's needs.

We are registered with the **FDA** as a foreign facility processing plant and we are in the process to obtain the **FSSC22000 – GFSI** certification.

***We believe that your business is our business
and are committed to your success.***

* Tacuave is our registered label
