PASSION FRUIT

The mango is a pulpy and juicy fruit that is very rich in magnesium and provitamins A and C. Likewise, it has high concentrations of carbohydrates, which makes it have a high caloric value. The proportions of nutrients in mangoes can vary depending on the type and quantity of fruit.

LULO

A logo consisting of the word "LULO" in a bold, dark brown, sans-serif font. The letters are underlined with a thick horizontal line. Below the line is a small, dark brown graphic element resembling a stylized diamond or a cluster of small squares.

The pulp of lulo is normally greenish and has an acid taste, when it is ripe it can be processed with its shell, which increases the level of benefits for the body by taking advantage of the minerals and the work contained in its external part.

BANANA

The pulp of lulo is normally greenish and has an acid taste, when it is ripe it can be processed with its shell, which increases the level of benefits for the body by taking advantage of the minerals and the work contained in its external part.

PLATANO PLANTAIN

The pulp of lulo is normally greenish and has an acid taste, when it is ripe it can be processed with its shell, which increases the level of benefits for the body by taking advantage of the minerals and the work contained in its external part.

AVOCADO

It is true that avocados provide a considerable amount of fat, the remarkable thing is that these fats are healthy fats and a good monounsaturated fat. power source and adds flavor to virtually any dish and contains large amounts of vitamins.

TAHITÍ LEMON

Persian lime (*Citrus × latifolia*), also known by other common names such as seedless lime, Bearss lime and Tahiti lime, is a citrus fruit species of hybrid origin, known only in cultivation. The Persian lime is a triploid cross between key lime (*Citrus × aurantiifolia*) and lemon (*Citrus limon*). Although there are other citrus species that are referred to as "limes", the Persian lime is the most widely cultivated lime species commercially, and accounts for the largest share of the fruits sold as limes. The fruit turns yellow as it ripens, but it is often sold while still green.

KIWI

CHINESE GOOSEBERRY

The fruit has a slightly acid taste and can be eaten raw or cooked. The juice is sometimes used as a meat tenderizer. Raw kiwis are high in vitamins C and K.

The kiwi fruit is a berry and has furry brownish green skin. The firm translucent green flesh has numerous edible purple-black seeds embedded around a white centre.

YUCA

SOURCE The producing country par excellence is Thailand, followed by Brazil and the countries Africans. The main entrances to Europe are made from Costa Rica. **APPEARANCE** Its skin is brown and its pulp is white. Its shape is elongated, finished in tip. It can reach 10 kilos in weight. **VARIETIES** Among the various varieties we highlight the Valencia

COFFEE

Coffee is a brewed drink prepared from roasted coffee beans, the seeds of berries from certain *Coffea* species. Dried coffee seeds (referred to as "beans") are roasted to varying degrees, depending on the desired flavor. Roasted beans are ground and then brewed with near-boiling water to produce the beverage known as coffee. Coffee is darkly colored, bitter, slightly acidic and has a stimulating effect in humans, primarily due to its caffeine content. It is usually served hot, although iced coffee is a popular alternative.

CACAO

COCOA

Cacao, (*Theobroma cacao*), also called cocoa, tropical evergreen tree (family Malvaceae) grown for its edible seeds, whose scientific name means “food of the gods” in Greek. Native to lowland rainforests of the Amazon and Orinoco river basins, cacao is grown commercially in the New World tropics as well as western Africa and tropical Asia. Its seeds, called cocoa beans, are processed into cocoa powder, cocoa butter, and chocolate.

TOMATE DE ARBOL

ARBOL TREE TOMATO

The plant is a small, half-woody, attractive, fast-growing, brittle tree; shallow-rooted ; reaching 10 to 18 ft (3-5.5 m) in height; While the skin is somewhat tough and unpleasant in flavor, the outer layer of flesh is slightly firm, succulent and bland, and the pulp surrounding the seeds in the two lengthwise compartments is soft, juicy, subacid to sweet; The fruit has a slightly resinous aroma and the flavor suggests a mild or underripe tomato with a faintly resinous aftertaste.

JENGIBRE GINGER

Ginger, *Zingiber officinale*, is an erect, herbaceous perennial plant in the family Zingiberaceae grown for its edible rhizome (underground stem) which is widely used as a spice. The rhizome is brown, with a corky outer layer and pale-yellow scented center. The above ground shoot is erect and reed-like with linear leaves that are arranged alternately on the stem. Ginger is stimulant, carminative and diaphoretic. It is used in cold and cough and as a febrifuge. It is used to flavour food stuff, beer and other drinks. It is used as a condiment in curries.

MANGOSTINO

MANGOSTEEN

It is a fruit from Indonesia, whose cultivation takes place only in Southeast Asia. The demand attributed to it in recent years has grown significantly, both in Europe and America, as it is one of the most appreciated and prized exotic fruits thanks to the medicinal properties it provides and its exquisite flavor.

BRÓCOLI

BROCCOLI

Broccoli is an edible green plant in the cabbage family (family Brassicaceae, genus Brassica) whose large flowering head and stalk is eaten as a vegetable. The word broccoli comes from the Italian plural of broccolo, which means "the flowering crest of a cabbage", and is the diminutive form of brocco, meaning "small nail" or "sprout".

ACHOTILLO RAMBUTAN

The rambutan (*Nephelium lappaceum*) is a medium- sized tropical tree in the Sapindaceae family. The name also refers to the edible fruit produced by this tree. The rambutan is native to the Indonesian archipelago and other regions of tropical Southeast Asia. It is closely related to several other edible tropical fruits, such as lychee, longan, pulasan and mamoncillo.

NARANJA

ORANGE

Orange is a citrus fruit obtained from sweet orange (*Citrus × sinensis*), bitter orange (*Citrus × aurantium*) and orange from other varieties or hybrids, of Asian origin. It is a fleshy hesperidium of a more or less thick and hard shell, and its pulp is composed of once segments or skins full of juice, which contains a lot of vitamin C, flavonoids and essential oils.

SOURCE FRUIT AND SOURCE POTS

SOURCE SPOT IN 100% NATURAL SNAK

Does not need refrigeration lasts 6 months without refrigeration. No preservatives, no condiments. State-of-the-art packaging system that makes the speck 100% fresh and lasts 6 months in its fresh fruit state.

OUR PRODUCT The soursop speck in snack is a product that is developed to overcome the limitations in the commercialization of this fruit at an international level, such as its size, its short shelf life and its need to stay in the cold chain in its transport and storage.
