

OUR SERVICES

Through our Nearshore & Staff Augmentation model, we connect U.S. companies with top-tier IT talent across Latin America. This approach provides access to a highly skilled and fast-growing tech talent pool at rates significantly lower than traditional U.S. hiring or staffing models.

This solution, focuses on leveraging a series of factors that consolidate our value proposition into the following:

- ◆ **Cost efficiency:** 20% – 30% cost cut allowing companies scale without compromising standards.
- ◆ **Shared time zones for real-time collaboration:** Geographic proximity allows stronger oversight and faster iteration.
- ◆ **Cultural, Tech & Language alignment:** Ensures quality and reduces miscommunication.

- ◆ **Lower regulatory and operational risks:** creating a more sustainable model.
- ◆ **Service Delivery Office (SDO):** Included at no extra cost, ensuring standardized methodologies, consistent service quality, and client alignment.
- ◆ **Tax benefits:** Services are exempt from taxes as they are structured as cross-border exports from Latin America.

This is what makes nearshore staffing not just a quick fix, but a strategic level for scalability, innovation, and long-term growth.
