Chinese, Norwegian, Arabs and Spaniards have the technique inserted at the core of their culture, with braiding techniques dating back to even the beginning of human modernity.

The crochet embroidery has gained many supporters in times of a pandemic, given the need to supplement income, in view of the closure of trade, and even for a recreational activity, of distraction.

Set of 4 Amigurumi Crochet Bunny Ears Napkin Rings

Among the main techniques and productions of the so-called "crocheteiras in Brazil" is the amigurumi, but, after all, what is it with such a complicated name?

The word amigurumi is of Japanese origin and is composed by the junction of two words amimono, which means crochet, and nuigurumi, stuffed toy. Therefore, amigurumi is equivalent to "stuffed toy made of crochet".

It's an ancient technique, which has enormous symbolism in Japanese culture, since being handmade, it carries the energy of the person who put such feeling and effort into this function.

Thus, attracting prosperity and good luck to whoever receives it. In this way, being a priceless gift to receive for any situation.

Consequently, gaining more and more space in contemporary culture in order to become a worldwide trend.

Amigurumi was not restricted to ancient times. Revitalized in the 1980s, mainly by well-known brands such as Hello Kitty, whose character was represented in various crocheted models.

With the undeniable popularity, other models and implementations began to emerge.
