Company Overview

AB Industries International Limited Liability Company is a U.S.-registered company specializing in industrial supply, international procurement, import and export of equipment, materials and solutions for the Oil & Gas, Energy, Mining, Infrastructure and Construction sectors.

Our sourcing capabilities connect qualified manufacturers and distributors in the United States and Brazil with project requirements in Latin America. Commercial and operational support in Venezuela strengthens our ability to coordinate local supply, logistics and project execution when required.

AB Industries operates through a lean, asset-light model. We do not position ourselves as the manufacturer of every item we offer; instead, we identify qualified sources, coordinate technical and commercial requirements, and develop competitive supply solutions according to each client's specifications.

Services

Strategic sourcing & procurement - Identification and coordination of qualified manufacturers and distributors in the United States and Brazil.

International supply & logistics support - Commercial coordination from source identification through delivery planning.

Supplier development - Development of alternative supply sources and competitive procurement options for project requirements.

Local & regional project support - Commercial and operational coordination in Venezuela and Brazil through the applicable AB Industries entity and qualified partners.

Industrial field support - Project-specific support services developed according to scope, local requirements and available qualified resources.

Markets We Serve

Oil & Gas	Energy	Mining
Infrastructure	Industrial Operations	Construction

Partnership Focus

AB Industries is interested in long-term relationships with operators, EPC contractors, engineering companies, industrial buyers, manufacturers, distributors and strategic partners seeking reliable sourcing and regional support across the Americas.

Our cross-border structure is particularly suited to projects that require access to U.S. and Brazilian supply chains combined with commercial and operational support in Venezuela and other Latin American markets.
