ABOUT US?

History of the company

AIG SAS CI was founded in 2017 in Colombia, with the objective of offering high-quality construction and civil works services. Since its inception, the company has grown significantly, expanding its service portfolio and its presence in the market. Initially, AIG SAS CI focused on road infrastructure projects, but quickly expanded its operations into the construction sector. Over the years, the company has completed numerous emblematic projects, consolidating itself in the construction sector in Colombia.

With a clear vision, a commitment to excellence and quality, our purpose is to contribute to the development of our clients, innovating with the principle of sustainability to generate better quality, price and durability of our services and materials that we offer, within a framework of values, responsibility and commitment to society.

MISSION

To be a reliable solution when supporting and developing construction works for national and international markets, meeting high standards of quality, technology and corporate values, as well as business and environmental responsibility.
