# QUALITY, SAFETY AND COMPLIANCE

## Market

Our dynamic production model allows us to process products according to their consumer.

## We know the industry

Thanks to our experience, we recognize and adapt strategies that contribute to the assembly and manufacture of your ideal products to have a greater impact on durability, quality, marketing and sales.

## Products abroad

Our formulas, quality of processes and seasoning, comply with phytosanitary regulations, regulations and standards according to each place of destination.

## WE DEVELOP THEIR PRODUCTS

- **Flavor engineering**

We manufacture samples for new and potential products according to the needs of our clients.

- **Food lab**

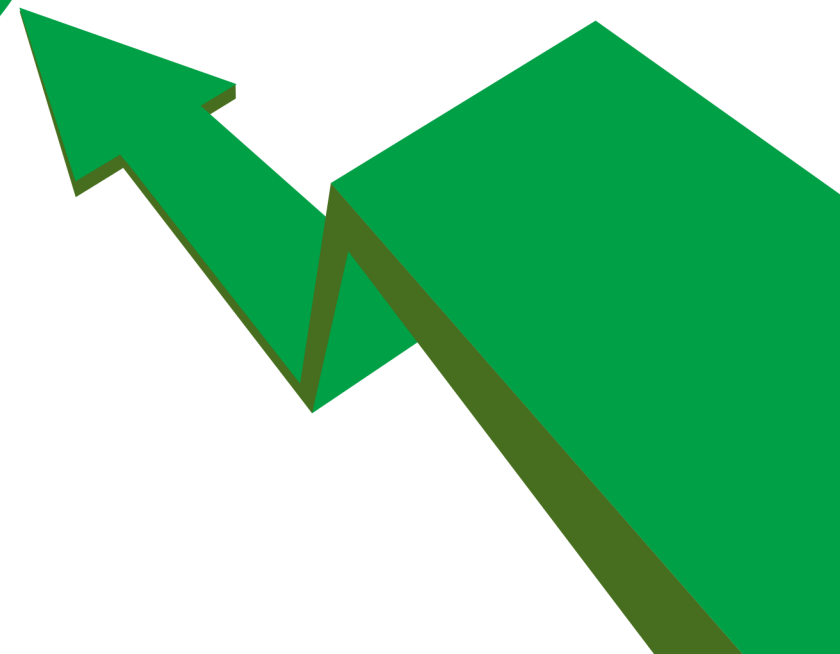

Our team is trained to develop complex flavor formulations applicable to new products.

- **Quality and responsibility**

All products to be processed are governed by high criteria and rigorous processes that verify their suitability for human consumption.

- **Agro-sustainable production**

Our business purpose is aligned with respect for nature, care for the environment, social development, fair treatment and good agricultural practices (GAP) and manufacturing (BPM) for sustainable development.

## CERTIFICATES AND STANDARDS IN QUALITY

The products have ISO 22000 and HACCP certificates, managing to implement the two quality systems in the processes of management, development and preparation of food products; and some other standards according to each product and requirement such as:

## 01. Trout salad

Trout is a fish rich in selenium, phosphorus, potassium or magnesium and B vitamins, essential for our body to carry out its functions normally, as well as to strengthen muscles and bones.

## 02. Tuna salad

Its meat has 3.3% fat, which makes it a fatty fish, but it is a fat rich in omega-3 fatty acids, which helps lower cholesterol and triglyceride levels in the blood.

## Pulp of **Fruit Natural**

- Contains vitamins A, C, E, B2, B5, B6, B9 and K among many others, which improve the body's processes for a healthy diet
- It has various other elements like iron, iodine, copper phosphorus and many more.
- Its cleansing properties help to cleanse the blood and also improves the immune system.
- They help save time, since the pulps do not have to be peeled or filtered to prepare a juice, smoothie or natural juice.
- Long life products

NATURAL FRUIT

LOW IN SUGAR

WITHOUT PRESERVATIVES

## Flavors Available
