3. Ordering samples
4. Credit assessment of all project suppliers
5. Factory inspection and personal meeting orienting on demand
6. Price negotiation and payment terms
7. Definition of financial hedge mechanisms
8. Monitoring of production
9. Product inspection and shipping
10. All commercial, logistical, foreign exchange, customs, and tax support

Introducing **AKHI Foreign Trade**, an export company:

Our mission is to maximize the profitability of our partners through the sales force, structured purchases, customized logistics, and expertise in international negotiations.

Our vision is to be a reference for a long-term partnership for companies seeking opportunities in new markets.

And our values are dedication, agility, transparency, and ethics. AKHI works only with good Brazilian manufacturers, implementing best manufacturing practices and continuous quality improvement to help turn them into great suppliers capable of meeting international customer demands while providing globally competitive pricing.

CAJUÍNA

Cajuína is composed of 100% of cashew juice, while an industrialized juice has about 30% of this pseudofruit and in a soda, less than 4%.

It is in this context, that this typical drink becomes a healthy product, with vitamin C and A in its composition, improving the immune system, fighting stress, and preventing eye diseases. In addition, it is rich in minerals like calcium, phosphorus, and iron. The drink even helps those who undergo chemotherapy, reducing the actions of free radicals generated by the medication and preventing the medication from having an oxidizing action.

In addition, recent studies have confirmed that cajuína protects DNA cells. Very versatile, the drink can be consumed at any time of the day. Finally, the drink is recognized as a Cultural Heritage of Brazil, by the Institute of National Historical and Artistic Heritage, Iphan.

QUINDIM

D'Angelo Sweets is a family company, originally from Petrópolis, city of Rio de Janeiro. Since 1992, they have been producing artisanal eggs based on candies, strictly following family recipes, in a tradition that is renewed with each generation and takes on the profession of ancestors, inviting you to "fall into temptation", according to the famous Portuguese saying.

Quindim in particular is a sweet of Portuguese origin, whose recipe, with egg yolk and coconut shavings, came from African slaves, at the time of the Empire of Brazil. It is a dessert for refined palates, receptive to what is most delicious in traditional Brazilian confectionery. In addition to the traditional and delicious quindim, D'Angelo Sweets invested in the development of a lactose-free and gluten-free version, produced with organic sugar and without preservatives.

In this partnership, we can offer the traditional handmade quindim with a year and a half of shelf life.

A vertical image on the left side of the page shows four white bowls containing different products. From top to bottom: a bowl of brown cocoa powder, a bowl of golden-brown granola, a bowl of chopped walnuts, and a bowl of sliced almonds. The bowls are arranged vertically, with the granola bowl slightly offset to the right.

MACADAMIA

Known as the best nuts in the world, macadamia nuts taste delicious. With many health benefits, **macadamia** is used in the cosmetics industry to manufacture soaps, shampoos, and sunscreens due to its antioxidant properties, rich in vitamins and omega 7, which act as natural beauty care.

When consumed frequently, macadamia helps reduce cholesterol levels and also lowers triglycerides, consequently, it reduces the risk of getting diseases. This nut facilitates weight loss and prevents cancer. Considering the facts, we can say that macadamia brings together a combination of nutrients that, in a long-term diet, brings many benefits for a good and healthy life.

MORINGA

Moringa, also known as "miracle tree" or "vitamin tree", is a plant often associated with good health and nutrition. Its fame comes from the fact that moringa is very rich in several vitamins, amino acids, anti-inflammatories, and antioxidants.

It is a nutritional supplement. Fights free radicals; inflammation; helps to reduce some symptoms of diabetes; protects the cardiovascular system and takes care of brain health. Some studies suggest that the continuous use of moringa during treatments can be a great support in combating some diseases, from malnutrition to degenerative diseases.

It is a source of 90 nutrients and all essential amino acids, including those not produced by the human body. It has 46 antioxidants, in addition to 36 anti-inflammatories. In the leaves, vitamin A is found; B2; B3; B6; B7; C; D; E and K. It is rich in minerals like iron; potassium; calcium; copper; magnesium; manganese, and zinc. It contains 17 times the calcium in milk; 25 times the iron in spinach and 15 times the potassium in bananas.

There is a growing demand for these products worldwide, which offers opportunities for Moringa, especially in energy drinks and food supplements that offer an alternative source of energy to caffeine.

FRUIT PULP

AKHI has a partnership with manufacturers specialized in the fruit and açai pulp business. We seek to provide consumers quality and practicality on a daily basis, dealing with different profiles of manufacturers in order to serve small retailers to large international distributors.

With a focus on economic, environmental, and social sustainability, our partners seek the continuous improvement of their processes that goes beyond the factory and reaches the daily lives of farmers, who learn to increase their profits by improving the quality of their products.

The manufacturers have laboratory infrastructure for product analysis and a strict quality control process, an important differential to deal with the competitive export market.

COCOA BEANS

The Ouro Verde Farm is located in Maraú, in the State of Bahia in Brazil. The farm produces various types of cocoa in the Cabruca cultivation format, where the plantation is within the Atlantic Forest. The most well-known types of cocoa produced are Common Cocoa; Catongo Cocoa; PS 1319; NCC 51; CCN 10; BN 34.

The Ouro Verde Farm produces fine cocoa beans, valuing quality in the process and respecting nature, aiming to achieve different standards of aroma and flavors of the beans. The process follows strict fermentation, drying, and storage patterns to achieve a high quality of the almonds.

The farm produces for the main Brazilian brands in the gourmet segment and has UTZ certification in sustainable agriculture procedures.

In 2020, they received 3rd place in the Blend category of the 2nd edition of the Brazilian Cocoa Awards Contest. Today the Ouro Verde Farm has the third-best almond in the country's Blend category.

SPICES

We at AKHI always value high quality and taste because we believe that flavors make a difference and bring happiness to our lives.
