

VIA **PERMANENTE®**

A Brazilian company
Solutions to keep you on track

> **Presentation**

Via Permanente's story is made of DREAMS and IDEALS.

It was born from the dream and idealization of a man, who was not only a railway worker but also an entrepreneur.

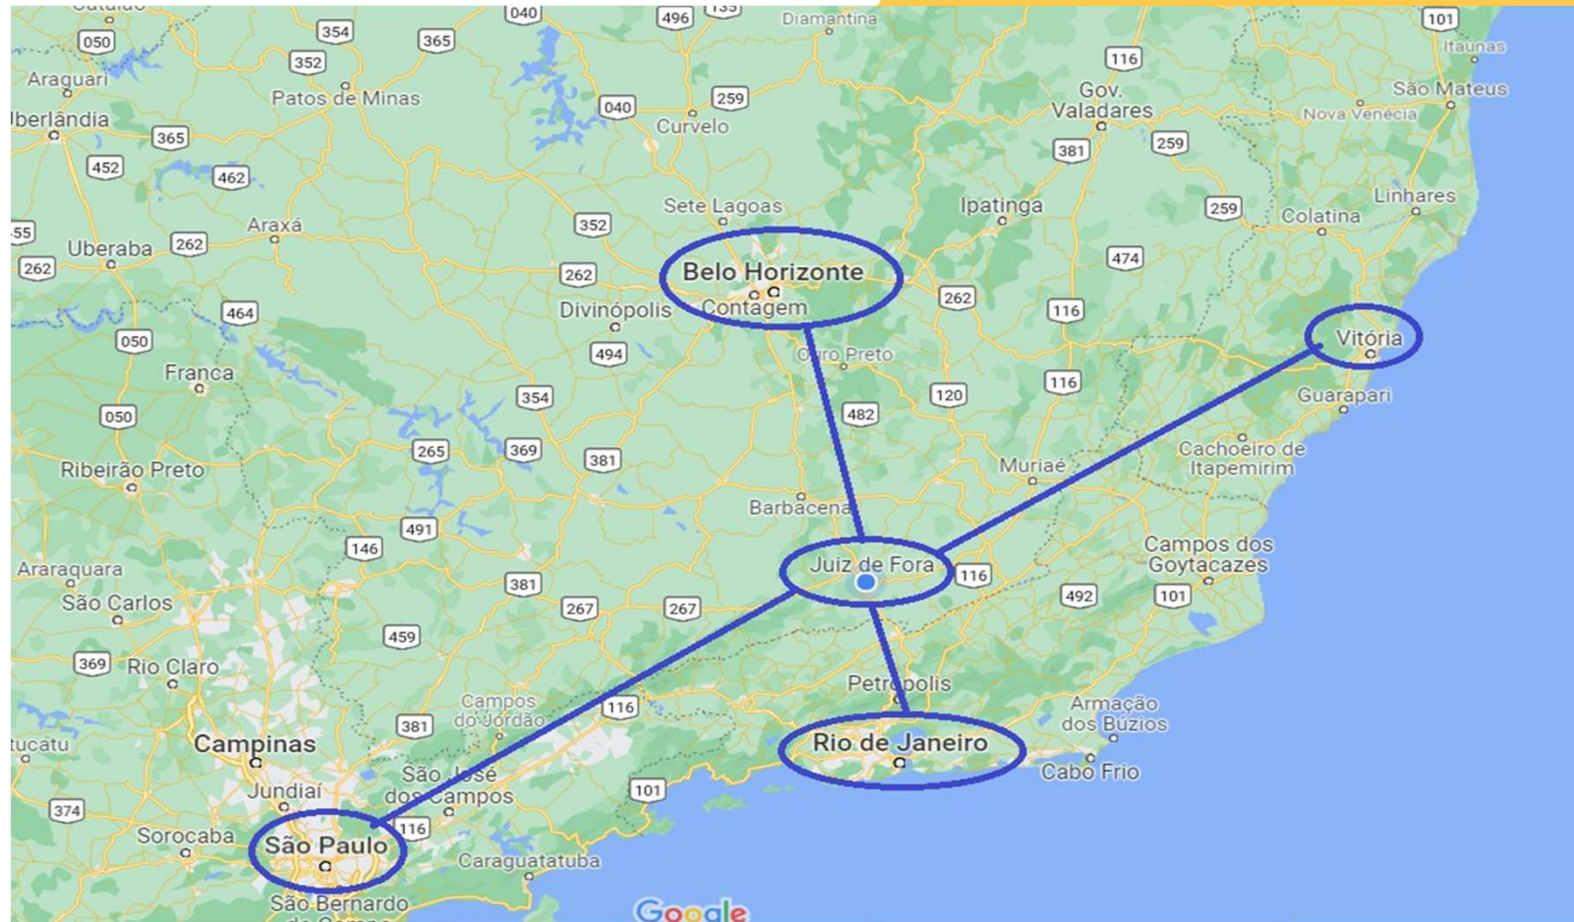

We started our activities in 2004 in order to meet the demands for reforms in equipment and components of railway construction and maintenance machines.

Nowadays, it is recognized throughout Brazil and Latin America, and besides it is also the company that advances the most in this field.

We have an active team, which has been part of our history for many years, and clients who trust in our potential.

Count on us to continue providing solutions to keep you on track.
