ABOUT US

Dynamic, bold and with products 100% natural: this is Dikoko, a company located in the Brazil's Northeast that has been working with coconut since 2003.

A rich history started by Mr. Dias. A visionary entrepreneur who planted the first coconut tree in the District of Calumbi I, on Paraipaba.

Always focused on evolving with Mr Dias' son, Bruno, who has watched this businessman's work, that Dikoko started manufacturing products using coconut as raw material in 2003.

It started with frozen coconut pulp (white almond from dried coconut), the base product for the manufacture of grated coconut, coconut milk and coconut oil.

Assertive decisions, investments and entrepreneurial vision contributed to boosting the company's mix and expand the operations.

Today the company has 12 large farms and two industrial parks.

It currently supplies supermarket chains such as Wallmart, Brazilian and international distributors.

Other differentials are the GPM, HACCP and IFS certifications, in addition to being a reference in private label's market.

RETAIL LINE

End consumers also enjoy the delights manufacturers by Dikoko.

With the Retail Line, customers can easily purchase products on the shelves of their favorite supermarkets.

INSTITUTIONAL LINE

Coconut is a relevant raw material in the trade of food products and its industrialization is a practical and efficient way to take advantage on production.

With extensive activities, our centers serve establishments such as restaurants, bakeries and, of course, the wholesale and retail trade.

Dikoko's industrial line offers, throughout all the year, what is best in coconut derivatives.
