Design

Events/Exhibitions

We connect your personal brand through spaces created and defined exclusively, within your branding concept, for your company.

Arquideograma began with your first steps on 1989. Our business is architecture, scenography and design including design and fabrication of exhibition, stands, events, conferences and show management. It also includes displays, shopstores, show-rooms, shopwindows, commercial and corporate spaces, interior fit-out, scenery, commercial installations, promotional equipment, interior design and landscaping..

We also organize, produce and promote corporate and cultural events, fairs and exhibitions, from end to end, from the briefing to the final delivery, assisting in the ancillary steps for regularization and disclosure. We can also advise on a single defined step.

We have a select team of professionals to provide total solutions since first contact passing by design and fabrication, supporting our clients during all process, providing high quality services in every stage of production.

Arquideograma looks for high quality services in every stage of production, watching dead lines and quality assurance.
