OPERATIONS ADVISORY · CONSULTING · FRACTIONAL COO

Streamlined operations. So you can focus on growth.

We help service businesses grow without every decision having to go through the founder.

Your business grew. Your operations didn’t.

Decisions wait for you. Responsibilities are unclear. Delivery falls behind. Margins shrink. The software is there, but the work still gets stuck.

Three ways we help

01

Operations Advisory

“I need a plan.”

We clarify priorities, build an execution plan and track progress. You and your team execute.

02

Operations Consulting

“I need help fixing a process.”

We redesign and implement a defined change with your team, and stay until the new way of working holds.

03

Fractional COO

“I need someone to run it.”

We take ownership of operations and lead your team day to day, without a full-time executive hire.

Clear objectives. Clear ownership. Less friction.

Find the bottleneck where work waits.

We start with the cause, not a new tool. Our SPOT framework connects strategy to daily execution, tailored to your business.

S

Strategy

Priorities, goals, KPIs and financial visibility.

P

People

Roles, decision rights, accountability and leadership.

O

Operating Processes

Handoffs, capacity, quality and repeatable delivery.

T

Tools

Systems, reporting, integration, automation and AI where they help.

Operators, not just recommendations.

We have built and led service businesses ourselves. We work alongside your team to make changes stick, with clear owners and measures of progress.

Benjamin Lander

Managing Partner. Built his first agency to 100 employees within five years.

Francesco Baldisserri

Partner. MIT Sloan MBA. Operations leadership, engineering and data expertise.

Start with a useful conversation.

A free 30-minute call to understand where work gets stuck and identify a practical next step. Advisory, implementation support or embedded operations leadership.
