Consulting Services

25+ years of professional experience in software development, project management, testing and requirement management.

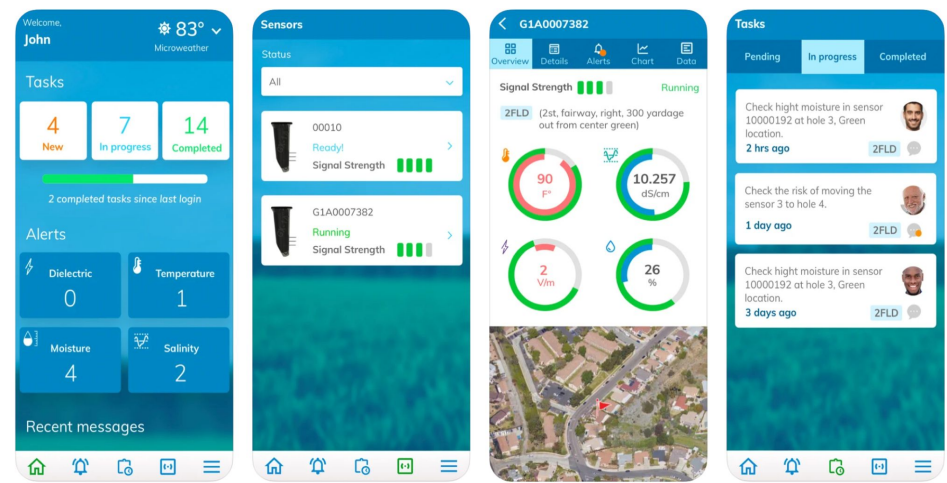

The experience in the B2B industry gives us deep knowledge of the latest transformational needs.

Our clients are technology organizations who are intending to bring connected and embedded technologies to their products or customers. They recognize that digital technologies are evolving rapidly and they may not have all the bandwidth in house.

Auriz is a vibrant team of professionals who have accumulated years of experience in software projects, providing consulting and implementation services at the highest level.

Case Studies

Designing

Our experts can provide a vision and perspective in different areas like: technology selection, software design, and cloud implementation. Also we advise on software quality, reliability and test automation.

Building

We bring best practices into the development lifecycle, creating phased deliveries using agile practices and controlled releases.

Implementing

We can help you verify, deliver, pilot or integrate the software components that your solutions requires.
