Ondores, Junín, Perú

Our production is located in the district of Ondores which is a region of Junín, in the central part of Peru, at 4105 m.a.s.l, in the center of Peruvian Andes.

Ondores is characterized for being an ecological niche which is good for the crop of our products.

Historically, is one of the places in Peru related to Maca crop, this because a pre inca mummy was discovered with funeral utensils and food products. One of these was the Maca which was found in good condition.

Yellow Maca

There is a big quantity. Traditionally, it is used for its energetic effect increasing the physical and mental capacity, improving their standard of attention and reducing stress and anxiety.

Black Maca

As well as yellow and red Maca, it is used because of its energetic effect increasing the physical and mental capacity, improving their standard of attention, reducing stress, anxiety, fertility problem and has antioxidant property.

Red Maca

Between its benefits, is good against cancer, benefits the prostatic hyperplasia, because of its high content of phytonutrients, produce a high quantity of antioxidant.
