say hello to a happy world!

earth – our home.
the place we feel safe and secure.
is also for our homes, our lives & the planet.

products made by upcycling crop-waste

products are safe & sustainable with
superior quality. they are made from
biocomposites using responsibly sourced crop
residue with circularity principles.

bamboo offcuts

coffee husk

rice husk

circularity is the only sustainable way of living within our earth's limits

we are building a beautiful world where nothing is wasted, everything has value beyond single purpose and where husk is valued as much as the grain.

products are made following the three guiding pillars of circularity, from product concept to its end of life.

01 eliminate waste & pollution

made with crop-waste, and other recovered materials, products eliminate waste right at the beginning of the product lifecycle.

02 reuse products & materials

products are built to last for many years with best-in-class design and quality. they can be recycled after extensive use.

03 regenerate natural systems

by making products with materials that can be reused, repurposed and recycled many times, supports regeneration of nature.

our 3e promise

elevate
by contributing
to a better
planet & future

engage
to uplift farmer
and rural
communities

experience
superior quality
products meet
global standards

our impact

our primary purpose include 2 of the 17 UN sustainable development goals.

- reduce carbon footprint through biocomposite materials & products
- reduce carbon footprint by preventing crop-burning
- lock biogenic carbon from crop-waste in durable products

- prevent resource depletion by replacing plastics with crop-waste
- support recycling and regeneration of resources with circular design
- zero waste manufacturing

we are also committed to 12 of the remaining 15 UN SDGs.

by measuring our impact, we understand the opportunities to continuously drive meaningful change.

1000 tons

CO2 reduced

identical to avoiding
emissions from 700
cars in a year

300 tons

crop-waste used

comparable to
preventing 125 acres
of crop burning

400 tons

fossil plastic reduced

that's how much 26,000
adults consume plastic
in a year

making of products with complete accountability & transparency

01 crop-waste - the feedstock

we source rice husk, coffee husk, bamboo, etc from farm or factory that results in value to such crop-waste

02 biocomposites - the foundation

we blend crop-waste with suitable binders to make biocomposite materials with our proprietary IP & infrastructure

03 earth-friendly products

our qualified partners mould best-in-class products from biocomposite materials that we make

04 bundle - your guilt-free products

we bundle products together as per your needs & choice. our qualified partners do the printing if necessary

05 pack - with responsible packing

products are packed with minimalistic design, using circular materials sourced from our qualified partners

products are made with nature inspired colors
