TRAINING / CONSULTING / AI AGENTS

AI that people actually use at work

Training, consulting and AI agents for companies and educational institutions that want real, responsible results with Artificial Intelligence.

24+ years
in technology, education and management

UTN
Tenured Professor and former Secretary of Digital Transformation

ISET
Director of a higher technical education institute

R&D
Director of applied research in data analysis and machine learning

What we do

In-company AI training
Hands-on workshops built on each team's real tasks. People leave with use cases that work.

AI adoption consulting
Diagnosis of processes, systems and data, and a step-by-step roadmap with responsible-use criteria.

AI agents & automation
Agents and workflows for customer service, reporting and admin tasks that save hours every week.

AI for educational leaders
Programs for directors, managers and teachers to bring AI into academic and institutional management.

Mentoring & leadership
Support for executives and teams leading change in the age of AI.

How we work
1. Discovery meeting
2. Tailored proposal
3. Hands-on delivery
4. Follow-up on real results

Selected work

"Directores GPT"
Generative AI program for directors of higher education institutes in Tucumán, Argentina.

Hands-on Claude workshop
Live practical workshop for professionals on using AI assistants in daily work (2026).

University AI e-learning
Four-module AI course for Universidad San Pablo-T, plus keynotes on AI and digital citizenship.
