

Who we are?

We are a company that offers energy solutions in Mexico and Central America. Additionally, we are suppliers of equipment for the implementation of renewable energy projects, experts in solar, hydraulic, biomass and wind energy.

We satisfy the needs of customers with innovation, knowledge and experience in our reason for being: clean and efficient energy

Infinite Power professionals have extensive experience to provide a complete analysis of the place to be installed so that the investment is recovered in the shortest possible time and the equipment is used with the greatest efficiency.

MISSION

Give our clients a complete and professional advice so that through a continuous cycle of innovation they are successfully self-sustaining in energy and environmentally responsible.

Business VISION

To be the company with the greatest innovation in consulting matters self-sustaining energy.

Services briefcase

- Planning, analysis and design of renewable energy systems.
- Installation of projects.
- Advice and training.
- Maintenance to installed systems and equipment.
