SEA FOOD

We are a company dedicated to the processing and marketing of fish, shellfish and their derivatives from the sea.

We have the highest quality standards attached to international standards, based on the **HACCP plan**.

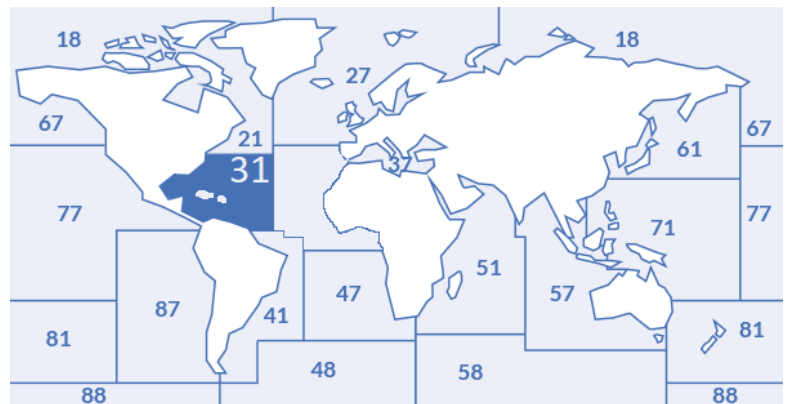

Our products are **FDA** and **GMP** Approved. We currently export to USA, Europe and Asia.

Our products are processed with the greatest care, maintaining safety until the final process. The clean product enters the ultra-freezing phase through the tunnel at -40°C , ensuring the cold chain is secured.

CAPTURE AREAS

Our products are obtained within the FAO-31 Atlantic Central Western capture zone and processed in the Bolivarian Republic of Venezuela

FRUIT PULP

ZFRUVER C.A. We are a company in the agribusiness sector that is dedicated to the development, production and marketing of fruit pulps, nationally and internationally, with a large portfolio of fruit products of excellent quality, always ensuring product safety, seeking a permanent generation of value for its different interest groups.

We work to provide products to meet the expectations of our consumers and customers, in terms of nutritional contribution, ease of consumption, naturalness and safety using appropriate inputs and methods of production, storage and distribution to ensure preservation along the value chain of product standards, always complying with legal requirements.

The Pulp is obtained from healthy, clean fruits, free of parasites, toxic pesticide residues and animal or vegetable wastes, their ripening is completely natural and after harvest a careful selection provides us with the best fruit, from which we extract its share edible (pulp), which allows to obtain a high quality pulp with no artificial colors or flavors added.

CULTIVATION AREAS

We are located in Edo Táchira, Venezuela. With more than 20 years in the Venezuelan market of processed foods and nationwide coverage in all its lines, with a production capacity of 400 tons of fruit per month.

The industrial processing of fruits and their preservation by freezing and pasteurization allows them to be available throughout the year, thus overcoming the problems of seasonality.
