

Seniors **International** **Consultancy Services**

Seniors International Consultancy Services is a global consulting firm that builds bridges between local needs and global health solutions. We were born from the conviction that diverse experience is the key to solving the most complex health challenges of our time. With an operations hub in Uruguay and a team of expert consultants from France, Kenya, Mexico, Peru, Colombia, Argentina, and Uruguay, we offer a genuinely multicultural, multilingual, and multi professional perspective.

Our track record has been forged on the front lines, collaborating with bilateral agencies, and government and non-governmental entities on high-impact projects. We help to build capacity, strengthen systems, and empower communities to own their sustainable development. From managing humanitarian initiatives in conflict-affected areas to strengthening health systems worldwide. Our work is people-centered and evidence-based.

Mission

We are an organization dedicated to providing consulting and project management services while upholding high standards of efficiency, transparency, and ethics. With the participation of a highly skilled, multicultural, multilingual, and multi professional team, we are geared towards providing our clients with support in organizational transformation and innovative installed capacity, with responsibility, security, and respect for the environment.

Vision

To be a referent firm in the global health, organizational transformation, and innovation. To achieve excellence in our services, guided by professional ethics, equity, and tangible impact for our clients and the communities they serve, environmentally friendly.

Purpose

Our purpose is twofold: to develop sustainable local capacities and to offer world-class technical and programmatic support. We keep organizations focused on humanitarian and equity needs, ensuring that the most vulnerable populations are at the center of every intervention.

Portfolio of Services and Areas of Expertise

Our offering is structured in two tiers to clearly communicate the breadth and depth of our experience.

Core Services

Public Health Consulting:

With special emphasis on the development of human resources for health, and the integration of environmental and mental health into public policies.

Comprehensive Technical Advisory in Global Health and One Health

Design, implementation, and evaluation of projects for vulnerable populations, defined by age, gender, or emergency and conflict settings.

Specialized Services

Digital Transformation and Innovation

Implementation of Information Systems, Digital Health strategies, and adoption of emerging technologies, including Artificial Intelligence (AI), to optimize health management and impact

Monitoring, Evaluation, Accountability, and Learning (MEAL):

Design of results frameworks, project audits, and impact evaluations that ensure transparency and timely reporting to donors.

Epidemiology and Biostatistics:

Data analysis for evidence-based decision-making, epidemiological surveillance, and disease modeling.

Universal Health Coverage:

Advisory on policy design and health system reform to advance towards equitable, quality access
