“Creating the foods of the future”

Who we are?

Vision

- Create choice foods of the future. Develop alternate sources of nutrients from natural sources.
- Be the Company that plants the seed for a balanced future between humans and nature, changing the traditional food culture in order to improve health and life of the consumers.

The Company ...

Mexican Company recently established, based in the city of Queretaro, this company born due to the necessity and demand of healthy and natural foods in the global markets, identifying the trends and opportunity that this growing demand represents not only in local markets but abroad. The products are in the market under the Brand YumK.

Mission

- Develop techniques, methodologies and production systems in the food industry.
- Create accessible foods (cost, place and availability) through innovation, research and new technologies applications.
- Boost sustainable methods and technologies to promote the responsible use of natural resources to protect the environment.

Values

- Innovation
- Passion for what we do
- Integrity and honesty
- Respect for environment and natural resources
- Inclusion
- Fair Business

Operative guidelines

Objetivo del Proyecto

Farmers

New association models with farmers to involve them in the chain of value so they have a constant source of income and work so the communities where we are present improves their lives.

Research & Development

Establish a research and development center as key element to create and develop natural, healthy and accessible foods. All based in innovation and investigation.

Merchandising

Quality products are the base to create a value chain avoiding intermediary transactions with third parties.

Diffusion

Promote and disseminate the benefits of a healthy nourishment so in the future the food culture and habits change to improve health and life of the consumers.

“Offer a choice of healthy, natural and accessible foods in the market, using the natural resources in a responsible and sustainable way to improve our natural and social environment”
