Cellar for storage

We work closely with the farmers who grow our vegetables and fruits. To minimize the time between harvest and processing, because every minute counts. Our agronomists guide you every step of the way: selecting the right varieties, optimizing cultivation and crop protection, and determining the best time to harvest.

We invest in education and help farmers discover new agricultural techniques to reduce the environmental impact of their activities, safeguarding nature and biodiversity. We give our full support to farmers who want to make the transition to organic farming.
