

## ABOUT US

We are a team of professionals with more than 30 years of experience in the energy industry. We started operations in 2009 as an international procurement provider.

We provide Engineering, Procurement, Construction, Logistics and Management Consultancy services.

We are proud of our successful history of efficiently providing our clients with high quality services, producing prosperity for our employees and contributing to the community in which we conduct our business.

## WHY US?

- We work hand in hand with our clients.
- Our objectives will always go in accordance with yours.
- We create trust-based relationships with our clients.
- We transform problems into solutions.
- We are professionals prepared for making your business grow.

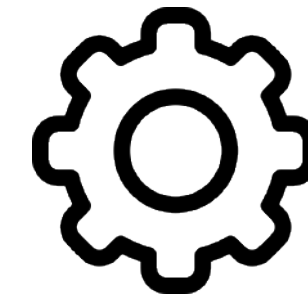

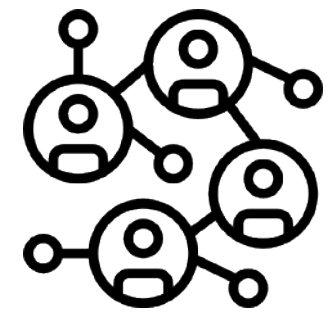

# OUR BUSINESS VALUES

We promote the generation of new ideas corresponding to the requirements, making them possible.

We promote the generation of fresh ideas as a response to the particular needs of both the clients and our own organization.

Working together we boost our abilities in order to achieve common success.

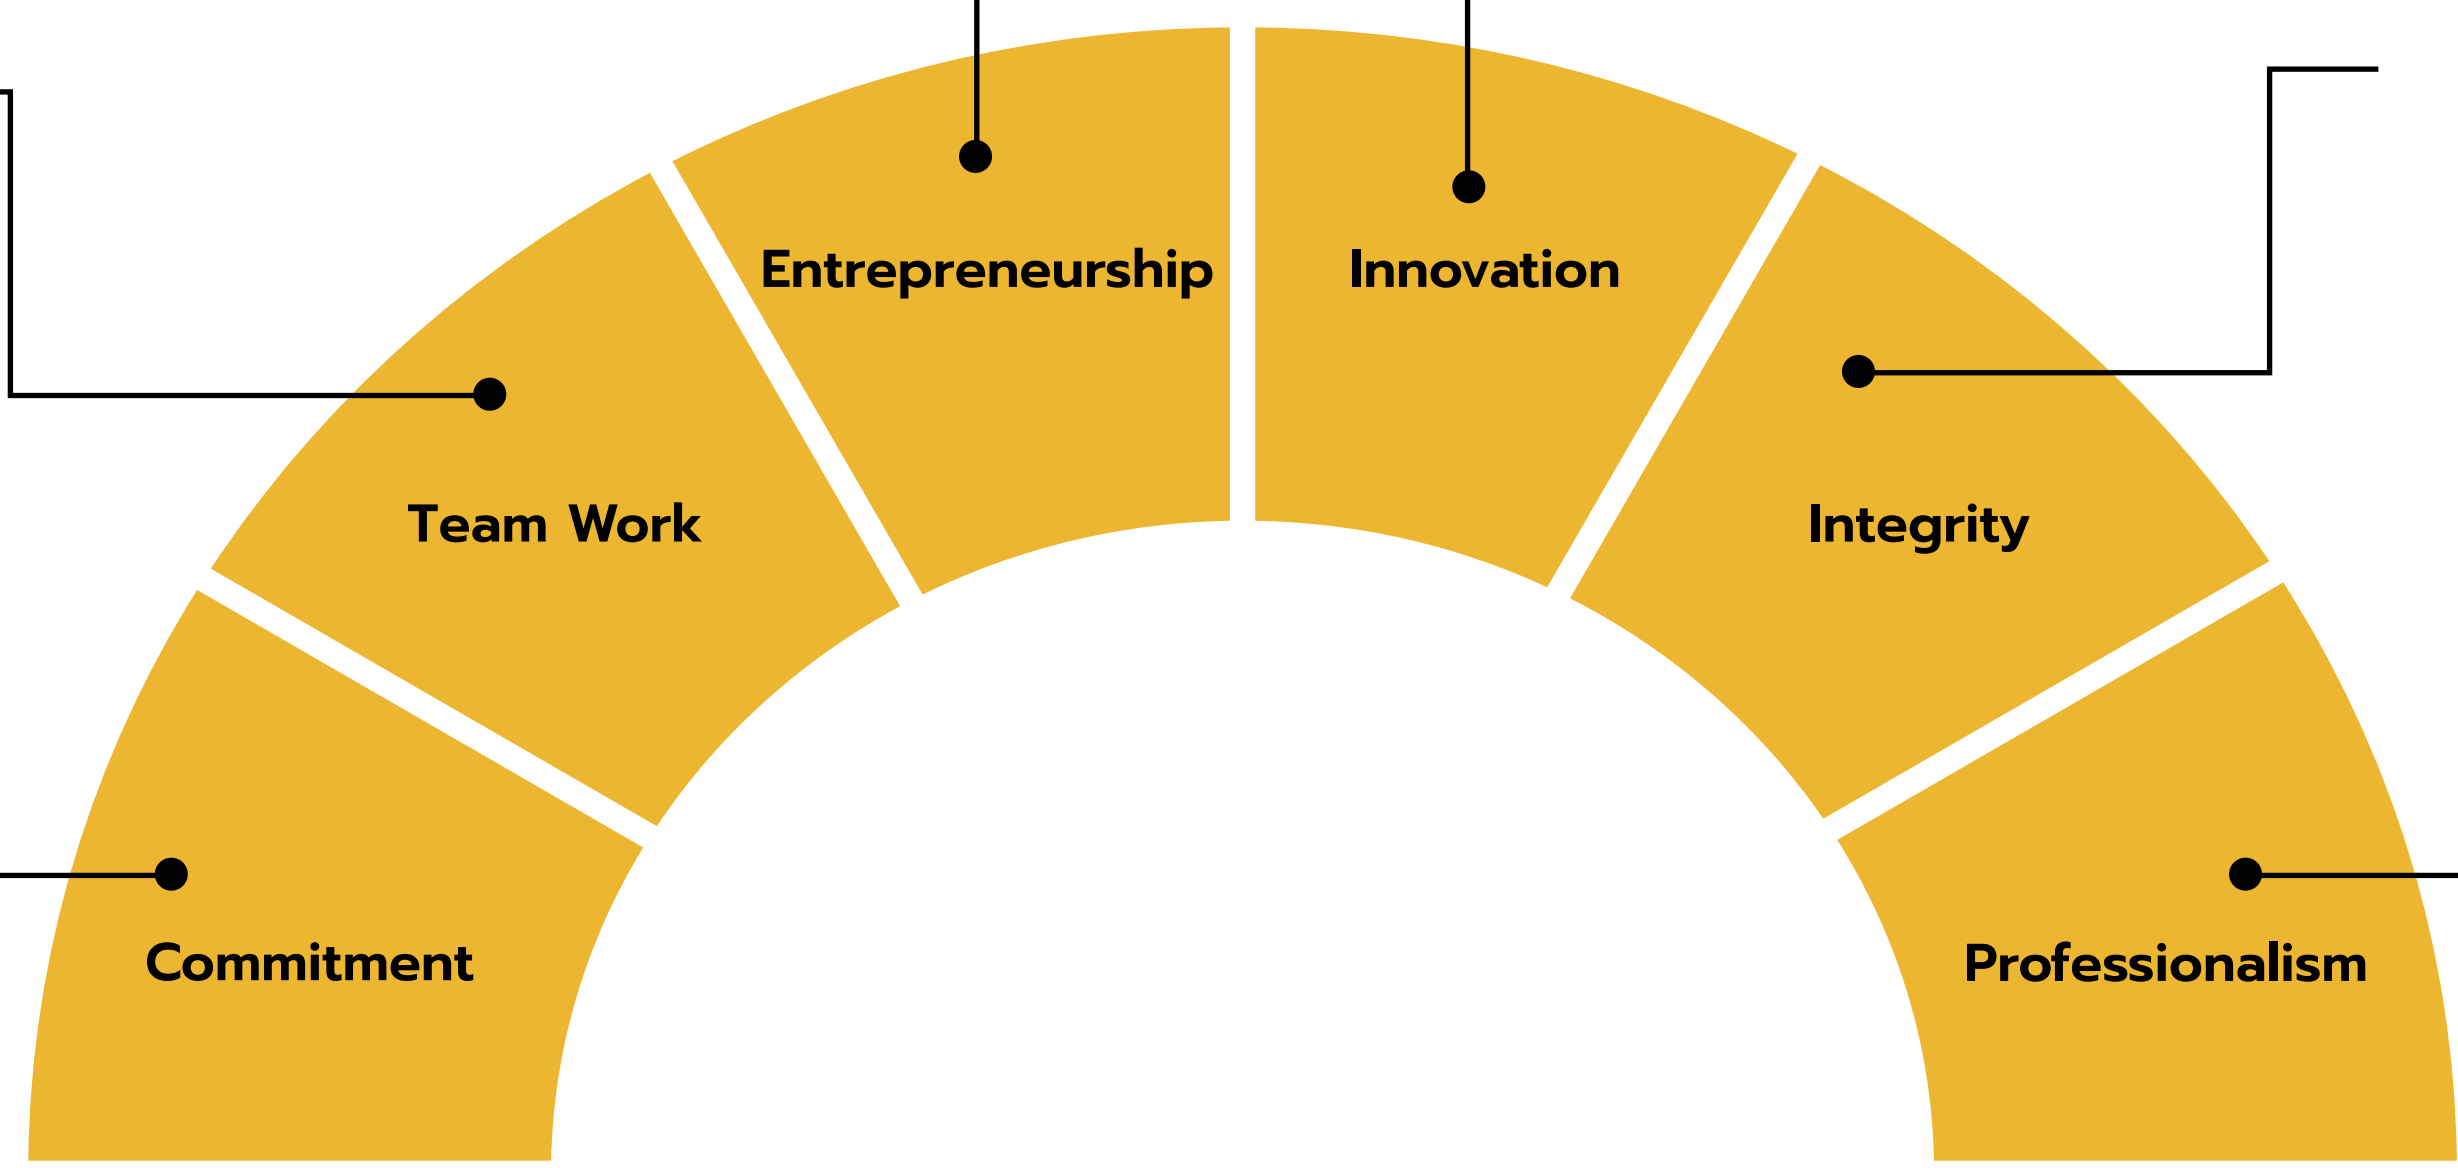

Our actions are dictated by our ethics, honesty and transparency.

We differentiate ourselves by the services we offer our clients. We answer, solve and satisfy our client's needs.

We are always in the pursuit of the required knowledge and abilities by adopting a positive attitude.

# OUR MANAGEMENT POLICIES

## QUALITY MANAGEMENT

Our clients are our priority, we constantly assess their satisfaction levels. That way we create a permanent cycle of improvement for our services.

We conduct all our operations under a Quality Management System under the dispositions of the ISO 9001:2015.

## MANAGERIAL CONSULTING

In the Management Consulting area, we differentiate ourselves from other companies by managing efficiently resources that provide different approaches and multiple styles for each project. Our team is certified as Project Management Professional (PMP) by the Project Management Institute (PMI) and have a broad experience in applying knowledge, abilities and specific working techniques for calculating resources, assessing the performance, establishing goals for each of the members of the team and ensuring their satisfactory completion.

## CORPORATE GOVERNANCE

We have a corporate governance system based on the standards of the OECD (Organization for Economic Cooperation and Development) and the IFC (International Finance Corporation).

Among the main characteristics of the system we have:

- Equity with shareholders and employees.
- Data dissemination and information transparency.
- Respect toward the stakeholders.
- Regular shareholders meeting.
- Auditable financial statements.

## CODE OF ETHICS

In terms of ethics, our team behaves in accordance with the code of conduct, considered mandatory, which dictates the type of corporate behavior to be expected in our company. Our main objective is to promote a corporate culture where the managers and employees have an ethical behavior both inside and outside the company.

# OUR CLIENTS

# OUR GUYANA ALLIES

## WTTC WILLEMS TIMBER & TRADING CO. LTD.

Willems Timber & Trading Co. Ltd. (WTTC), a privately owned company founded in 1933 by the Willems family was acquired in 2002 by Guyana Lumber & Timber Co Incorporated but still continues to trade under the WTTC name.

The company operates an asset base of over US\$3 million and an estimated market value with a cost of capital of 12% real applied to pre-tax cash flows of US\$11.5 million. WTTC is the holder of two forest concessions located in the Cuyuni-Mazaruni region in Guyana, South America.

The forest concession encompasses a calculated gross area of 112,607 ha and a net productive area of 72,035 ha. Existing Timber Sales agreements (TSA) for concessions 10/85 and 01/91 are held by Willem's Timber and Trading Company (WT&TC).

TSA 01/91 and TSA 10/85 will expire in December 2029 and both Timber Sale Agreements are renewable. The combined annual allowable extractive volume from both concessions is 24,157m<sup>3</sup>. A selective logging approach is used for timber harvesting activities, where an identified number of commercial species above a specified diameter are extracted from an area. Forests are logged in a manner such that harvesting does not result in a break in the overall rainforest canopy. Code of Practice sets minimum operational standard requirements, and the GFC monitors harvesting practices through a structured program of field visits.
