

Business proposal

Refinada Estándar de México focuses on the sale of Mexican and Brazilian sugar around the globe since we have business relationships with various producers in the sugar sector, we supply the domestic and industrial markets and the distribution is carried out sending the product from the nearest warehouse so we optimize transportation costs besides we use road, maritime, rail and air shipments.

Sugar has price fluctuations during the year due to the harvest period and other factors, but you must be sure that we will try to give you the best price; on the other hand, the product is transported with insurance and the delivery time will depend on the supply chain carried through planning so as not to affect indirect costs.

We will be very happy to start a successful business relationship with you, we will also bring some competitive advantages so you will be in a superior position amongst the competition.

We are at your disposal through all the different contact channels for your requests, questions or comments.

Welcome to the 2021 - 2022 harvest.

Sincerely,

Leonardo Xavier Ramírez Hernández
