WELCOME TO THE

NEW TECHNOLOGICAL

SUSTAINABLE AND

TRACEABLE ECOSYSTEM

CONNECTING FARMERS
TO GLOBAL BUYERS

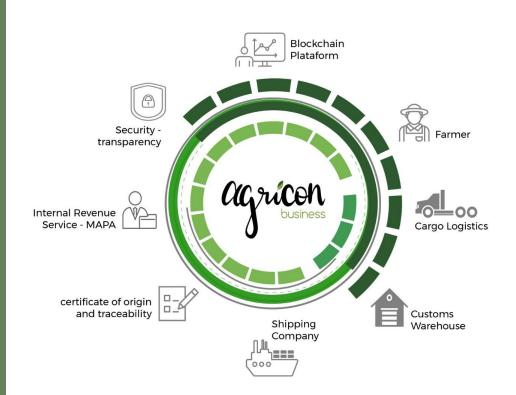

Agricon Business is an AgTech that connects rural producers to global buyers, guaranteeing traceability, transparency and security, operating in the commercialization of agricultural products and Amazonian biodiversity through its

BLOCKCHAIN platform

We have digitized the buying process of agricultural products, which today is done analogically.

Agricon's business model with Blockchain technology simplifies exports, ensuring end-to-end traceability, transparency and security, from farm to table.

From the technical visit, Agricon
Business, which acts as a commercial
exporter in its operations, is responsible
for all stages in all transaction sectors,
centralizing and transparently managing,
in real time, the procedures and
information of each link in the process, in
its entirety, from the origin of the product
to the global buyer.

550 Farmers

Agricon #WEAREINTERNATIONAL Business

Office in Brazil and Portugal.

22 Global buyers:
Germany, Italy,
Spain, Portugal,
Arab Emirates
and China.

Internationalization process; local representatives. Connecting farmers with global buyers, generating a new business-driven approach and integrating into a sustainable chain that provides traceable agricultural products with less social and environmental impact.

our PURPOSE
