FARM TO TABLE

Carapreta is a pioneer project of premium beef production in the Semiárido Mineiro, Brazil. It combines quality, technology and sustainability, and all its products are certified and traceable.

Starting from the genetic selection, the company has control over all the production steps, caring for the details that guarantee the highest quality standards throughout the whole year. The herd feed is produced in the farms, and the diet of each animal is individually monitored to ensure maximum flavor, tenderness and marbling.

More than a product, Carapreta's beef is the result of a purpose: to become a world reference of excellence by being the most daring and innovative player in the production of animal protein. Carapreta is made by those and for those who are truly passionate about meat. Offering premium, tender and extremely tasty beef is the obsession that justifies our work. It is not by chance that care is a hallmark of each stage of production, from farm to table, with the rigor of those who, like you, accept nothing less than excellent quality meat. For us, perfection is an attainable goal, and it leads us to deliver a unique and exceptional product.
