Description

Its original name is Kinwa, it is known as QUINOA in South America and as QUINOA internationally.

The "quinoa real" variety has a designation of origin Bolivia. It grows to more than 3,800m near the world's largest salt flat "Uyuni". Its size is larger compared to other quinoas.

It contains antioxidants, such as quercetin and kaempferol, and flavonoids that have demonstrated anti-inflammatory, antiviral, anti-carcinogenic and antidepressant effects.

It contains soluble fiber that helps reduce blood sugar levels, lower cholesterol, and increase the feeling of satiety.

It is an excellent source of quality protein.

Contains minerals such as magnesium, potassium, zinc, and iron.

Studies show that its consumption lowers blood sugar level.
