披萨炉系列

Pizza Stove Series

Description

- The outer shell and the net chain are made of stainless steel plate, the thickness is 1.0-1.2mm, the material is sufficient, the plate is thick, the appearance is beautiful and practical, and the high efficiency
- With 0-400°C digital intelligent temperature control meter, accurate temperature display, achieve constant temperature effect.
- It is equipped with upper and lower heat temperature display, and the temperature of the heating tube is independently controlled, which has the taste of the real thing. Keep the color of the food uniform and produce food quickly and effectively
- Using high-quality customized precision gear, three-layer reinforced support is designed to support the net chain. The force is balanced, and the phenomenon of chain shedding will not occur in the operation

(Gear pumps ensure a high overrun ice cream)

Feature

Offer all the popular soft serve variations from low or non-fat ice creams to custards, yogurt and sorbet.

Freezing Cylinder Two, 1.8 Liter

Mix Hopper Two, 12.5 Liter

Separate hopper refrigeration(Pre-cooling)maintains mix below 4.4°C .

Microprocessor Controls

Microprocessor regulates refrigeration by measuring product viscosity to maintain consistent quality.

FOOD MACHINERY SERIES

食品机械规格全，种类多，一机多用，方便快捷，操作简单，高效产能；
仿手工制作包子机，噪音小，体积小，品种多样化，省人工；
豆腐机小投资，大收入，一机多用，成本低廉；
量身打造专业化，在享受美食的过程中感受厨具带来的便捷和服务
适用于自助餐厅、酒店、烧烤店、饭堂、小吃店、流动摆摊等场所

The food machinery has complete specifications, a variety of types, multiple uses for one machine, convenient and fast, simple operation, and high production capacity;
Imitation handmade bun making machine, with low noise, small size, diverse variety, and labor saving;
Tofu machine with small investment, high income, multiple uses, and low cost;
Tailored and professional, feel the convenience and service brought by kitchen utensils while enjoying delicious food
Suitable for self-service restaurants, hotels, barbecue shops, canteens, snack shops, mobile stalls, and other places

BAKING EQUIPMENT SERIES

“中心工厂 + 批发”的模式，效果更强，成本更低。
采用这种模式的面包糕点行业更有可能渗透到越来越多的城市。
因此，整套烘焙设备可以在未来三年内快速运转！
适用于家庭 / 餐饮 / 汉堡店 / 私人点心烘焙 / 食品加工厂等场所。

The mode of "central factory + wholesale" has stronger effect and lower cost. The bread and pastry industry with this mode is more likely to penetrate into more and more cities. So the whole set baking equipment could be ready to go fast in the next three years!

It is suitable for family/catering/hamburger shop/private Dim sum baking/food processing factory and other places.

Description

Imported Main accessories, domestic assembled
Heating system: high efficiency hot wind circulation system, Using imported heating tube, heating, evenly
Heating charger, Using special imported stainless steel materials, quickly heating, longer service life, Italy and Japan imported burner, energy efficiency, low waste emissions, critical electrical parts imported from France, Japan, Italy. to ensure the products' durability and stability
Air exit: the design of the ways 1 segment, very easy to adjust the baking effect.
Rotary oven has large baking capacity, Customers can according to your requirements to choose different source type (electric or diesel)
Durability: Control panel is separate from oven body, heat insulation, low failure, more durable.

Application

Suitable for baking bread, mooncake, Lagou, pita, pasly, Licul, Jura, hamburger rolls, various breads and so on, it's the best choice for hotels, restaurants, bars, supermarkets, bakeries, and food factory.

TUNNEL OVEN INLET AND OUTLET SYSTEM

隧道炉进出炉系统

JD-HB46

Description

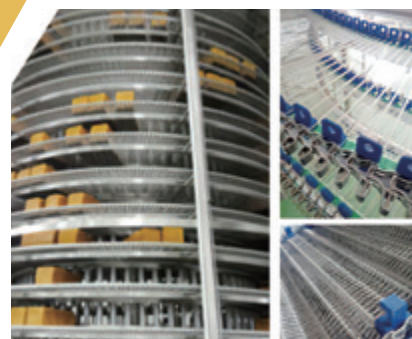

- Tunnel oven inlet and outlet conveyor system is belong to the supporting equipment of the tunnel oven, the width and height are customized according to the size of the tunnel oven.
- Full stainless steel structure, durable and good appearance.
- Automatically arrange the trays when baking trays enter tunnel oven, and automatically push the trays when baking trays come out from tunnel oven, can save manual operation.
- Taiwan motor and Korea photoelectric switch, Japan SMC cylinder, high safety performance and high efficiency.

CONVEYOR COOLING LINE

输送冷却线

JD-HB48

Description

- The production line can be designed in most reasonable dimension and structure according to customers' plant dimension and production requirements, realizing the real sense of automation.
- According to products' requirements, the conveyor line can be customized PU antiseptic belt or stainless steel mesh chain.
- The conveyor line are divided into straight convey and turning convey.
- The multi-layer line or multi-layer turning and crossed line can be customized as well.

Application

- It is applicable for industry, food and related products.
