

We Build the Custom Machine you Need.

CIRMAQ[®]
Custom Machines

ROMAN Y MARINONI S.A.

We Build the Custom Machine you Need.

Design and fabrication of Turnkey Custom Machines for a wide range of industrial processes.

- Best Cost/Benefit ratio in the market.
- Our design, fabrication and assembly processes are fully integrated in our plant.
- Experienced Project Managers to keep your project on schedule and budget.
- Large size and high complexity machining capabilities.
- Experienced Engineers and Technicians for integration of Mechanical, Electric, Robotic, Pneumatic and Hydraulic systems.

Own Design Engineering

Our highly experienced staff of Engineers and Technicians will help you get a cost effective solution, supported on latest advances in automation processes, either through robotics, electronic, pneumatic or hydraulic systems. We offer solutions to a wide range of requirements in industrial processes, both to the national and the international market.

Fabrication

The manufacture of custom machines demands the production of a wide variety of parts and components in terms of size, shapes and materials. In all cases with precision and quality requirements. The vast experience of CIRMAQ's own workshop, the ability to make high complexity machining and the correct treatment of various materials, provides the appropriate support to each kind of project.

• Airbag Tubes Drilling Machine.

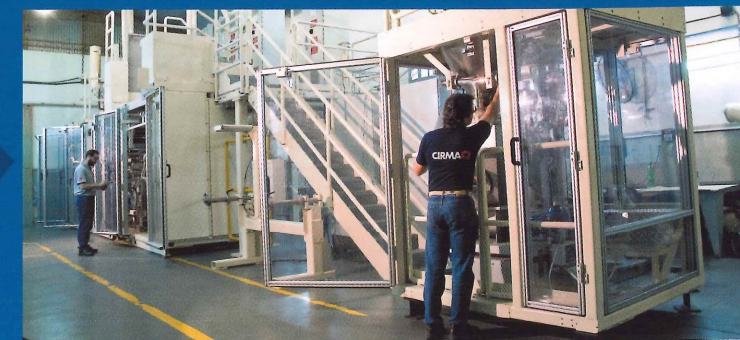

• Tubes Engraving Machine.

• Pipe Ends Swaging press.

Logistics

Some projects may require a big variety of commercial parts from manufacturers of different countries. Our dedicated purchasing and logistic professionals has the knowledge and the right network of brokers, forwarders and custom agents for efficient and effective parts import.

Build to print

An ongoing challenge.

CIRMAQ as plenty of experience working with multinational corporations on build-to-print projects, where complex engineering packages are provided by the customer. Our continuous improvement and permanent technical update philosophy give us the flexibility to adapt and fulfill with the low cost and quality standards required for these kind of projects.

CIRMAQ Experience

Automotive parts industry

- High production machining custom equipment.
- Automation and assembly devices.
- Custom automatic welding machines.
- Transfer machines, linear or rotary, for assembly or machining.
- Handling, lifting and transportation systems.
- Process automation.

Iron and Steel Industry

- Bar feeders and Bar straighteners.
- Presses for special applications.
- Pipes Handling, lifting and transportation systems.

Robot Applications

- Welding.
- Painting.
- Manipulation.

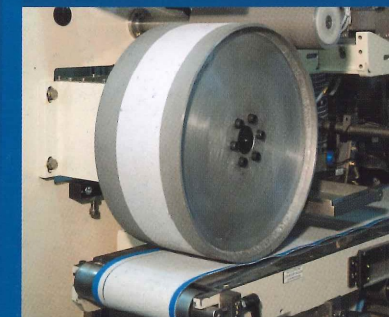

Beverage and Food Industry

- Meat industry machines

Oil Industry

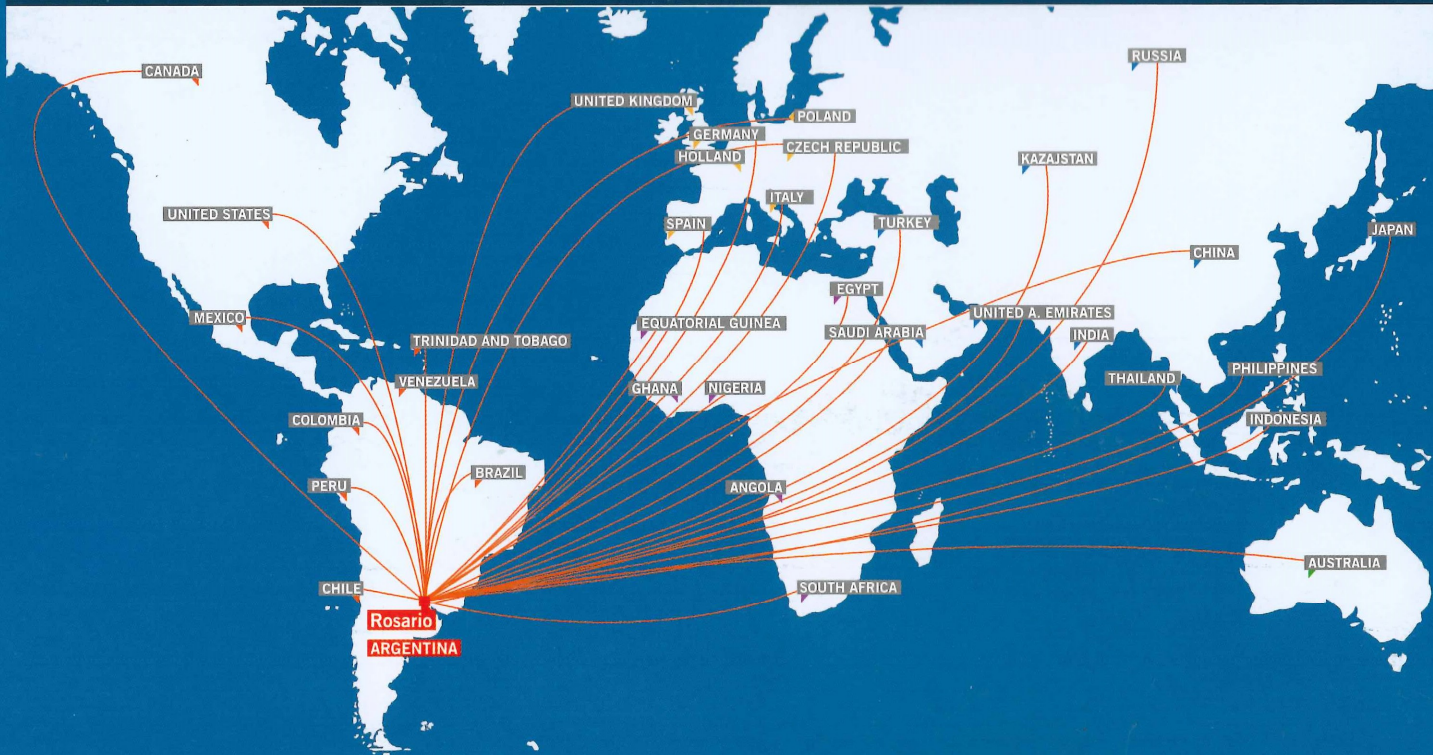

- Pipe Ends Swaging press.
- Pipe Ends Swaging-Expander press.
- Coating application system for pipe ends.

Mass Consumption Industry

- Modules for diaper converters.
- Upgrade of production lines, parts and modules.
- Machines for Paper converting.

CIRMAQ in the world

Our Customers

Procter & Gamble, Gillette, John Deere, General Motors, Tenaris Tamsa, Tenaris Confab, Tenaris Siderca, Inergy, Plastic Omnium, Alexander&Associates, Baker Hughes, Alcoa, Hydril, Kayaba-Mando, Arvin Meritor Gabriel, Peugeot-Citr  n, Tenneco Monroe, Kimberly Clark, Magnetti Marelli-Cofap, Fiat, Denso, Fate, Paladini, Corven, Mirgor, Interclima, Vallourec.

Innovating: Remote engineering on a virtual environment.

CIRMAQ has also expertise on designing using QuantaPoint® 3D imaging technology. Working on a virtual scanned production line, we were able to design, make online reviews and fabricate parts for factories located thousands of miles away from us.

Plasma Coating

CIRMAQ is exclusive licensee for Argentina of PLASMA COATINGS®, a global leader in Corrosion, Wear and Release Coatings technologies. Those coatings are a great solution for different kind of parts like Rolls, Machined Parts or Molds; on industries working with Ink, nonwovens, plastic or paper Webs, adhesives, corrosive environments, etc.

CIRMAQ Quality

We are an ISO 9001 certified company since 2006, committed to quality and continuous improvement in every step of our processes.
