CONCRETE PIPE MACHINE

FRESH TRADING brings you the leading position in Turkey in the production of Concrete Pipe Machines. It manufactures machines from 150mm to 3600mm. Please contact us for fully automatic, semi-automatic concrete pipe machines.

**CPM 3600 800- 3600mm
CONCRETE PIPE MACHINE**

CPM 3600 Concrete Pipe Machine can produce concrete pipes from 2000mm to 3500mm in length, 3000mm x 3000mm square culvert, etc. with diameters between 800-3600 mm....

PRODUCTION CAPACITY

Concrete Pipe Size 600mm-3600mm

**CPM 2400 600- 2400mm
CONCRETE PIPE MACHINE**

CPM 2400 Concrete Pipe Machine can produce concrete pipes from 2000mm to 3500mm in length, 2000mm x 2000mm square culverts, etc. with diameters between 600-2400 mm....

PRODUCTION CAPACITY

Concrete Pipe Size 600mm-2400mm

**CMM 1200 1200mm CONCRETE
MENHOL MACHINE**

In our CMM1200 New Generation Hydraulic manhole machine, products up to 1200 mm diameter and maximum 1000mm length, elevation rings, parcel products can be produced....

PRODUCTION CAPACITY

Manhole 620mm-1200mm

**CPM 800 150- 800mm
CONCRETE PIPE MACHINE**

CPM 800 Concrete pipe machine produces from 150mm to 800mm in length, from a minimum of 1000mm to a maximum of 1500mm, in line with the demands of our customers. It is manufactured in a way ...

PRODUCTION CAPACITY

Concrete Pipe Size 150mm-800mm

**CPM 1400 300-1400mm
CONCRETE PIPE MACHINE**

CPM 1400 Concrete pipe machine produces from 300mm to 1400mm in length, from minimum 1000mm to maximum 2500mm, in line with the demands of our customers. It is manufactured in a way to make ...

PRODUCTION CAPACITY

Concrete Pipe Size 300mm-1400mm

**CPM 1600 300-1600mm
CONCRETE PIPE MACHINE**

CPM 1600 Concrete Pipe Machine can produce Concrete Pipes from 300mm to 1600mm. It can produce from minimum 1000mm to 2000mm in line with the demands of our customers. It is produced full...

PRODUCTION CAPACITY

Concrete Pipe Size 300mm-1600mm

**CPM 1400 PRO 300-1400mm
CONCRETE PIPE MACHINE**

CPM 1400 Pro The new generation concrete pipe machine, from 300mm to 1400mm, produces from a minimum of 1000mm to a maximum of 2500mm in line with the demands of our customers. It is manufac...

PRODUCTION CAPACITY

Concrete Pipe Size 300mm-1400mm

**CPM 1600 PRO 300-1600 mm
CONCRETE PIPE MACHINE**

CPM 1600 Pro The new generation concrete pipe machine produces from 300mm to 1600mm in length from a minimum of 1000mm to a maximum of 2500mm in line with the demands of our customers. It is...

PRODUCTION CAPACITY

Concrete Pipe Size 300mm-1600mm

**CPM 2000 PRO 300-2000mm
CONCRETE PIPE MACHINE**

CPM 2000 Pro The new generation concrete pipe machine produces from 300mm to 2000mm in length from a minimum of 1500mm to a maximum of 2500mm in line with the demands of our customers. It is...

PRODUCTION CAPACITY

Concrete Pipe Size 300mm-2000mm

Concrete Pipe Machine Manufacturing

Turkish leading company in Turkey in the production of Concrete Pipe Machinery, produces concrete pipe machines in two different systems: Hydraulic system (with elevator) and Crane system concrete pipe machines. Fully automatic concrete pipe concrete pipe machine factory in different lengths from 150mm diameter to 3600mm diameter. is produced and installed.

The fastest production in concrete pipe machine is made in hydraulic system concrete pipe machines. Concrete pipe machines with hydraulic elevators. Concrete pipes from 150mm to 1600mm in diameter and 2500mm in length can be produced in these machines. It has a production capacity of 250-300 pieces of 300mm concrete pipe in a day.

Crane System concrete pipe machines Concrete pipes from 300mm to 3600mm diameter and 3000mm length can be produced in these machines. The advantage of the concrete pipe machine with crane is that it can produce large diameter concrete pipes and concrete culverts.

Premium quality components are used in our concrete pipe machines. Electrical panel is SCHNEIDER (German), hydraulic system is REXROTH BOSCH (German), Bearings used in vibrator are SKF or FAG (German).

Concrete Pipe machine vibrators have Electronic speed (intensity) adjustment, which is used for the first time in Turkey. You can adjust the power (intensity) of the vibrators digitally via the control panel. This feature allows you to determine the ideal intensity for each concrete pipe and produce the best quality concrete pipe.

CONCRETE BLOCK & PAVING MACHINE

We have been bringing experience and technology together in the production of Concrete Block Machines since 1978. Our company, which produces Automatic Block Machine, Half Automatic Block Machine, exports to 30 different countries. You can examine the machines we produce, and you can contact us for machine prices.

BLOCK MASTER 4 CONCRETE BLOCK MACHINE

BLOCK MASTER 4 Block machine can produce 4 pieces of 200x400x200mm Blocks in one press. By changing the mold, it can produce block, borders in different sizes....

PRODUCTION CAPACITY

200x400x200 Block **4.000 Pieces**

CBM 20-2 Concrete Block Machine

CBM 20-2 Paving Stone machine can produce 8 200x400x200mm Block and 20 paving stones in one printing....

DAILY PRODUCTION CAPACITY

200x400x200 Block	8.000 Pieces
Paved Stone	400m2

CBM 12-2 CONCRETE BLOCK MACHINE

CBM 12-2 Cobblestone machine can produce 4 200x400x200mm Blocks and 12 paving stones in one press....

PRODUCTION CAPACITY

200x400x200 Pices	4.000 Pieces
Paved Stone	300m2

The machine that produces block with vibration and press by pouring the block mortar prepared by mixing sand, gravel, cement and water in a mixer mixer is called a block machine.

Machines are divided into 3 different groups according to the automation system.

CONCRETE BLOCK MACHINE TYPES

- Fully Automatic Block Machine
- Half Automatic Block Machine
- Manual Block Machine

BLOCK MASTER 10 CONCRETE BLOCK MACHINE

BLOCK MASTER 10 Block machine can produce 10 pieces of 200x400x200mm Block in one press. ...

PRODUCTION CAPACITY

200x400x200 Block	10.000 pieces
-------------------	---------------

BLOCK MASTER 8 CONCRETE BLOCK MACHINE

BLOCK MASTER 8 Block machine can produce 8 pieces of 200x400x200mm Block in one press. ...

PRODUCTION CAPACITY

200x400x200 Block	8.000 Pieces
-------------------	--------------

CBM 25-2 Concrete Block Machine

CBM 25-2 Cobblestone machine can produce 10 pieces of 200x400x200mm BLocks and 25 pieces of paving stones in one print....

PRODUCTION CAPACITY

200x400x200 Block	10.000 Pieces
Paved Stones	500m2

CONCRETE BATCHING PLANT

Adopting the principle of bringing high quality together with its customers at affordable prices in concrete plant production, We bring you the best Stationary Concrete Batching Plants, Mobile Concrete Batching Plants, Compact Concrete Batching Plants, Bucket Type Concrete Batching Plants, and Construction Site Type Concrete Batching Plants.

MOBILE Mix 30 CONCRETE BATCHING PLANT

Developed by iBAR MAKİNA's team, Sparrow 30 Mobile Concrete Batching Plant produces concrete with economic and international standards in projects where concrete need is low. It has a concrete...

PRODUCTION CAPACITY

Hour

30 M3

- Compact Concrete Batching Plant Features
- Mobile Concrete Batching Plant Models
- Fixed Concrete Batching Plant Models
- Concrete Plant Prices

Having an important place in the construction field, the concrete batching plant provides reinforcement of the concrete to the construction site in a short time.

The construction site machines, which are used as ready-mixed concrete systems, provide ideal performance in small-scale projects, saving cost and time.

As construction site-type power plants, it will provide an economical usage opportunity.
