

COVENCO

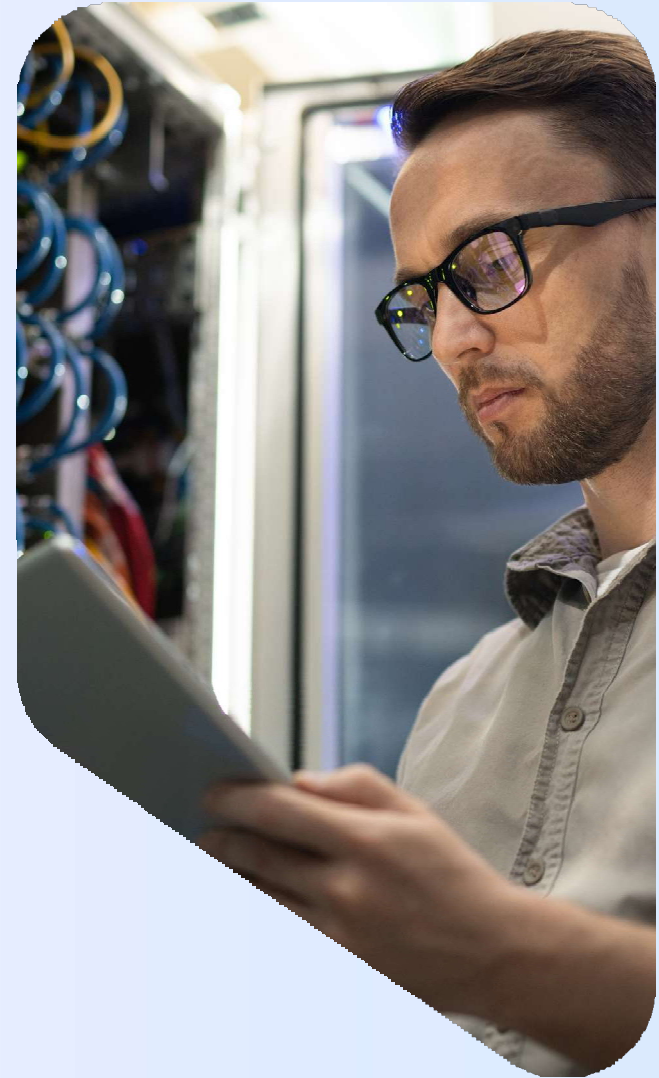

Leader in IT Maintenance since 1978

Products and Services Presentation

Our Company

*Company specialized in **TPM (Third Party Maintenance)** with more than 45 years of experience in the industry, with presence throughout Latin America. **Specialists in multi-brand IT support and maintenance services, sales and leasing of new and refurbished hardware**, with delivery times and unbeatable prices compared to brands, generating significant savings.*

covenco.lat

Benefits of TPM

Learn the key points of working with an **independent** provider

Cost Savings

Reduce maintenance costs in your Datacenter by up to **40%**

A TPM offers real and considerable savings, freeing up resources to reinvest in more innovative projects.

Flexible Contracts

Forget about rigid contracts that force you to buy new equipment.

With a **TPM**, you'll enjoy completely flexible agreements, designed specifically to suit your needs.

Hitachi Data Systems

DC Relocation

Specialized transfers of equipment and IT Infrastructure

- Support in Sanity boot of servers/equipment.
- Support in shutdown of servers/equipment.
- Extraction, packaging and loading from server to transport.
- Server transfer, unloading and unpacking.
- Positioning and energizing the server in the destination rack.
- Support in turning on the server and verifying the correct status of parts and access to the OS.
- Support in connectivity verification, access to filesystems, execution of application services.
- Ad hoc means of transport (Closed truck exclusive use with hydraulic lifting, packaging of equipment with bubble and plastic film, special equipment for the transfer of equipment from origin and destination).
- Insurance.
- Personnel with experience in handling delicate and large volume and weight equipment.

ITAD

Disposal and Recycling of IT assets

- Management of disassembly and/or removal from customer racks or warehouses.
- Removal of equipment and transfer to recycling plant.
- Final disposition of the components Issuance of a final report detailing the recycled equipment.
- Generation of photographic evidence of recycled equipment

IT Infrastructure Administration

IT Infrastructure and Networking Administration and Operation

OS level servers (UNIX Power, AS400, Windows, Linux):

patches, vulnerabilities, configurations, AD administrations, DHCP, DNS, version upgrade, Capacity Planning.

Multi-brand storage:

Luns, firmware installation, ISCSI networks, snapshots, replication, virtualization. Networking: firewalls, switches, routers, access points. Consulting, Assessment and Database Services.

covenco.lat

Virtualization

Administration and Operation of Virtualization and hybrid environments

- Design and architecture of virtualized systems.
- Virtualization Administration (VMware, KVM, Hyper-v).
- Virtualization Assessment (VMware, KVM, Hyper-v).
- Cybersecurity components and vulnerability management.

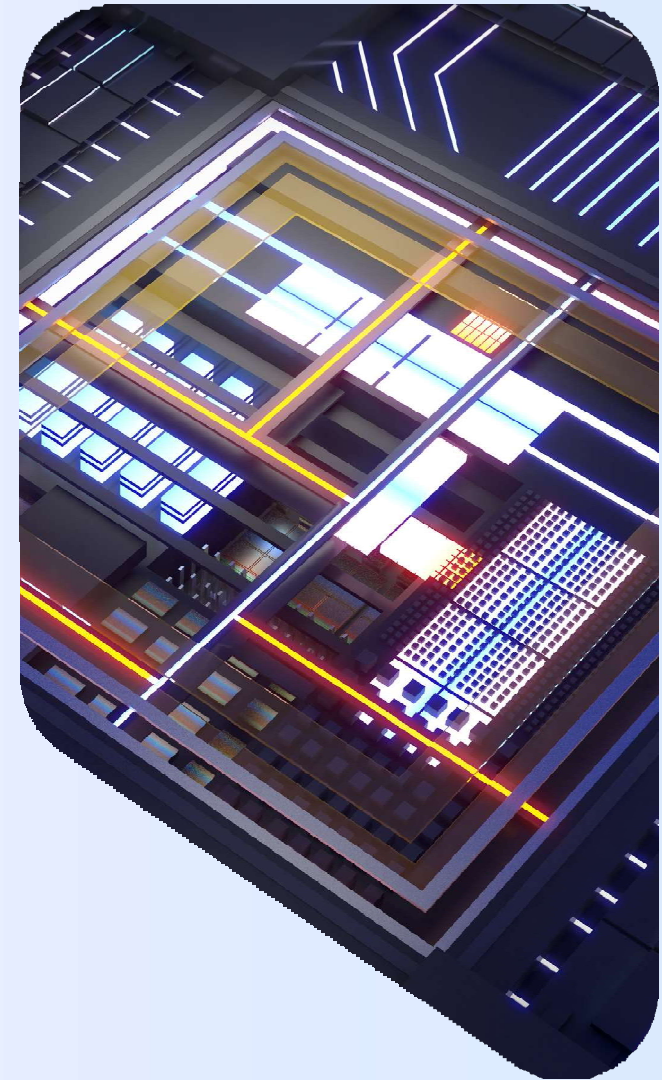

BCP-DRP

Business continuity services to ensure uninterrupted operation in the face of crisis or disaster situations

- BCP (Business Continuity Plan) and DRP (Disaster Recovery Plan)
- Backup Services (TSM-Spectrumprotect, Veeam Backup, Veritas)
- Backup Management:
- Replication Services (storages, Veeam Backup, vSphere)
- Disaster Recovery Services (SRM, storage, creation of DRP plans)

covenco.lat

Cloud - IAAS

Cloud de Power (IaaS):

We offer an infrastructure as a service (IaaS) service based on Power technology, with LPAR on demand deployment through a virtual HMC.

Main features:

Flexible scalability: LPAR from 0.5 CPU and 1 GB of RAM, adapting to your specific requirements.

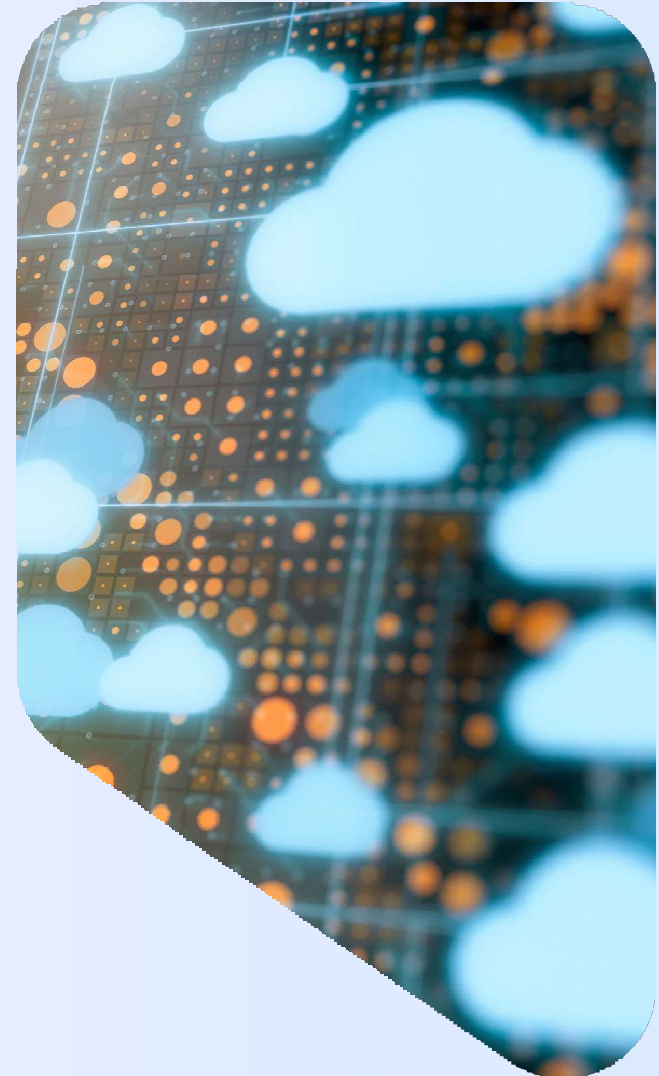

Multiple operating system support: Deploy Lpar with AS400, AIX, Power Linux (SUSE, RedHat, Debian) according to your needs.

Security and privacy: Isolated users in HCM and isolated user management in HCM, ensuring that each user only sees their own LPAR.

Secure Connectivity: S2S VPN or SSL VPN options to ensure client connection security.

Cybersecurity: Implementation of cybersecurity components to protect your cloud infrastructure.

covenco.lat

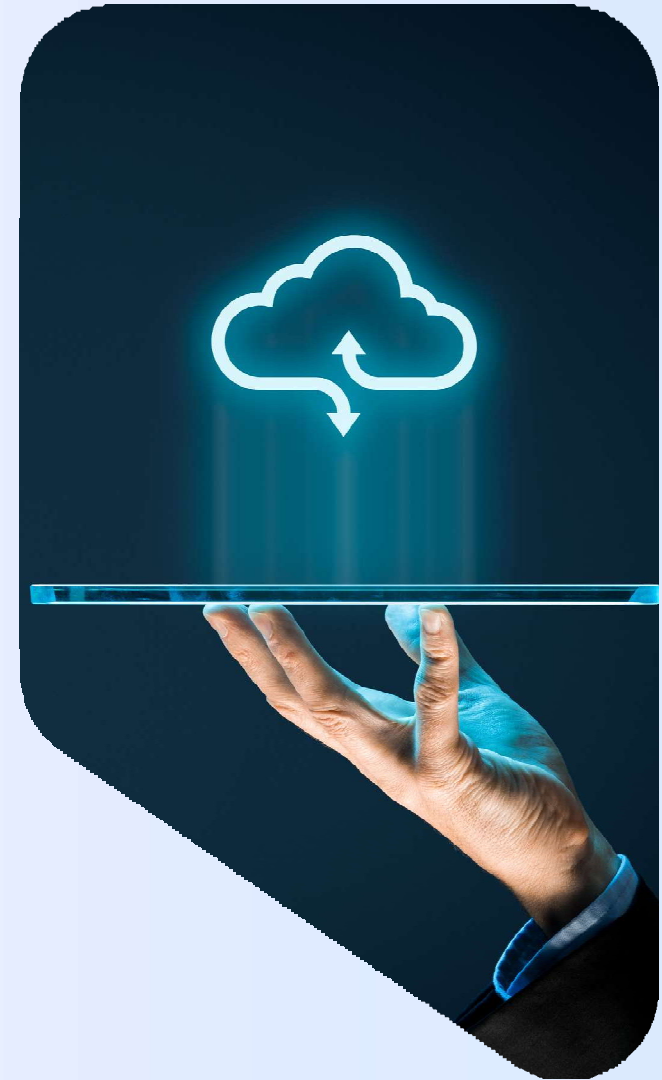

Cloud Management

Cloud platform management

Comprehensive cloud platform management services, including AWS, Azure, GCP and IBM Cloud, along with expertise in Kubernetes, AKS and the implementation of specialized cybersecurity components.
