

ARMESSE

Feel beautiful, be happy

 MPW
Meso-Esthetic Supply

About us

Over 20 years ago Armesso was created and soon became the leader in international and local markets due to its innovative development and production of beauty products.

Due to Armesso's commitment and the constant improvement of its processes, the achievement of becoming a leading brand has been made possible.

In addition to this, constant efforts to improve investigation, development and innovation have contributed to perfecting its beauty products. These and many other reasons have made Armesso stand out among the rest of the brands.

The effectiveness and noticeable results of our beauty products have made the company experience international growth at an exponential level. Because of the popularity of our product line, **Armesso laboratories have opened in 15 other countries.**

Our most important raw material for our processes is the water used during the manufacturing of our products. For this reason, the production plant relies on modern mineral removal and reverse osmosis equipment, which generate purified WIFI - class water.

All of our raw material, bottling and packaging required a guaranteed selection from our distributors which fulfill the demands of international expectations (FDA, USP, COLIPA, CTFA).

Administrative and production areas can rely on an up to date Quality Management System which is in accordance to the codes **ISO 9001, 2008** version. These are certification systems implemented by international entities such as the Colombian Institute of Technical Certification Policies (**ICONTEC**) and IQ Net Management System.

Why choose Armesso?

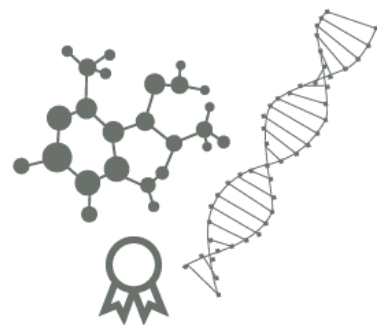

BETTER RESULTS

“Increased effectiveness proven throughout the years.”

INGREDIENTS

“High quality ingredients which have undergone strict potency controls.”

QUALITY AND INNOVATION

“Leaders in new product development and ISO 9001-approved quality policies.”

HIGHEST COMMITMENT AND TRAINING

“Face to face and online training in dermo-cosmetics and commercial techniques.”

Virtual Mesotherapy

A.M Artichoke Plus

Contains: High quality Artichoke Extract and Caffeine.

Visually smooths and contours body by promoting natural drainage, used as the first and mandatory step in a body contouring treatment. It also improves the appearance of edematous cellulite.
