goola açaí

More flavor.
*Much more
pleasure.*

Goola is a brand of Açaí quite different from the others.

Goola is a product with unmatched quality. A lot purer, way more tastier and much more healthy than the others.

Goola benefits its consumers, but also the people who plant, harvest and respect nature. Every bit of Goola carries a part of our culture and pride, and our way of doing things with integrity.

Goola is the result of two young men's dream that got together to prove that it is only possible to produce the best product if you also have the commitment of doing the best for people.

We will teach, inspire and promote the taste of this positive way of conducting business. We cultivate our relations, our future and our planet.

We believe that this is the most important thing.
How about you?

palm
trees

We generate jobs and we
also promote **education**
for the assisted families

the future is our best fruit

Goola is born with the awareness and responsibility to return the benefits to the earth and to those who live from it. Each açaí that we put on the shelves not only brings some of the flavor and purity of the Amazon and its people but give back to the forest way more benefits.

Every **Goola** product comes from an innovative restoration project of the native forrest with bold cultivation techniques for the extension of harvest and productivity increase. In order to complete the cycle we've built a modern and certifiend industry, and we tranfer knowledge and sutainability means to 30 communities of fruit growers in our region, by stimulating the increase of açaí crops through seedling offer and free assistance.

the Açaí and its benefits:

Açaí is a native fruit of the Amazon and one of the main food sources of the native population. Very popular for its energetic power, the consumption of açaí have increased and expanded on a worldwide scale from other characteristics more recently verified, which has made açaí to be considered a superfruit.

In other words, it's a natural food that offers so many (and so good!) nutritional components beneficial for the body.
Açaí is all good!

Feeling**

we care **about everything!** (manufacturing process)

In order to produce the best and purest açai we needed to take care of every step of the process. We have studied in depth the best way to plant and harvest, the cleanest technologies for processing and the most efficient quality control systems. All this care and hard work allowed us to achieve the most important certifications of the market.

More than that, we make sure the whole process is sustainable. From sharing knowledge and technology with communities so they can develop themselves and help recover degraded natural areas
