Silage Bagger Machine ES30, ES30G e ES30D

This Silage Bagger machine was developed to bag a wide range of different silage. High productivity and easy handling. Helping on the warehousing process and bagged silage commercialization.

Model	ES-30	ES-30G	ES-30D
Type	Electrical engine	Powered by gasoline	Powered by petrol
Max Power	2HP	5.5HP	5HP
Yield per hour	2500kg	4000kg	4000kg
Consumption per hour	-	1,5L	1,0L
Dimensions	1600X 1000X900	1600X 1000X900	1600X 1000X900
Weight	110kg	110kg	110kg

Silage press PS4000

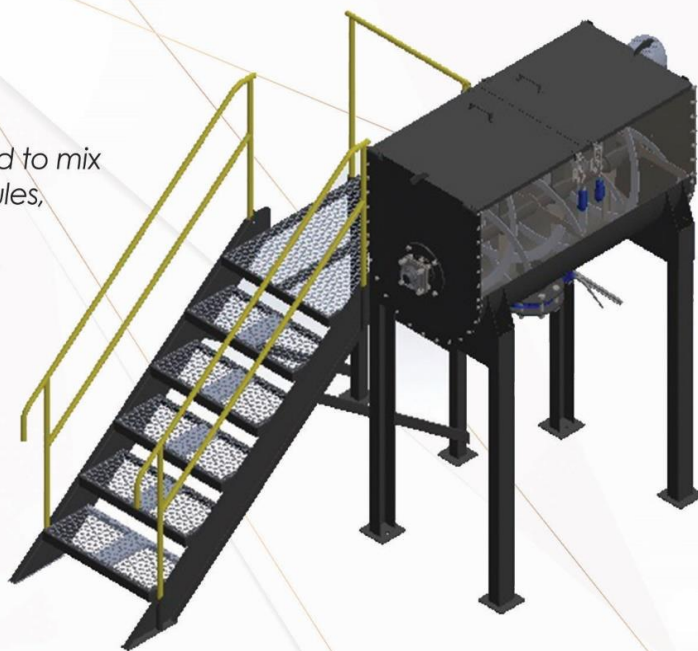

The silage press PS4000 was developed in order to store a wide range of different silage type. High compaction degree, allows storage for long periods without nutritional losses. Through its carousel supply system, enable simultaneous work in three different positions, obtaining great productivity. The bags of silage produced by PS4000, when filled have a rectangular shape, what facilitates handling, stacking and palletizing

Horizontal mixer

Ribbon blender type and Concentric helicoids

Horizontal mixers Trapani, were developed to mix and homogenize powder, paste or granules, ribbon blender type, provides a high performance in agility and efficiency into the mixes collaborating to its process

Capacities

300 liters

500 liters

1000 liters

2000 liters

3000 liters

Conveyor Thread (Chupim)

This conveyor thread was developed to transport bulk products, of different segments as food, plastic, chemicals, grains and others. Its main function is to direct the quantity of material to be used in different containers, which could be made of carbon or stainless steel. The manufacture of a conveyor thread is carried out in a specific way and personalized according to the intended use.

Vertical Mixer

MV 300, MV 500, MV 1000, MV 2000

The vertical mixer was designed to process and mix grains and powder. Its mixing system is through helicoid. It has a supply hopper. They are made of carbon steel 1020 activated by engine and pulley.

Capacities

300 liters

500 liters

1000 liters

2000 liters

3000 liters

Endless Screw Bagger EM3070, EL3070, EM5080 e EL5080

Endless screw feeder bagger of high production, dimensioned to bag and distribute products on an easy flow. Made in carbon steel or stainless steel, with programmable digital weighing system and armored load cell, or mechanical weighing system, counterweight type. Working on endless screw which is used over diverse segments such as: agricultural, chemical, pharmaceutical, alimentary, construction and agroindustry.

Projects for a complete line

Assertive partnership in bagging and mixing process with cutting edge equipments and machines, necessity analysis and availability of intelligent engineering for process optimization aiming at better utilization and profitability in several industrial segments such as: agricultural, chemical, pharmaceutical, alimentary, construction and agroindustry.

ABOUT TRAPANI

Trapani's company is the idealization of its owner, Mr. Sandro David Savegnago, who has worked in a multinational company for 7 years long and decided to start his own business on the maintenance of mechanical and hydraulic equipments, likewise, counting on the knowledge of machinery and the experience achieved through other professionals, he started to work on personalized projects according to their customer's needs. The company's name was given in honor to the Italian city which his family come from.

Trapani is an enterprise which develops machines and equipments to segments like agricultural, civil constructions and chemical industry. Always searching for simplicity and to increase the production using patronized or exclusive solutions to each customer. Trapani arises through the necessity of contributing to agricultural and civil construction markets, with robust and quality-compact products. The partnership with SDS machines, which is a company dedicated to the selling of industrial machines and equipment over 15 years, improve our consolidation on the global market.

MISSION

To develop, manufacture and commercialize machines and equipments that guarantee our clients and partners with quality, security, wide yield and profitability.

VISION

To be a reference in bagging processes and weighing and compacting systems

COMMITMENT

Customer Satisfaction. Having in mind that he is the reason for the existence of any business.

Respect to the environment.
That's what gives us tomorrow's perspective.

Communication. Must be clear and precise. Social responsibility. Our management must be handled as a team, consistent and focused.
