**WE HAVE  
PRODUCTION OF  
FRESH FRUIT**

PRODUCT

# AVOCADO

## HASS

Both the fruit and the seed are relatively small, with a combined weight between 200 and 300 g. The skin is somewhat leathery, rough, green to slightly blackish in color when on the tree; Once harvested, it turns from violet to black as the fruit softens as it ripens, so the consumer recognizes the optimal time to consume it.

Production date:  
From April to  
October

**REFRESH LIFE WITH OUR JUICES!**

Products made with soursop pulp and other ingredients, subjected to pasteurization and hot packaging

PRODUCT

# GRANADA

## WONDERFUL

The pomegranate (fruit) is fleshy and is obtained from a small tree, *Punica granatum*, which does not reach a height of more than 5 meters. This develops very well in the semi-arid areas of the Mediterranean, as happens with the orange or olive tree.

When this tree is in bloom, it has incredible beauty. So much so that it earned the privilege of being part of one of the 7 wonders of the ancient world: the hanging gardens of Babylon.

Production date:  
From April to  
October
