

STAFFING SERVICES

What we can do for you

If your company needs an offshore liaison to augment your team or set up a full operation but don't know where to start, we're your partners.

We have a vast network of extremely talented collaborators who work on the most cutting edge technologies on the IT world and with a wide variety of expertise.

How we do it

Recruiting / Talent Acquisition

- We work alongside our client to understand the needs of the business. Whether is building a long term team strategy or filling in an immediate need. Whether it's a collaborator in the US or Argentina, we can help.
- We find, screen and present the best candidates for the opening
- Once the hire is effective, Cima collects a hiring fee and offers a warranty period for clients to test the candidates out.

How we do it

Payroll Management

We understand it can be cumbersome paying a team offshore and we can help lift that burden. For a small percentage, Cima offers their clients the chance to manage their offshore payroll.

We use Payoneer as a platform to distribute the money to all collaborators on the payroll on a monthly basis.

How we do it

Talent Management

Having ran remote teams for so long, we understand the challenges that could arise. We help our clients navigate through the planning and creation of their teams. Crafting the long and short term plans for growth.

Additionally, our staff helps coordinate and plan any local events for your team, as well as helping with any other needs they may have such as managing coworking spaces and expenses.
