INTERNATIONAL FOODS, INC.

## Since 2003 producing, exporting and distributing the best food.

### Coffee

In Brazil we are in Londrina - PR, region considered world coffee pole. We have the best climatic and soil conditions for the production of this grain, which translates into the best quality of the drink.

### Chicken

Chicken production is surrounded by high technology. From the choice of ration to the form of slaughter and storage are directed so that the birds are healthy and of quality.

### Corn

Brazilian corn is on the world market with excellent quality and price thanks to crop rotation and special soil management.

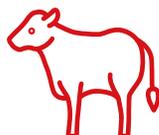

### Fish

With a coastline in continental proportions and holds the largest hydrography worldwide, we have the ability to offer Brazilian native fish for final consumption or its derivatives.

### Rice

Brazil is one of the largest rice producers in the world. The quality of the cereal is unique thanks to the techniques of planting and handling. Demanding markets like the Middle East and Europe are clients of Brazilian rice that combines quality and competitive prices.

### Bovine

Decades of investment in technology has raised the quality of Brazilian beef. Today, known worldwide, Brazilian meat occupies space in more than 150 countries with an annual growth of exports.

### Soy

The second largest soybean producer in the world, Brazil occupies a prominent place in grain quality and marketed value.

### Sugar

Sugar production in Brazil is confused with its own history. Thanks to climatic, rainfall and soil characteristics, we are the largest producer in the world with 50% more of the second place.

### Bean

As Brazil's largest producer of beans, Brazil, although a large consumer, has the capacity and volume to serve the international market.

### Orange juice

Because of its low acidity, Brazilian orange is considered excellent for the preparation of juices and due to the large productive scale has a very low cost.

# Sugar

## History

- ✓ The history of planting Sugar Cane is confused with the history of the country. Due to its ideal soil and climate, Brazil has been the biggest producer in the world for more than a century.
