

Industria de Alimentos

ABOUT US

Established in 1996, IANE is one of the most important food industries in the Northeast of Brazil. With an industrial complex of more than 10.000m² located in João Pessoa, Paraíba, IANE employs over 1000 people directly and indirectly. The company has the latest in equipment and technology to produce tasty and healthy food products.

OUR MISSION

Our difference is not only in exotic flavors, neither in the diversity of options, but in the affectionate way in which we blend the differences in order to make different experiences and cultures accessible to the greatest number of people.

The company constantly invests in equipment, technology and personal training in order to fulfill the consumption needs of the market and achieve the most strict quality standards.

Our commitment to quality begins even before the arrival of the raw material in our industry, and extends till the delivery of our products. We work with the best suppliers, in order to ensure quality products and efficiency in our deliveries. All of this is thought and planned very carefully for the satisfaction of our customers.

All of our products have been tested and approved by both national and international quality regulation agencies, such as ANVISA and FDA.

OUR QUALITY

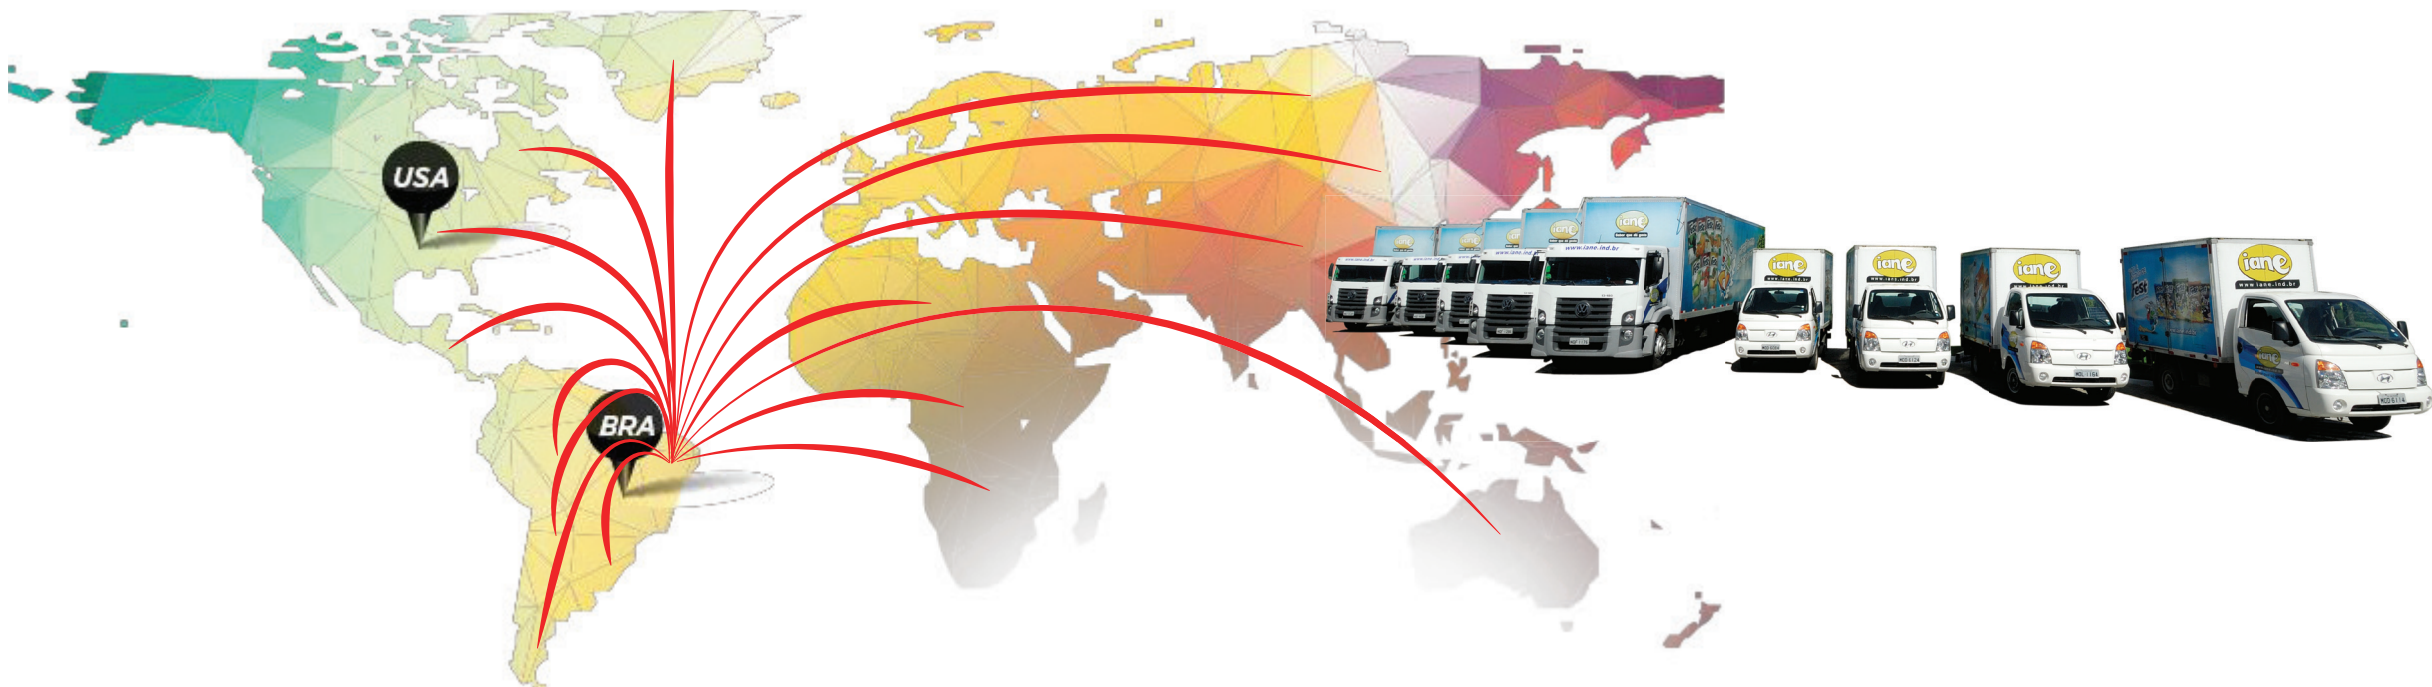

Our potato straws are produced in maximum 72 hours. The production process starts within the first 24 hours with the collect and transport of the fresh potatoes from the fields till our location, and it is completed 48 hours later with the final product leaving our factory to be delivered to our distributors.

OUR QUALITY

OUR STRUCTURE

Our commitment to our customers and quality products has contributed to the continuous growth of the company, allowing us to place our products in the entire country and abroad. With 3 distribution centers and 2 production units in Brazil, IANE is prepared to fulfill the needs of a growing demand, both national and international.

Focused on the responsibility with social development, IANE invests on projects with the power to change the reality of people, in order to make the world a better place.

Currently the company supports activities of the Institute Novo Olhar. This Non Governmental Organization works in the areas of Social Assistance and Education with the goal to support and promote actions aiming social integration, rescue of citizenship, creation of jobs and increase of income of the population in Belem, a small town located in Paraíba.

Belem is one of the towns with the lowest HDI rates in the state, with high unemployment rates and increasing number of kids and teenagers involved with drugs.

The Institute's objective is to offer training courses (Technological and Technical) and social educative activities (Arts, Theatre, Music) to stimulate educational development for children, teenagers and young adults in situations of social vulnerability. IANE believes that is possible to motivate these children to go after better opportunities in life by teaching them new values and providing incentives in favor of the development of their citizenship and improvement of life quality.

SOCIAL RESPONSIBILITY

EXPORTS

Our products are exported via PELICANA TRADING, a direct partner of IANE.

With collaborators in key markets and its expertise with exports, PELICANA is able to place our products worldwide, assisting our international customers with punctual deliveries and excellence in services. The Company has 2 commercial offices, located in Cabedelo-PB and Orlando-FL.

Our location, near one of the main ports of the region (SUAPE 139 km) allows us to direct our production to major international routes, contributing to the fast and effective delivery of our products to many countries.
