Your data is more than just files — it's intellectual property, operational knowledge, and the key to your competitive advantage. As workplaces become more distributed and data increasingly decentralized, protecting it requires more than a traditional backup solution.

With secure, continuous backup and seamless recovery, CrashPlan keeps businesses moving forward without disruption — whether recovering from disasters, ransomware, user error, or other unexpected mishaps.

Trusted by Thousands of Organizations

Protect Your Data. Anytime. Anywhere.

“You can't put a dollar amount on peace of mind. CrashPlan keeps our work protected no matter what happens.”

— NICK SATOVICH, OWNER,
PEER PRESSURE CREATIVE

“I don't need to worry about legal holds. CrashPlan does everything I need it to do.”

— JOE BAZELEY, CISO,
WESLEYAN UNIVERSITY

“It is truly an enterprise-class product. A no-brainer for any business that is a Microsoft 365 subscriber.”

— DALE BYNUM, VP GLOBAL INFRASTRUCTURE OPERATIONS AND HEAD OF IT SECURITY,
COHERENT CORPORATION

Purpose-Built Backup for Every Workload

Endpoints

Flexible protection for the modern workforce.

Secure data across employee devices — Mac, Windows, and Linux — without disrupting productivity. With a wealth of options to choose from, including unlimited storage, bring-your-own storage, continuous backup, self-serve restore, and enhanced ransomware prevention and recovery, IT teams save time while ensuring endpoint data is always recoverable.

SaaS Apps

Enterprise-level backup for Microsoft 365 and Google Workspace.

Protect your data from ransomware, accidental deletions, and compliance risks. With immutable storage, point-in-time restores, and cost-saving storage and archiving options, you ensure your business-critical data is recoverable and your employees stay productive.

Servers

Comprehensive protection for critical infrastructure.

Recover quickly from outages, data corruption, or cyber incidents. With zero trust security and storage vendor-agnostic flexibility, you can build a cloud, hybrid, or fully on-premises solution that meets your data governance and security needs. CrashPlan for Servers fully protects Windows servers, including files, folders, the registry, event logs, and more.

Point-in-Time Recovery

Roll back files and emails to a clean state after accidental deletion or corruption.

Ransomware Protection

Restore data quickly without paying ransom.

Legal Hold & eDiscovery

Secure and retain data to meet legal and compliance obligations.

Regulatory Compliance

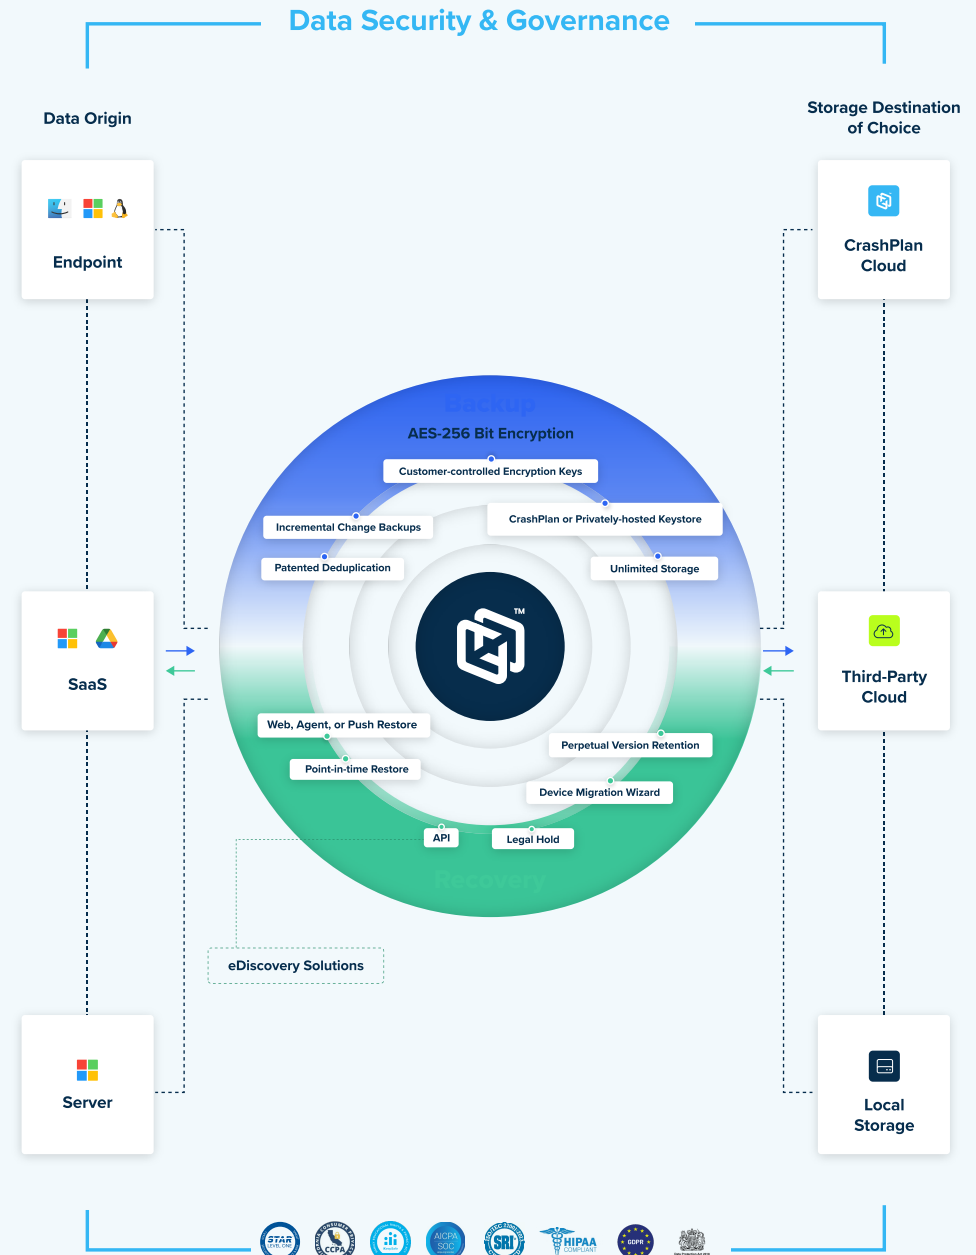

Maintain defensible data retention policies for HIPAA, SOX, GDPR, and more.

Cost Optimization

Reduce storage costs by leveraging existing cloud storage investments.

The data resiliency platform built for IT teams to keep business running

Data Resilience Features Designed for the Enterprise

Data Protection Without Disruption

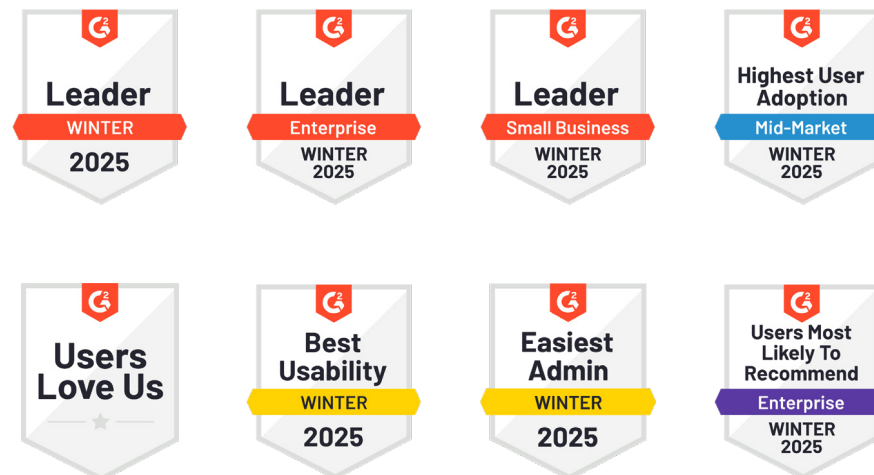

- ✓ **Always-On Resilience** – Efficient, incremental backups that work silently in the background.
- ✓ **Cross-Platform Support** – Protect endpoints (Mac, Windows, Linux), SaaS apps, and servers in one solution.
- ✓ **Granular Restore Options** – Recover individual files, entire folders, or full system states to any point in time.

Robust Security for Compliance & Control

- ✓ **Customer-Controlled Encryption Keys** – Protect data in transit and at rest with AES-256 encryption and TLS 1.2 ciphers.
- ✓ **Immutable Backups & Virtual Air Gap** – Ensure backup integrity with tamper-proof, unalterable data storage that protects against ransomware, insider threats, and accidental modifications.
- ✓ **Zero Trust Security Model** – Secure access with role-based permissions and multi-factor authentication.

Efficiency and Flexibility for IT Teams

- ✓ **Self-Service Restore** – Empower users to restore lost files without IT intervention.
- ✓ **Scalable Deployment & Management** – Simple setup, intuitive administration, and automated policies streamline IT workload while ensuring comprehensive data protection.
- ✓ **Broad Storage Flexibility** – Store data in CrashPlan's cloud, Azure, AWS, OneDrive, on-premises, or a host of other options.

900K+ users backing up

100B+ files restored annually

>1.4 M+ devices backing up

30K customers

CrashPlan provides cyber-ready data resilience and governance in a single platform for organizations whose ideas power their revenue. Trusted by entrepreneurs, professionals, and businesses of all sizes worldwide, CrashPlan's comprehensive backup and recovery solutions ensure the safety and compliance of data without disruption, anywhere at any time.
