

Cuemby is a Company specialized in helps businesses in need to transform their application infrastructure into their cloud. Implement modern architecture and modern software practices. Implement and train people on cloud governance. Implement automation in the software lifecycle.

How Cuemby can help

Audit / Consulting

- Cuemby offers its clients an “audit” of their application infrastructure and cloud governance and provides a report of how they can transform their current infrastructure.

DevOps On-demand

- Cuemby offers a support service, a monthly subscription service in which clients can receive guidance on how to successfully implement the solutions.

Training

- Cuemby is one of 37 companies worldwide to have a Kubernetes Training Partner credential (only English-Spanish bilingual trainer, and only one in LATAM) and is also an official reseller of Kubernetes exams.

Why Cuemby?

- We are cloud-agnostic - any cloud providers clients use, we can help transform their architecture and application infrastructure in their cloud.
- Cuemby is a cloud expert with credentials, Kubernetes Certified Service Provider (KCSP) and Kubernetes Trainer Partner (mentioned above), which are given by Cloud Native Computing Foundation (CNCF) to companies that meet rigorous requirements of successful enterprise-level implementation experience in cloud environments. Leading companies such as Deloitte, SAP, Accenture, IBM are among the companies certified as KCSP (only 134 companies worldwide).
- Cuemby is also a silver member of CNCF.
- We are bilingual in English and Spanish and can flexibly provide our services in both languages.
