## DESIGN VISUAL BRANDING

### To Whom It May Concern

Born and raised in Colombia (South America), I've been nurtured with a passion for art, literature, music, dance and design. I had the opportunity to be part of an organization that travelled to France, Spain, Germany, and Chile representing the Carnival and culture of my city.

I am a certain and creative person who is self-persuaded, independent and comes to you with a solid foundation in both print and digital media. I have worked widely in the graphic design industry for more than 20 years developing high-end designs. I have a master in graphic design that I did in London, England at the London College of Communication as part of the University of the arts.

This allows me to gained valuable work experience, print design, web design, marketing material and design team leadership. I have developed my skills designing campaigns for ideas, people, products or/and services, creating new corporate identities, designing and structuring websites among other projects. My normal days are mixtures of looking for

new ideas by reading the creative material, exploring a new environment and appreciating the vast amount of visual communication that the world has to offer.

I think of challenges with strategy, so I worked hard in to deepen knowledge, updating our performance area marked by constant and changing fast evolving world research into new designs.

I also have 6 years experience in teaching graphic design at university, always willing to share with my students through workshops, new electives, diploma, masters and disinterested advice to our future professionals.

I can say that I have good problem-solving skills as well as my proven ability to manage my careers (Graphic Design & IT) and, As a dedicated and driven individual I don't have any issues taking after guidelines from senior designer and clients. At this moment, I am hoping to join an inventive group of designers, and to work for an organization that just contracts the best.

AV is a company that provides high quality architectural rendering and visualization services.

**CLIENT**  
ARTISTIC VISION

**PROJECT**  
UX UI / BRANDING
