

DIEGLAS
coffee

OUR COMPANY

- DIEGLAS is a 100% Chiapaneca company dedicated to the manufacture, marketing, maintenance and sale and / or services of equipment lending oriented to the coffee industry.
- Our company is created in November of 2015 in the city of Tuxtla Gutiérrez, Chiapas; Having as main vision the continually gaining market in the Republic, as well as in other countries, as a consequence of the quality in Our processes, products and services, guiding all our operations to the Decrease of costs for the total satisfaction of our clients.

MISSION

- The mission of DIEGLAS is to be a leading company in Mexico, as a consequence of the quality of our products, processes and services throughout the coffee industry. We also seek as a result of Our operations collaborate with the entities involved with the organization to obtain benefits that support them to be more competitive in their field.

OUR BEAN

- Approximately 90% of the coffee our company industrializes comes from coffee plantations in two regions, both located in the State of Chiapas:
- **The SOCONUSCO**, coastal area that comprises the border region between Mexico and Guatemala. The coffee of this region is collected at our plant and collection center in Tapachula, Chiapas. The majority of this coffee is cultivated by small-scale producers of the state in coffee plantations that are located no less than 1000m above sea level, which guarantees the best growing conditions for the desired quality of coffee beans.
- **JALTENANGO**, a small town in the municipality of Ángel Albino Corzo, located in the Frailesca region in the State of Chiapas. The coffee of this region is collected at our main plant in Tuxtla Gutiérrez Chiapas. Like the region mentioned above, these beans are cultivated on parcels with an altitude of no less than 1000 m above sea level.

OUR BEAN

- Our company is continuously looking to integrate small-scale producers from the State of Chiapas into our production chain, under a fair trade regime. By consuming our products, you are directly contributing to the sustainable development of each one of these producers.

OUR PROCESS

1. Lot coding

From the reception of each bag of parchment coffee we carefully lot code it; taking into account the qualities of each of the samples, to make an adequate selection of the beans that enter our process.

OUR PROCESS

2. Pre-Cleaning, Threshing and Selection

Once the correct lot coding is carried out, our dry process improves the conditions of the bean developing a unique and incomparable process and as a result a cup of high-grown coffee of the best sensory qualities.

OUR PROCESS

3. Classification of grain

The technology used in our processes complies with the current export standards. Our densi-metric classification machine is designed to classify beans according to their specific weight; this type of sorting has been established as an international standard in the preparation for export. Because of its capacity and efficiency this is the most widely used machine for the classification of green coffee of export quality.

OUR PROCESS

4. Roasting and Grinding.

- Our process guarantees the quality of each one of our products; every processed lot is submitted to a quality control system that uses the highest technology available; guaranteeing the complete satisfaction of each and every consumer of our product.

OUR PROCESS

►At the moment we have a production capacity of over 150 tons of roasted coffee per month by each of our processing plants, located in:

PLANTA TUXTLA: Calzada Emiliano Zapata 940-A (Bodega B), CP. 29050, Tuxtla Gutiérrez, Chiapas.

PLANTA CA TAPACHULA: 8ª Av. Norte. esquina 51ª Calle Poniente, bodega #1, Col. Burocrática, Tapachula, Chiapas.
