Our Services

Artificial Intelligence

Machine Learning, Deep Learning, Business Problems and AI applications. [Learn More About The AI Practice.](#)

Software Development

We develop the best software solutions, aligning with your business requirements.

Web Development

We provide development of back-end, front-end, database and mobile devices on the platform you need.

Mobile Development

We are UX and UI designers, Product Owners, Scrum Masters, full stack developers and more, we work together to create really useful applications.

Quality Assurance

Our highly qualified software tester will ensure that your software has the quality you need before it reaches your customers.

Staff Augmentation

We support our partners in any phase of IT projects by assigning our team or a single specialist for a set period of time.

UX & UI

Our design team is a small studio within a large software company that will help you create an attractive product easily and quickly.

"WE ARE STRATEGIC PARTNERS"

Dividato specializes in **ENTERPRISE** services and developments. Our track record in the market led us to build a company profile which makes us a reliable **PARTNER** where our clients delegate elementary processes to us being long-term technological allies.

We can provide the best development POD/team to your company with high level Latin Americans developers at very competitive rates with the best cost benefit ratio.

Why Outsource Software Development?

- ✓ Not “core” to most organizations
- ✓ Potential Cost Savings
- ✓ Allows you to focus on core business
- ✓ Availability and retention of resources
- ✓ Quality

Our Technology Stack

Software Development	Web Development	Mobile Development	QA	Data Bases	AI
Java 1.8	Node.js	Adroid	Mocha js	SQL Server	TensorFlow
Spring 4.x, 5.x	Angular	iOS	Cucumber	Oracle	TensorFlow 2.0
Hibernate 3.x, 4.x, 5.x	JavaScript	Node.js	Xamarin Test Cloud	MySQL	TensorFlow Lite
PrimeFaces 6.x	Ruby	React	TestNG	PostgreSQL	Tensorflow.js
jQuery 3	HTML5	ionic	Protractor Test	MongoDB	Theano
Progress	CSS3/4	Xamarin	Python	Redis	PyTorch
RESTful	Sass			Progress	SAP ML Foundation
Pharo	PHP				Dataiku Data Science Studio
.NET	Bootstrap				Google Cloud ML Engine
ASP.NET MVC	Drupal				Azure ML Service
C/C++	Laravel				Azure ML Studio
Python	JQuery				AWS ML Services

Case Studies

Business challenge: the company had its services on multiple platforms, which distributors (agencies) had to visit different portals to perform the various tasks for their daily work and in some cases there were no automated processes as in the case of online payments.

Solution: development of an online payment system in order to connect the company with its resellers. We also develop a portal as a single access point for Costa Cruceros distributors to manage all their business with the client on a single platform (insurance, reservations, payments, finances, commission payments, banks, government tax systems, marketing , etc).

[Learn more](#)

A screenshot of a travel website. At the top, there's a navigation bar with links for Home, About us, Work, Info, and Contact us. Below the navigation is a large, stylized illustration of a cruise ship sailing on the ocean under a blue sky with a sun and clouds. The word "Travel Memorie" is prominently displayed in large, bold, black letters. Below the title is a small block of placeholder text: "Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam". At the bottom of the page is a blue button with the text "Learn more".

ORACLE®

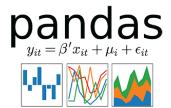

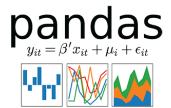

AI Case Studies

ACA (Association of Argentine Cooperatives) is a massive association of cereal producers – corn, wheat, soybeans, barley, among others.

Development (ongoing project): since 2018 to the present, working for the biggest farmer association in Argentina (ACA) designing, training, evaluating and deploying models for: crop yield predictors (soybeans, corn, wheat and barley), zone based management, predictions of plagues and diseases for those four crop types, predictions of nutrition deficit and prediction of moisture stress index of the crop canopy. I used optical satellite images and synthetic aperture radar images.

Other Clients:

We are in Argentina

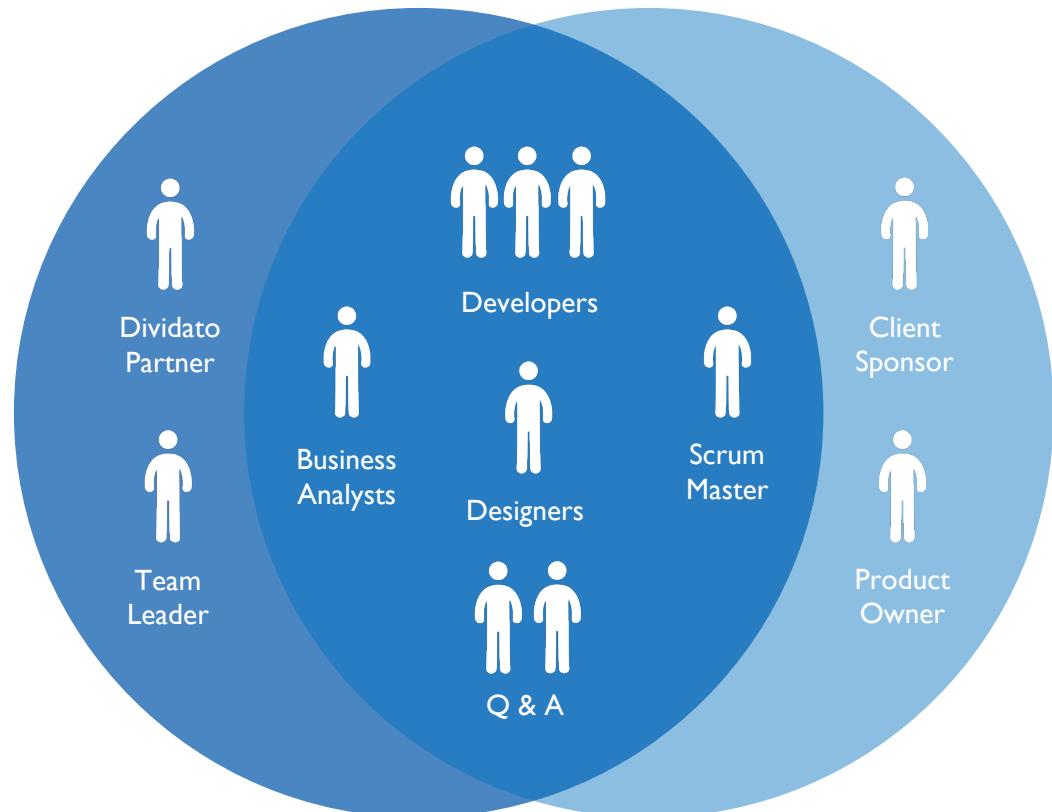

Strategic Location

We are rooted in a technological pole that supports us. Argentina is a country of great technological, commercial and industrial importance. Our geographical location allows us to provide the best business opportunities with qualified resources in the region.

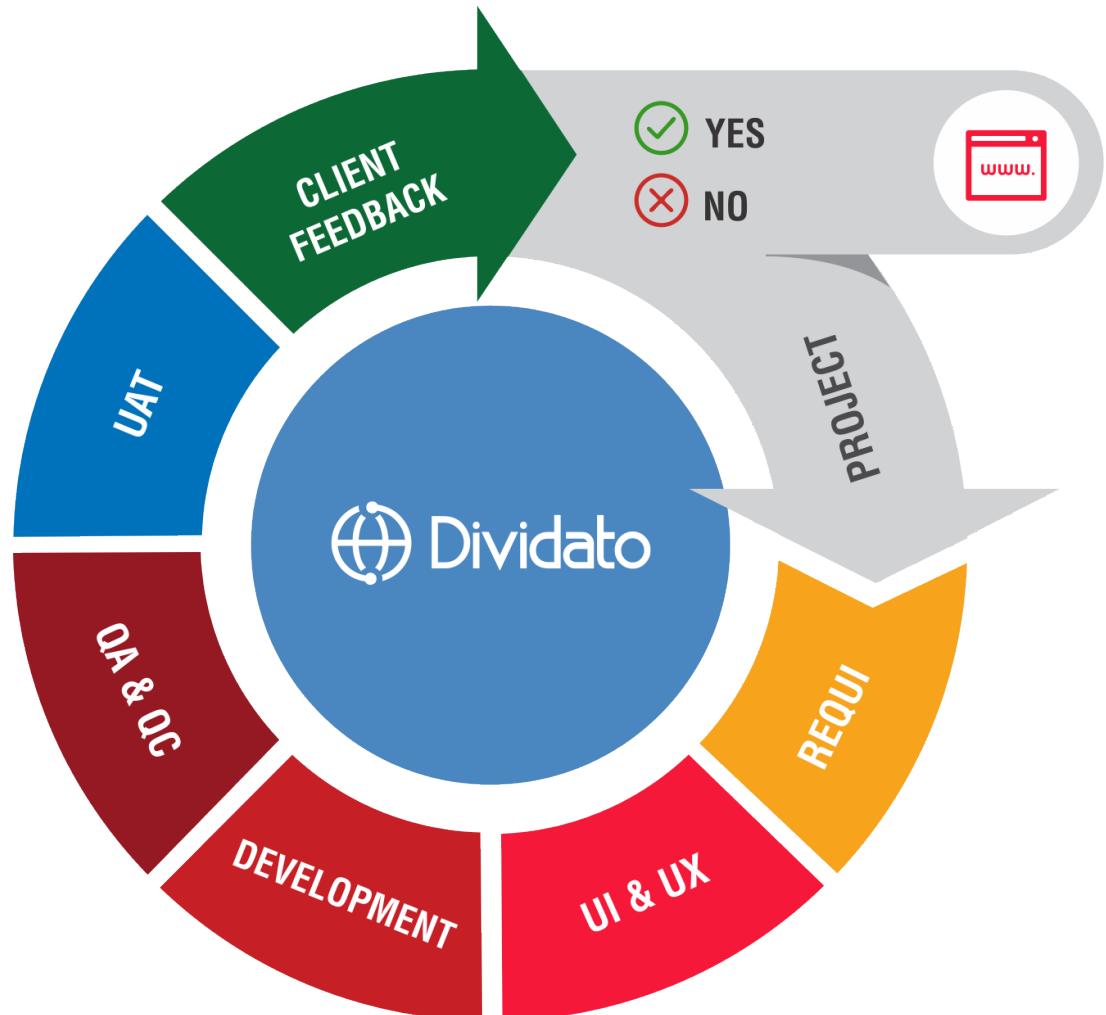

Flexible team configurations

We assign dedicated teams to each of our projects, composed of different profiles according to each need.

Our Methodology

Adapted to the needs, uses and customs of each client

Agile Methodologies

1. Survey, requirements survey
2. Sizing - Commercial Proposal
3. Analysis and System Design
4. Development
5. Versioning
6. Testing
7. User Acceptance (UAT: User Acceptance Test)

We works with Our Agile PODs

What is a POD?

Agile team with blended skills.

Sized at 8-10.

Fully responsible for creating solutions, building and sustaining features, products or platforms.

Self organized to meet creative and production goals, make tech decisions and reduce risk.

Why PODs?

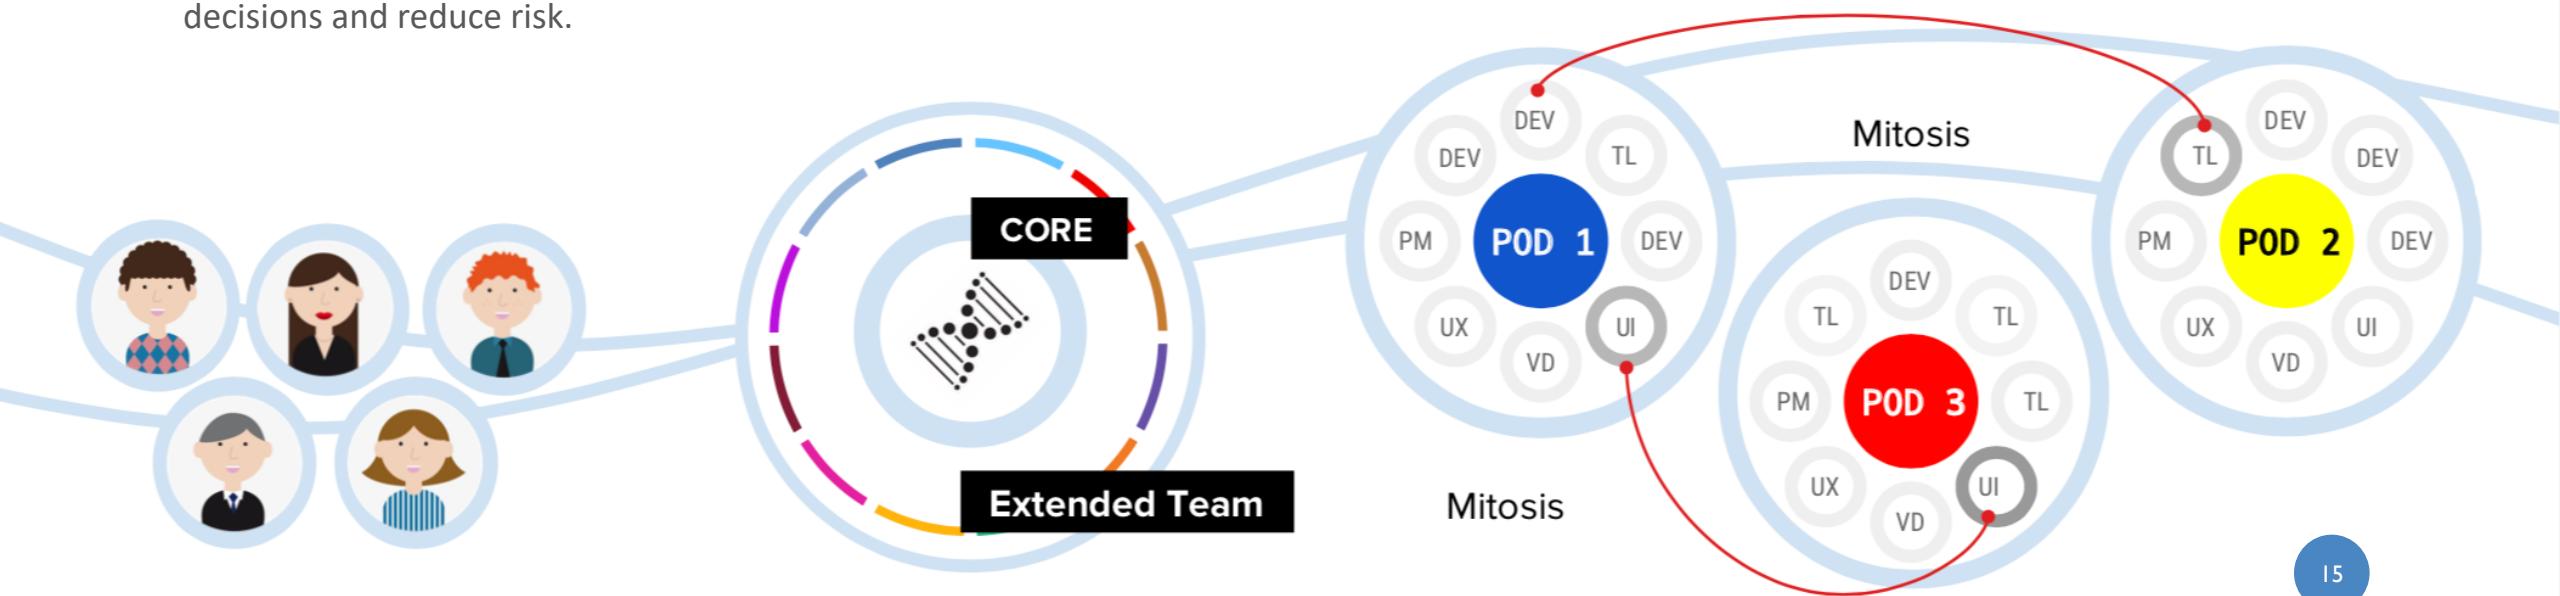

Organic ecosystem to foster, realize and sustain digital innovation.

Designed to SCALE.

Measured, gamified and motivated to evolve per our client's goals.

Maturity

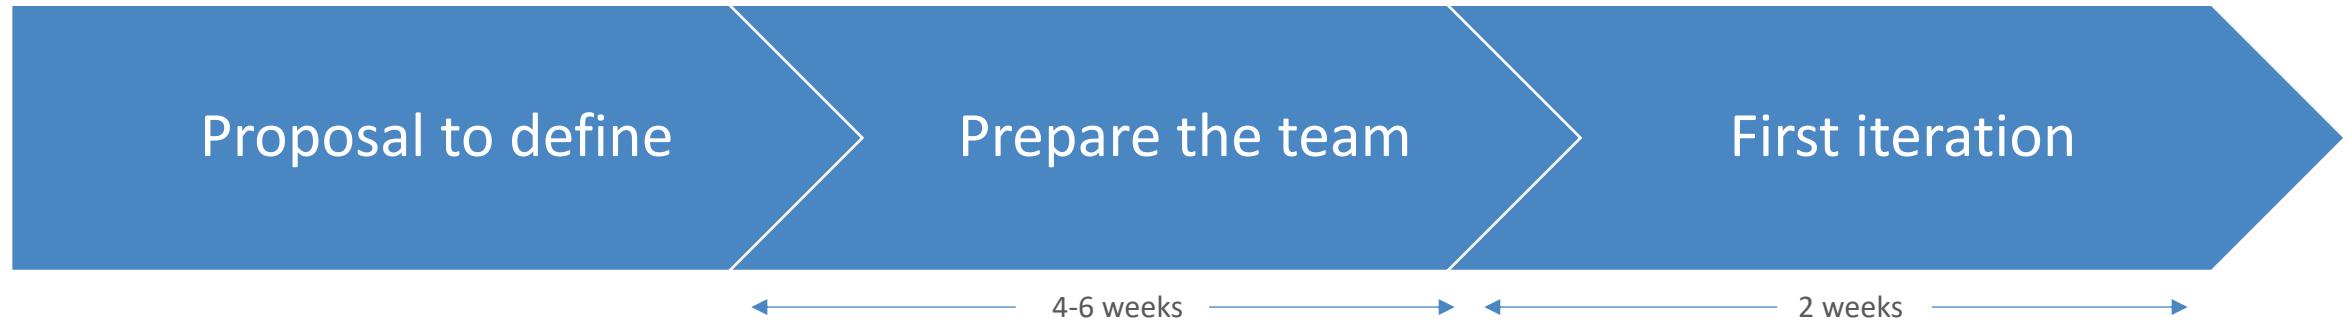

Impact - Velocity - Quality - Autonomy - Relationship

Some Achievements

- We are winners in the Digital Trailblazer category of the SAP Innovation Awards 2019. We participate with the project Sustainable Agriculture with Location Intelligence and the hand of Asociación de Cooperativas Argentinas C.L.
