Witty Malvok

Genre

Adventure

Current state

Right now the game reaches a prototype state alpha which is being tested on its gameplay. There we can see only 1 endless level where the action happens.

Mechanics

Point and click and sequential puzzles.

Main Character

One main hero character, who is an alien trapped in a Scientific Lab. His body is viscous. So his only super power (power-up) is throwing his viscosity to enemies.

He is trying to reach the exit door, but he must overcome some obstacles. He is going to receive instructions from the gamer how to move in the lab (direction arrows) and then he will execute them. At the same time, he can spit his viscosity when an enemy tries to stop him in the route for escape.

Explosive Rolling Ball

This is an invention of our Crazy Scientist. It has artificial intelligence and it is explosive. So he can make decisions in order to stop Malvok to get out this evil lab.

Dangerous Kitty Robot

She is a very clever kitty who controls a robot . She is going to block the way out from the lab with no mercy. Malvok must face her in his escape.

Crazy Scientist

This character is the creator of many inventions going around the different rooms in the lab. He levitates and posses a very destructive formula to avoid Malvok's escape.
