Planta de producción

Aquí hacemos de lo imposible una realidad

¿how do we develop The most efficient solution?

- **An Unique and specialized FRP factory** (Fiberglass reinforced Plastic).

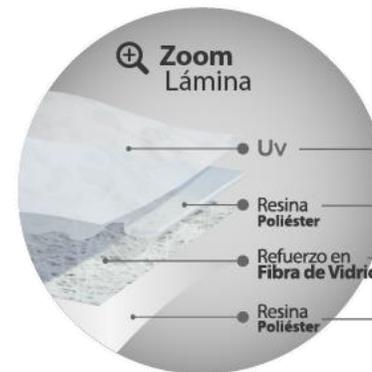

1. Advanced Technology.

2. More than 800l
lm per day.

3. HQ with more
than 4000sqm of
bioclimatic design.

2UV People and Objects protection.

QR Plus Extreme Chemical Resistance

¿how we add
value to your purpose?

Through the develop of FRP construction and architectural solutions, optimizing the day light benefits and protecting the buildings form external factors to give comfort, durability and **ROI**.

E

An ecological and comercial option in standard measure with a perfect balance between quality and price.

T E

The knowledge of our entire TEAM at the disposal of each project in order to create a unique and intelligent envelope with the highest standard of comfort, functionality and aesthetic design.

Intelligent Envelope

The intelligent envelope is the most efficient way to coat a building structure, responding to environment exigences.

Performance boosters.

Resina retardante al fuego	Fórmula Química Especial	Película aséptica grado de alimentos	Acabado Diamantado difusor de luz	Pigmento Termoselectivo y Bloqueo IR	Protección externa e interna con triple filtro Ultravioleta	Recubrimiento extra ante abrasión	Elimina Virus y Bacterias

Durarroof®

An ideal solution to create safe, comfortable and durable spaces on environments with high corrosion levels or chemical expure.

Benefits

- Ideal on spaces with high asepsis requirements.
- High Chemical resistance for a long durability in corrosive environments.

Colors*

*The final color may vary from the image
* Possibility of developing custom colors

Performance boosters*

Additives that maximize the performance of our solutions to ensure optimal performance against extreme situations and severe environmental factors present throughout the useful life of any building.

* Performance boosters only on request with additional cost.

Imagen de referencia

Aseptic panel for interior applications with special protection against fungus and bacteria

Benefits

- ✓ Stability on temperatures between -24°C and 82°C.
- ✓ Possibility of an additional protection with and **certified FDA** additional layer.
- ✓ High impact and corrosion resistance.
- ✓ Easy to clean and minimal maintenance.

Applications

-  **2UV** People and Objects protection.
-  **QR Plus Extreme** Chemical Resistance
-  **Resistance**
-  **Durability**
